The International Directory of

Government 2022

Taylor & Francis

For many years

Myanmar operated an inward-looking

economic system built on import substitution.

Ultimately this policy failed, leaving behind inefficient state

economic enterprises and widespread

poverty. Political

unrest in 1988 led a newly installed military

government to liberalize the economy,

opening it to foreign investment and private

participation in trade. This move towards a

market economy was in line with world-wide

trends, but political instability forced the

country to follow a course different from

neighboring countries. By analyzing economic

policies and performance across

the economic

spectrum, this book presents an overall picture of economic development in Myanmar between 1988 and the early 2000s. The authors synthesize both macro and micro level data to overcome some of the limitations of unreliable national statistics, and show how the government attempted to deal with two key issues it faced. The first was how to reform the inefficient socialistic economic system in conformity with a market economy, and the second was how to develop the agricultural and underdeveloped economy to alleviate mass poverty.

Megacities are new urban phenomena, results of globalisation and subject to as well as motors of global ecological, socio-economic, and political change. New are the dimensions of growth, concentrations of population, infrastructure, economic power and decisions - and the simultaneous, self-energising acceleration processes of development. But one must be wary of generalised statements since differences of economic performance, social coherence, infrastructure conditions and governance structures should not be ignored:

This publication aims at analysing current transformation processes of Yangon/Myanmar, as spearhead of national development, bridge to Southeast Asia and the world.

 For almost 200 years Protestant missionaries have endeavoured to communicate the gospel to Burmese Buddhists in Myanmar. However, Christianity among this people group is still regarded as a 'potted plant' with former Buddhists being separated from both their community and culture. In this publication Peter Thein Nyunt, a former Buddhist monk, examines past and current approaches of the Protestant church among Burmese Buddhists. Based on his findings the author develops a contextual missiological strategy, with a relevant christological message and ecclesiological structure.
