This work tells the story of Karl Kerner - the son of Irish and German immigrants - in the 1912 town of Canaan Pennsylvania. Karl is soon to turn 16 and must choose between leaving school for a life in the steel millsThe Tempering (Pitt Golden Triangle Books): Gloria ...Tempering, in metallurgy, process of improving the characteristics of a metal, especially steel, by heating it to a high temperature, though below the melting point, then cooling it, usually in air. The process has the effect of toughening by lessening brittleness and reducing internal stresses.Tempering | metallurgy | BritannicaTempering is a process of heat treating, which is used to increase the toughness of iron-based alloys. Tempering is usually performed after hardening, to reduce some of the excess hardness, and is done by heating the metal to some temperature below the critical point for a certain period of time, then allowing it to cool in still air. The exact temperature determines the amount of hardness removed, and depends on both the specific composition of the alloy and on the desired properties in the finTempering (metallurgy) - WikipediaThe goal of tempering is to bring forth the best combination of mechanical properties in ferrous materials. It is a common step in contemporary steelmaking . However, mild steel and medium carbon steel lack enough carbon to alter their crystalline makeup, so they cannot be toughened and tempered.What Is the Metallurgical Term Known as Tempering?Tempering is a term used in cooking when an ingredient—or two—needs to be stabilized, meaning its characteristics remain the same and aren't altered in any way. We see this technique used when combining ingredients that are each at completely different temperatures.A Guide to the Tempering Process in CookingAbout The Temper The Temper explores life through the lens of sobriety, addiction, and recovery. We acknowledge that whatever we struggle with has fundamentally changed the way we exist in the world. That's often alcohol, but is just as likely to be food, smoking, social media, overspending—all the things we do to numb ourselves.About The Temper | The TemperTo harden or strengthen (metal or glass) by application of heat or by heating and cooling.
