The best way to learn history is to visualize it! Since 1998, Josh MacPhee has commissioned and produced over one hundred posters by over eighty artists that pay tribute to revolution, racial justice, women's rights, queer liberation, labor struggles, and creative activism and organizing. *Celebrate People's History!* presents these essential moments—acts of resistance and great events in an often hidden history of human and civil rights struggles—as a visual tour through decades and across continents, from the perspective of some of the most interesting and socially engaged artists working today. *Celebrate People's History* includes artwork by Cristy Road, Swoon, Nicole Schulman, Christopher Cardinale, Sabrina Jones, Eric Drooker, Klutch, Carrie Moyer, Laura Whitehorn, Dan Berger, Ricardo Levins Morales, Chris Stain, and more.

Was performance important to Deleuze? Is Deleuze important to performance; to its practical, as well as theoretical, research? What are the implications of Deleuze's philosophy of difference, process and becoming, for Performance

Studies, a field in which many continue to privilege the notion of performance as representation, as anchored by its imitation of an identity: 'the world', 'the play', 'the self'? Deleuze and Performance is a collection of new essays dedicated to Deleuze's writing on theatre and to the productivity of his philosophy for (re)thinking performance. This book provides rigorous analyses of Deleuze's writings on theatre practitioners such as Artaud, Beckett and Carmelo Bene, as well as offering innovative readings of historical and contemporary performance including performance art, dance, new media performance, theatre and opera, which use Deleuze's concepts in exciting new ways. Can philosophy follow Deleuze in overcoming the antitheatrical tradition embedded in its history, perhaps even reconsidering what it means to think in the light of the embodied insights of performance's practitioners? Experts from the fields of Performance Studies and Deleuze Studies come together in this volume and strive to examine these and other issues in a manner that will be challenging, yet accessible to students and established scholars alike.

Jurandy Valença Seven Stories Press Works of art such as paintings with words on them or poems shaped as images communicate to the viewer by means of more than one medium. Here is presented a particular group of hybrid art works from the early twentieth century, to discover in what way words and images can function together to create meaning. The four central artists considered in this study investigate word/image forms in their work. F.T. Marinetti invented *parole in libertà*, among other ideas, to free language from syntactic connections. Umberto Boccioni experimented with newspaper

clippings on the canvas from 1912-1915, and these collages constitute an important exploration into word/image forms. André Breton's collection of poems *Clair de terre* (1923) contains several typographical variations for iconographic effect. René Magritte explored the relationship between words and images, juxtaposing signifiers to contradictory signifieds on the canvas. A final chapter introduces media other than poetry and painting on which words and images appear. Posters, the theater, and the relatively new medium of cinema foreground words and images constantly. This volume will be of interest to scholars of twentieth-century French or Italian literature or painting, and to scholars of word and image studies.

Method, Model and Matter John Wiley & Sons

The second edition of this widely used text has been carefully rewritten to ensure that it is up-to-date with cutting-edge debates, evidence, and policy changes. Since the book's initial publication, there has been an expansion of interest in disability in the social sciences, and disability has come to play an increasingly prominent role in political debates. The new edition takes account of all these developments, and also gives greater emphasis to global issues in order to reflect the increasing and intensifying interdependence of nation states in the twenty-first century. The authors examine, amongst other issues, the changing nature of the

concept of disability, key debates in the sociology of health and illness, the politicisation of disability, social policy, and the cultural and media representation of disability. As well as providing an excellent overview of the literature in the area, the book develops an understanding of disability that has implications for both sociology and society. The second edition of *Exploring Disability* will be indispensable for students across the social sciences, and in health and social care, who really want to understand the issues facing disabled people and disabling societies. **YOU WILL BE MY FRIEND!** Macmillan

Over recent years there has been an unprecedented upsurge of interest in the general area of disability and disability studies amongst academics and researchers throughout the world. This has generated an increasingly expansive literature, from a variety of perspectives, including cultural studies, development studies, geography, history, philosophy, social policy, social psychology and sociology. Perhaps inevitably, given this heightened interest, a number of important challenges and debates have emerged which raise many significant questions for all those interested in this newly emergent and increasingly important field. *Disability Studies Today* provides an invaluable introduction to and an overview of these concerns and controversies. Although the field is increasingly interdisciplinary in nature, the emphasis is primarily a sociological one since sociology continues to play a central role in the development of disability studies. Whilst the focus is primarily on theoretical innovation and advancement, the arguments presented in this book have important political and policy implications for both disabled and non-disabled people. Moreover, since

disability studies, like ethnic, women's and gay and lesbian studies, has developed from a position of engagement and activism rather than one of detachment, the articles in this volume maintain this tradition. The book contains contributions from established figures, as well as newcomers to the field. Topics covered include: the history of the development of disability studies in Britain and America, key ideas, issues and thinkers, the role of the body, divisions and hierarchies, history, power and identity, work, politics and the disabled peoples' movement, globalization, human rights, research and the role of the academy. This book will prove invaluable to scholars, researchers, students and policy makers and, indeed, all those involved in this increasingly important area of social enquiry.

The chronicle of a family's first year alone in Alaskan wilderness, here is a poetic exploration into what we value in life. In 1992 Jean Aspen took her husband, Tom, and their young son to live in Alaska's interior mountains where they built a cabin from logs, hunted for food, and let the vast beauty of the Arctic close around them. Jean had faced Alaska's wilderness alone before in a life-altering experience she shared in *Arctic Daughter*. Cut off from the rest of the world for more than a year, now her family would discover strength and beauty in their daily lives. They candidly filmed themselves and later produced a companion documentary, *ARCTIC SON: Fulfilling the Dream*, which shows on PBS stations across the nation. From an encounter with a grizzly bear at arm's length to a challenging six-hundred-mile river passage back to civilization, *Arctic Son* chronicles fourteen remarkable

months alone in the Brooks Range. At once a portrait of courage, a lyrical odyssey, and authentic adventure, this is a family's extraordinary journey into America's last frontier.

During the years 1627 and 1628, Charles I of England purchased the cream of the Gonzaga art collection, belonging to the dukes of Mantua, in what would become the greatest art deal of the 17th century. Among the treasures sold were ancient statues and stunning paintings by Titian, Raphael, Correggio, and Rubens. This book examines this fascinating and significant art sale from the perspective of the man who orchestrated it--Daniel Nijs (1572-1647), a Flemish merchant, collector, and dealer living in Venice. Christina M. Anderson brings Nijs to life, asserting that he was more than the avaricious and unscrupulous trader that most modern writers and scholars deem him to be. Anderson's evocative text describes Nijs's unique talent as a dealer, rooted in superior commercial skills, connections to artistic and diplomatic circles, and a deep love of art. The narrative reveals that Nijs was ultimately the pivotal figure involved with the Gonzaga sale, though also--when he later fell into bankruptcy and dishonor due to a deal gone awry--the most tragic.

States of Grace offers a novel approach to the study of Brazilian culture through the lens of utopianism. Patrícia I. Vieira explores religious and political writings, journalistic texts, sociological studies, and literary works that portray Brazil as a utopian "land of the future," where dreams of a coming messianic age and of social and political emancipation would come true. The book discusses

crucial utopian moments such as the theological-political utopia proposed by Jesuit Priest Antônio Vieira; matriarchal utopias, like the egalitarian society of the Amazons; work-free utopias that abolished the boundaries separating toil and play; and ecological utopias, where humans and nonhumans coexist harmoniously. The uniqueness of the book's approach lies in rethinking the link between messianic and utopian texts, as well as the alliances forged between progressive religious, socioeconomic, political, and ecological ideas.

- Corrects the many mistranslations, copyist mistakes, and errors introduced from other editions, drawing on new research and access to Agrippa's source texts
- Restores all of Agrippa's original illustrations
- Presents a nearly complete bibliography of Agrippa's primary sources

One of the most important texts in the Western magical tradition for nearly 500 years, Heinrich Cornelius Agrippa's 1533 work *Three Books of Occult Philosophy* collates a multitude of sources from the Classical, Medieval, and Renaissance periods and organizes them into a coherent explanation of the magical world. Divided into three parts--the natural world, the celestial world, and the divine world--the book systematically explains the philosophy, logic, and methods of magic and astrology and how they work, offering numerous examples, diagrams, techniques, and analogies. Agrippa's seminal masterpiece provided the basis for 19th-century magical orders such as the Golden Dawn and has been a primary source for countless books on magical uses of stones, herbs, incense, and astrology. Additionally, Agrippa's

many lists and diagrams, especially the planetary seals and magic squares, have proven invaluable to magicians since the 16th century. Yet, up until now, all English editions of Agrippa's Three Books were based on the same flawed 1651 translation from the mysterious "J.F." In this new translation from the original 1533 Latin edition, Eric Purdue corrects the many mistranslations, copyist mistakes, and errors introduced from other editions, as well as restores all of Agrippa's original illustrations. He notates every correction from earlier editions and offers commentary to rectify the original translator's mistranslations. Drawing on major developments in the research of older magical and astrological texts since the 1990s, Purdue also presents a nearly complete bibliography of Agrippa's primary sources, revealing how Agrippa was not writing from missing or secret texts but was a mainstream scholar of his day. Presenting the first new English translation of Three Books of Occult Philosophy in more than 350 years, this three-volume hardcover boxed set repairs the gaps in knowledge pervasive in the original translation as well as restores the magical spirit of Agrippa's masterpiece, allowing us to hear Agrippa speak again.

DIVDIV This fascinating book explores the evolution of religious dualism, the doctrine that man and cosmos are constant battlegrounds between forces of good and evil. It traces this evolution from late Egyptian religion and the revelations of Zoroaster and the Orphics in antiquity through the Dead Sea Scrolls, the Mithraic Mysteries, and the great Gnostic teachers to its revival in medieval Europe with the suppression of

the Bogomils and the Cathars, heirs to the age-long teachings of dualism. Integrating political, cultural, and religious history, Yuri Stoyanov illuminates the dualist religious systems, recreating in vivid detail the diverse worlds of their striking ideas and beliefs, their convoluted mythologies and symbolism. Reviews of an earlier edition: "A book of prime importance for anyone interested in the history of religious dualism. The author's knowledge of relevant original sources is remarkable; and he has distilled them into a convincing and very readable whole."—Sir Steven Runciman "The most fascinating historical detective story since Steven Runciman's Sicilian Vespers."—Colin Wilson "A splendid account of the decline of the dualist tradition in the East . . . both strong and accessible. . . . The most readable account of Balkan heresy ever."—Jeffrey B. Russell, *Journal of Religion* "Well-written, fact-filled, and fascinating . . . has in it the making of a classic." —Harry T. Norris, *Bulletin of SOAS/div/div*

Beginnings in Ritual Studies lays the groundwork for the interdisciplinary study of ritual by broadening the conception of it and articulating its connections to a wide range of cultural activities. Accessible to scholars and students, Beginnings addresses such fundamental issues as definitions, types, and theories of ritual. The volume integrates field research and theory in considering ritual's relation to religious, civil, medical, and theatrical dimensions of culture. The first and second editions garnered widespread praise from the scholarly community and became a standard work in the burgeoning field of ritual studies. In this third edition, Grimes adds a new preface and revises

the descriptive and theoretical essays that form the core of the volume.

There is nothing new about evil; it has been with us since time immemorial. But there is something new about the kind of evil that characterizes our contemporary liquid-modern world. The evil that characterized earlier forms of solid modernity was concentrated in the hands of states claiming monopolies on the means of coercion and using the means at their disposal to pursue their ends ends that were at times horrifically brutal and barbaric. In our contemporary liquid-modern societies, by contrast, evil has become altogether more pervasive and at the same time less visible. Liquid evil hides in the seams of the canvass woven daily by the liquid-modern mode of human interaction and commerce, conceals itself in the very tissue of human cohabitation and in the course of its routine and day-to-day reproduction. Evil lurks in the countless black holes of a thoroughly deregulated and privatized social space in which cutthroat competition and mutual estrangement have replaced cooperation and solidarity, while forceful individualization erodes the adhesive power of inter-human bonds. In its present form evil is hard to spot, unmask and resist. It seduces us by its ordinariness and then jumps out without warning, striking seemingly at random. The result is a social world that is comparable to a minefield: we know it is full of explosives and that explosions will happen sooner or later but we have no idea when and where they will occur. In this new book, the sequel to their acclaimed work *Moral Blindness* Zygmunt Bauman and Leonidas Donskis guide the reader through this new terrain in which evil

has become both more ordinary and more insidious, threatening to strip humanity of its dreams, alternative projects and powers of dissent at the very time when they are needed most. *Brazil Imagined* Little, Brown Books for Young Readers

This collection of essays deals with three clusters of problems in the philosophy of science: scientific method, conceptual models, and ontological underpinnings. The disjointedness of topics is more apparent than real, since the whole book is concerned with the scientific knowledge of fact. Now, the aim of factual knowledge is the conceptual grasping of being, and this understanding is provided by theories of whatever there may be. If the theories are testable and specific, such as a theory of a particular chemical reaction, then they are often called 'theoretical models' and clas sed as scientific. If the theories are extremely general, like a theory of syn thesis and dissociation without any reference to a particular
