SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step

through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It

incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects

of the SAP FICO certification syllabus—SAP’s view of the module’s key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

II (this book) covers: Configuring SAP Financial Accounting - Vol. I Case Study (Project Dolphin & Project Starfish) Accounts Receivable and Accounts Payable Contract Accounts Receivable and Payable Bank Accounting Asset Accounting In Vol. I of the title we have covered: SAP HANA SAP S/4HANA SAP S/4HANA Finance Case Study (Project Dolphin & Project Oyster) Enterprise Structure FI Global Settings I (Fields, Ledgers, Fiscal Year, Posting Period, Parallel Accounting, Integration of SAP CO with SAP FI, and Company Code Global Parameters) FI Global Settings II (Documents, Inflation Accounting and Correspondence) FI Global Settings III (Taxes including Extended Withholding Tax) General Ledger Accounting To give you an idea of what has been covered in 'Configuring SAP Financial Accounting - Vol. I', we have captured the details, in this book, in a Chapter-wise summary of that coverage with configuration highlights that has been discussed in each of those Chapters, from 1 to 9. The book covers Accounts Receivable (FI-A/R) and Accounts Payable (FI-A/P), in detail. It covers customer and vendor accounts, business transactions

associated with both FI-A/R and FI-A/P and the information system. In business transactions, you will see topics like incoming invoices, release for payment, payments (outgoing & incoming, manual and automatic), dunning, open item clearing, down payment processing, adjustment posting, interest calculation and closing operations. In Contracts Accounts Receivable and Payable (SAP FICA), with a separate case study (Project Starfish), we discuss the functionality and the configuration required for setting up of SAP FICA for a business. In Bank Accounting (FI-BL), you will learn about bank master data (bank directory, house bank, business partner's bank, bank distribution etc.), bank chains, payment transactions including manual & electronic bank statement, lockbox processing, cash journal and online payments. The book covers Asset Accounting (FI-AA) in great detail. It covers the organizational structure, structuring fixed assets in FI-AA (including special forms of assets, asset classes etc.), integration of FI-AA with other SAP components including SAP FI-G/L, general & special valuation, depreciation, master data, transactions

(like acquisitions, retirements, transfers, capitalization of assets under construction etc.), FI-AA information system, asset data transfer, preparations for going live and overview for experts. As with my other books on SAP, this book also follows a case-study approach to make your learning easy. Efforts have been taken, throughout the book, to guide you step-by-step in understanding how to configure your SAP system, to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of additional information, provided across the Chapters and the Sections, to help you understand a topic or a configuration setting or a concept better. The entire content of the book, vide various Chapters, has been presented as in SAP IMG (Implementation Guide), for easy comprehension. You will come across with appropriate menu paths and Transactions, to help you to navigate the various activities. In all, you can use this book as a desktop-reference for configuring SAP FI. As the Chapters have

been progressively elaborated, you will certainly find this as informative and easy to comprehend.

Most of the tutorials that exist in online do not explain the concepts. 7. It guides you with End User Training in FICO. POST IMPLEMENTATION SAMPLE Control Objective Company codes employed in the system should be set to productive Control Description. In case of post go-live actions, there are some configurations that must be turned on to replicate that the SAP system is active for

use and to protect the data that has been transferred to the production system. In a normal SAP recommends, the functioning company codes should be marked as productive, as soon as the implementation happens. This configuration specifies and endorses the active status of the company code and by default would limit the unsanctioned changes, comprising data deletion in the production server. Risk Here the risk is mistaken deletion of master & transactional data, which will unfavorably influence the system reliability. Test Steps Here we check the global company code configuration to confirm if the appropriate company codes are marked as Productive. For This Follow Step 15.1.1. We can see that Company code B100 is not Productive as such to make it productive follow the steps in 15.1.2.
