The The thoroughly Revised & Updated 3rd Edition of the book Polity Compendium for General Studies CSAT Paper 1, State PCS, CDS & NDA Exams has been thoroughly revised & updated to provide the MOST UPDATED material for the exam. The USP of the book is that the information is captured in a concise and easy to remember methodology which further comprises of Mind Maps, Infographics, Charts, Tables and latest exam pattern MCQs. The emphasis of the book has been on conceptual understanding and better retention which are important from the point of view of the exam. The book captures most of the important questions with explanations of the past years of the IAS Prelim exam, CDS, NDA and other competitive exams distributed in the various chapters. The book is divided into 8 chapters. Each chapter is followed by 2 levels of exercises with 1000+ Simple MCQs & statement based MCQs.

The Wild East CRC Press

This book is written to get an overall idea of “dynastic politics” in India. It is always kept in mind that a citizen of India should know more about the politicians who are in the Government and form policies, etc. to take the country in the proper direction, at the same time the book should be interesting. Wherever possible, family trees are shown as well as the assets of our politicians. It was natural to start with the Nehru Gandhi family, being one of the largest and long-ruling families at the helm of all affairs. Then State-wise, the families are chosen and the account is presented. Since the volume is huge, this book is in two volumes. States are chosen alphabetically. So, even if the Nehru Gandhi family is in Volume 1, Tamil Nadu, Telangana, Uttar Pradesh, etc. are in Volume 2. Early rulers in Indian history used to handover the throne to their sons and then to the next generations for generations to come until some larger event upset the process, mostly conspiracies by persons like very close aides of the king or a revolt. Similar lines were followed even during our democracy passing on the rule to the next generation, which gave rise to dynastic rule. Indian politics has witnessed a large spectrum of politicians from various fields. Initially, it consisted mainly of leaders from the field of law. But now, we find that we have eminent personalities from the sports field, actors, actresses, superstars from the silver screen; the literary field is no exception; we have writers, poets, and so on; economists find a special place in the political arena; politics does not shun even criminals or few dacoits who then turned to politics after their surrender. Businessmen, kings or we can say princes from princely states as Britishers decided to call them are also found here. We have the learned people in politics as well as the illiterate people (angutha chhaap) who learnt to sign only after assuming office on getting elected.

An Institutional Perspective Bloomsbury Publishing USA

The decade after 11 September 2001 saw the enactment of counter-terrorism laws around the world. These laws challenged assumptions about public institutions, human rights and constitutional law. Those challenges are particularly apparent in the context of the increased surveillance powers granted to many law enforcement and intelligence agencies. This book brings together leading legal scholars in the field of counter-terrorism and constitutional law, and focuses their attention on the issue of surveillance. The breadth of topics covered in this collection include: the growth and diversification of mechanisms of mass surveillance, the challenges that technological developments pose for constitutionalism, new actors in the surveillance state (such as local communities and private organisations), the use of surveillance material as evidence in court, and the effectiveness of constitutional and other forms of review of surveillance powers. The book brings a strong legal focus to the debate surrounding surveillance and counter-terrorism, and draws important conclusions about the constitutional implications of the expansion of surveillance

powers after 9/11.

Harnessing the Power of India's Unruly Democracy Disha Publications

Presents a cultural portrait of today's India that evaluates the role of political corruption, economic inequality, and civil rights violations in the economic promise of five years ago.

Metals and Related Substances in Drinking Water Rupa Publications

When *The Accidental Prime Minister* was published in 2014, it created a storm and became the publishing sensation of the year. The Prime Minister's Office called the book a work of 'fiction', the press hailed it as a revelatory account of Prime Minister Manmohan Singh's first term in UPA. Written by Singh's media adviser and trusted aide, the book describes Singh's often troubled relations with his ministers, his cautious equation with Sonia Gandhi and how he handled the big crises from managing the Left to pushing through the nuclear deal. Insightful, acute and packed with political anecdotes, *The Accidental Prime Minister* is one of the great insider accounts of Indian political life.

Proceedings of the 8th International Symposium on Heating, Ventilation and Air Conditioning is based on the 8th International Symposium of the same name (ISHVAC2013), which took place in Xi'an on October 19-21, 2013. The conference series was initiated at Tsinghua University in 1991 and has since become the premier international HVAC conference initiated in China, playing a significant part in the development of HVAC and indoor environmental research and industry around the world. This international conference provided an exclusive opportunity for policy-makers, designers, researchers, engineers and managers to share their experience. Considering the recent attention on building energy consumption and indoor environments, ISHVAC2013 provided a global platform for discussing recent research on and developments in different aspects of HVAC systems and components, with a focus on building energy consumption, energy efficiency and indoor environments. These categories span a broad range of topics, and the proceedings provide readers with a good general overview of recent advances in different aspects of HVAC systems and related research. As such, they offer a unique resource for further research and a valuable source of information for those interested in the subject. The proceedings are intended for researchers, engineers and graduate students in the fields of Heating, Ventilation and Air Conditioning (HVAC), indoor environments, energy systems, and building information and management. Angui Li works at Xi'an University of Architecture and Technology, Yingxin Zhu works at Tsinghua University and Yuguo Li works at The University of Hong Kong.

Ruling Dynasties of Independent India - Volume 2 IUCN

This book is based on the 2016 Indian demonetisation. It revolves around demonetisation's objectives stated by the Government as a measure to attack on black Money, terrorism, counterfeit currency and making cash-less, further corrected to less-cash economy. The book weighed these stated objectives and assessed whether objectives will be achieved by this demonetisation. In addition to three Indian demonetisations, the book covers 18 demonetisations across the globe and 14 demonetisation-like events. Analysed demonetisation on the basis of cost-benefit analysis, the book has also covered impact of demonetisation on major industries like FMCG, Realty, Power, infrastructure, etc. and on prime economic indicators like GDP, GVA, CRR, repo rate, inflation, etc.

Evolving Asian Perspectives SAGE Publications India

Metals and Related Substances in Drinking Water comprises the proceedings of COST Action 637 - METEAU, held in Kristianstad, Sweden, October 13-15, 2010 This book collates the understanding of the various factors which control metals and related substances in drinking water with an aim to minimize environmental impacts. *Metals and Related Substances in Drinking Water*: * Provides an overview of knowledge on metals and related substances in drinking water. * Promotes good practice in controlling metals and related substances in drinking water. * Helps to determining the environmental and socio economic impacts of control measures through public participation *

Introduces the importance of mineral balance in drinking water especially when choosing treatment methods * Shares practitioner experience. The proceedings of this international conference contain many state-of-the-art presentations by leading researchers from across the world. They are of interest to water sector practitioners, regulators, researchers and engineers.

Monumental Blunder or Masterstroke Penguin UK

The author has maintained two open-source MATLAB Toolboxes for more than 10 years: one for robotics and one for vision. The key strength of the Toolboxes provide a set of tools that allow the user to work with real problems, not trivial examples. For the student the book makes the algorithms accessible, the Toolbox code can be read to gain understanding, and the examples illustrate how it can be used —instant gratification in just a couple of lines of MATLAB code. The code can also be the starting point for new work, for researchers or students, by writing programs based on Toolbox functions, or modifying the Toolbox code itself. The purpose of this book is to expand on the tutorial material provided with the toolboxes, add many more examples, and to weave this into a narrative that covers robotics and computer vision separately and together. The author shows how complex problems can be decomposed and solved using just a few simple lines of code, and hopefully to inspire up and coming researchers. The topics covered are guided by the real problems observed over many years as a practitioner of both robotics and computer vision. It is written in a light but informative style, it is easy to read and absorb, and includes a lot of Matlab examples and figures. The book is a real walk through the fundamentals of robot kinematics, dynamics and joint level control, then camera models, image processing, feature extraction and epipolar geometry, and bring it all together in a visual servo system. Additional material is provided at <http://www.petercorke.com/RVC>

The Effects of Hot, Moderate, and Cold Environments on Human Health, Comfort and Performance, Second Edition Taylor & Francis

Our responses to our thermal environment have a considerable effect on our performance and behavior, not least in the realm of work. There has been considerable scientific investigation of these responses and formal methods have been developed for environmental evaluation and design. In recent years these have been developed to the extent that detailed national and international standards of practice have now become feasible. This new edition of Ken Parson's definitive text brings us back up to date. He covers hot, moderate and cold environments, and defines these in terms of six basic parameters: air temperature, radiate temperature, humidity, air velocity, clothing worn, and the person's activity. There is a focus on the principles and practice of human response, which incorporates psychology, physiology and environmental physics with applied ergonomics. Water requirements, computer modeling and computer-aided design are brought in, as are current standards. Special populations, such as the aged or disabled and specialist environments such as those found in vehicles are also considered. This book continues to be the standard text for the design of environments for humans to live and work safely, comfortably and effectively, and for the design of materials which help the same people cope with their environments.

Community Radio in South Asia Rupa Publications

This book features original papers from International Conference on Expert Clouds and Applications (ICOECA 2021), organized by GITAM School of Technology, Bangalore, India during February 18-19, 2021. It covers new research insights on artificial intelligence, big data, cloud computing, sustainability, and knowledge-based expert systems. The book discusses innovative research from all aspects including theoretical, practical, and experimental domains that pertain to the expert systems, sustainable clouds, and artificial intelligence technologies.

Fundamental Algorithms in MATLAB Disha Publications

This Book is a compilation of select articles authored by M R Venkatesh, mostly in Rediff.com. To the reader, his writings offer a ring side view of the debilitating state of affairs in India under the leadership of Dr. Manmohan Singh. With a persuasive, passionate and powerful style of writing the

author demystifies the challenges confronting India and Indian economy in a manner that is comprehensible even to the layman. Making a strong case for a small yet effective government, Venkatesh canvasses for sweeping economic, administrative and judicial reforms while simultaneously pointing out to the gargantuan failures of Dr. Manmohan Singh's administration. Written between 2011 and 2013 these articles capture India's precipitous decline in various spheres caused by a singular lack of willingness and / capacity to govern. In a refreshing departure from the known suspects who end up merely being critical of the Government, he also offers various alternatives to the challenges confronting the country. Needless to emphasize, while his suggestions are eminently debatable, the fact remains that these proposals are sure to secure necessary traction in days to follow. The Toynbee like sweep of the subjects dealt by Venkatesh in a precise, succinct and incisive manner makes this book a compelling read. The foreword of this book has been authored by Dr. Subramanian Swamy.

The Indian Media Business Springer Science & Business Media

In November 2010, a leaked CAG report on the 2G spectrum policy suggested that Rs. 1.76 lakh crores were lost (described as 'presumptive loss') to the government exchequer because of myopic, even legally questionable policies of the then UPA government in handing out valuable spectrum resource in 2007-08 at the price of 2001.

Not Just an Accountant Edinburgh University Press

ADDA 247 is launching a complete and comprehensive eBook on "English Language". Third Edition eBook is updated as per the latest examination pattern and is suitable for all the Banking & Insurance Examinations such as SBI, RBI, IBPS, LIC, GIC, ESIC & Others. The aim of this eBook is to help students learn and understand the new pattern of recruitment exams which will help them to maximize their scores in the competitive examination. The eBook has been prepared by experienced faculties, subject-matter experts and with the expertise of Adda247 keeping the new pattern and challenges of competitive exams in mind. Exclusive By Adda247 Publications:

Aspirants are well aware of the dynamics of competitive examination, 3-6 months down the preparation line, you can observe a few changes in the pattern and level of questions. In such a scenario. Adda247 Publications has brought a solution to this issue!!! We bring to you an exclusive feature with purchase of this book by Adda247 Publications- you will also get an ebook of the same that you'll be able to access from store.adda247.com or Adda247 App. we've brought access to all the latest updates and study material at your fingertips. Salient Features of the eBook: - 1700+ Multiple Choice Questions with 100% solutions - The book is divided into two sections Grammar

and Verbal ability - Detailed concepts and exercises for each chapter - All the topics of verbal ability are divided into various types with exercises - Previous years' questions from the various topics are given at the end of the chapters - Basic to advance level questions with detailed solutions - Useful for NRA CET as well Course Highlights: - 1700+ Questions with detailed solutions - All the topics of verbal ability are divided into various types - Basic to Advance Level Questions with Detailed Solutions - Includes the Previous Years' Questions asked in Banking & Insurance Exam

How is Your MPA Doing? Taylor & Francis

This book captures how electioneering has changed over the years and how media and marketing have assumed more significance than party manifestos. On 16th May 2014, India witnessed the result of an intense political campaign. Those who were vanquished felt that this was due to the success of a marketing blitzkrieg, which actually pollutes a democracy. Again, for those who supported the eventual winner—the Narendra Modi-led BJP—it was a great victory. Viewed either way, India's national election for the 16th Lok Sabha in 2014 will remain a landmark in the annals of political campaigns. The work is thus a study of campaign strategies, how they are framed, the role of local actors and to what extent individuals rule over ideologies and vice versa. An important contribution to the study of India's 2014 General Elections.

General Awareness for Competitive Exams - SSC/ Banking/ Defence/ Railway/ Insurance IWA Publishing

This book explores the state of community radio, a significant independent media movement that began about two decades ago, in different parts of South Asia. The volume outlines the socioeconomic and historical contexts for understanding the evolution and functioning of community radio in an increasingly globalised media environment. It provides a ring-side view of how various countries in South Asia have formulated policies that enabled the emergence of this third sector of broadcasting (public and private being the other two) through radio, rendering the media ecology in the region more pluralistic and diverse. The chapters in the volume, interspersed by practitioner perspectives, discuss a range of key issues related to community radio: radio policies, NGOisation of community radio, spectrum management and democratisation of technology, disasters/emergencies, gender issues, sustainability, and conflicts. One of the first of its kind, this volume will appeal to scholars and researchers of community media and independent media studies, cultural studies, as well as sociology and social anthropology, and South Asian studies.

Precision Crop Protection - the Challenge and Use of Heterogeneity Disha Publications

The 1990s and 2000s have witnessed a spurt of energetic institution-building in the developing world, as regulatory agencies emerge to take over the role of the executive in key sectors. This rise of the regulatory state of the south is barely noticed both by scholars of regulation and of development, let alone adequately documented and theorized. Yet the consequences for the role of the state and modalities of governance in the south are substantial, as politically charged decisions are handed over to formally technocratic agencies, creating new arenas and forms of contestation over the gains and losses from development decisions. Moreover, this shift in the developing world comes at a time when the regulatory state in the north is under considerable stress from the global financial crisis. Understanding the regulatory state of the south, and particularly forms of accommodation to political pressures, could stimulate a broader conversation around the role of the regulatory state in both north and south. This volume seeks to provoke such a discussion by empirically exploring the emergence of regulatory agencies of a range of developing countries across Asia, Africa, and Latin America. The cases focus on telecommunications, electricity, and water: sectors that have often been at the frontlines of this transition. The central question for the volume is: Are there distinctive features of the regulatory state of the South, shaped by the political-economic context of the global south in the last two decades? To assist in exploring this question, the volume includes brief commentaries on the case studies from a range of disciplines: development economics, law and regulation, development sociology, and comparative politics. Collectively, the volume seeks to shape the contours of a productive inter-disciplinary conversation on the emergence of a significant empirical phenomenon - the rise of regulatory agencies in the developing world - with implications both for the study of regulation and the study of development.
