Sustainable Enterprise:
A Macromarketing
Approach goes beyond

the internal firm strategies of micromarketing and the "four Ps" to take a broader perspective focused on the interconnectedness of markets, marketing, and society. In a globalized society concerned with social and environmental sustainability, this book encourages students to think critically about the opportunities and limitations of marketing, as well as its positive and potentially negative effects. Through the presentation of key research findings and actual company cases, Peterson engages students with questions such as: How do firms use sustainability concepts to navigate their firms in global business today? Why do

markets change? How can firms conduct business profitably with the environment in mind? How can firms conduct business profitably with poor consumers in mind? Based on the premise that firms using holistic marketing strategies are better able to assess risks and identify opportunities, this text explains how firms can approach the marketplace to benefit the company, key stakeholders, and society at large. The result is a one-of-a-kind book that successfully explores macromarketing for sustainable enterprise.

Worker centers are becoming an important element in labor and community organizing and the struggle for fair pay and decent working conditions for low-wage workers, especially immigrants. There are currently more than two hundred worker centers in the

country, and more start every month. Most of these centers struggle as they try to raise funds, maintain stable staff, and build a membership base. For this book, Kim Bobo and Marién Casillas-Pabellón, two women with extensive experience supporting and leading worker centers, have interviewed staff at a broad range of worker centers with the goal of helping others understand how to start and build their organizations. This book is not theoretical, but rather is designed to be a practical workbook for staff, boards, and supporters of worker centers. Geared toward groups that want to build worker centers, this book discusses how to survey the community,

take on an initial campaign, recruit leaders, and raise seed funds. Bobo and Casillas-Pabellón also provide a wealth of advice to help existing centers become stronger and more effective. The Worker Center Handbook compiles best practices from around the country on partnering with labor, enlisting the assistance of faith communities and lawyers, raising funds, developing a serious membership program, integrating civic engagement work, and running major campaigns. The authors urge center leaders to both organize and build strong administrative systems. Full of concrete examples from worker centers around the country,

the handbook is practical and honest about challenges and opportunities.
