Traditionalist Christians who oppose same-sex marriage and other cultural developments in the United States wonder why they are being forced to bracket their beliefs in order to participate in public life. This situation is not new, says Steven D. Smith: Christians two thousand years ago faced very similar challenges. Picking up poet T. S. Eliot's World War II-era thesis that the future of the West would be determined by a contest between Christianity and "modern paganism," Smith argues in this book that today's culture wars can be seen as a reprise of the basic antagonism that pitted pagans against Christians in the Roman Empire. Smith's Pagans and Christians in the City looks at that historical conflict and explores how the same competing ideas continue to clash today. All of us, Smith shows, have much to learn by observing how patterns from ancient history are reemerging in today's most controversial issues.

Penguin UK

'A memorable, oddly beautiful book' Wall Street Journal 'A marvellous glimpse of the Japan that rarely peeks through the country's public image' Washington Post One sunny spring morning in the 1970s, an unlikely Englishman set out on a pilgrimage that would take him across the entire length of Japan. Travelling only along small back roads, Alan Booth travelled on foot from Soya, the country's northernmost tip, to Sata in the extreme south, traversing three islands and some 2,000 miles of rural Japan. His mission: 'to come to grips with the business of living here,' after having spent most of his adult life in Tokyo. The Roads to Sata is a wry, witty, inimitable account of that prodigious trek, vividly revealing the reality of life in off-the-tourist-track Japan. Journeying alongside Booth, we encounter the wide variety of people who inhabit the Japanese countryside - from fishermen and soldiers, to bar hostesses and school teachers, to hermits, drunks and the homeless. We glimpse vast stretches of coastline and rambling townscapes, mountains and motorways; watch baseball games and sunrises; sample trout and Kilimanjaro beer, hear folklore, poems and smutty jokes. Throughout, we enjoy the wit and insight of a uniquely perceptive guide, and more importantly, discover a new face of an often-misunderstood nation.

Since 1990 public political criticism has evolved into a prominent feature of Vietnam's political landscape. So argues Benedict Kerkvliet in his analysis of Communist Party-ruled Vietnam.

Speaking Out in Vietnam assesses the rise and diversity of these public displays of disagreement, showing that it has morphed from family whispers to large-scale use of electronic media. In discussing how such criticism has become widespread over the last three decades, Kerkvliet focuses on four clusters of critics: factory workers demanding better wages and living standards; villagers demonstrating and petitioning against corruption and land confiscations; citizens opposing China's encroachment into Vietnam and criticizing China-Vietnam relations; and dissidents objecting to the party-state regime and pressing for democratization. He finds that public political criticism ranges from lambasting corrupt authorities to condemning repression of bloggers to protesting about working conditions. Speaking Out in Vietnam shows that although we may think that the party-state represses public criticism, in fact Vietnamese authorities often tolerate and respond positively to such public and open protests.

EnginesPerformance, Fuel Economy and Emissions

This book presents the papers from the Internal Combustion

Engines: Performance, fuel economy and emissions held in

London, UK. This popular international conference from the

Institution of Mechanical Engineers provides a forum for IC engine

experts looking closely at developments for personal transport

applications, though many of the drivers of change apply to light

and heavy duty, on and off highway, transport and other sectors.

These are exciting times to be working in the IC engine field. With

the move towards downsizing, advances in FIE and alternative

fuels, new engine architectures and the introduction of Euro 6 in

2014, there are plenty of challenges. The aim remains to reduce

both CO2 emissions and the dependence on oil-derivate fossil

fuels whilst meeting the future, more stringent constraints on

gaseous and particulate material emissions as set by EU, North

American and Japanese regulations. How will technology

developments enhance performance and shape the next

generation of designs? The book introduces compression and

internal combustion engines' applications, followed by chapters

on the challenges faced by alternative fuels and fuel delivery. The

remaining chapters explore current improvements in combustion,

pollution prevention strategies and data comparisons. presents

the latest requirements and challenges for personal transport

applications gives an insight into the technical advances and

research going on in the IC Engines field provides the latest

developments in compression and spark ignition engines for light

and heavy-duty applications, automotive and other markets

### **Converters, Applications, and Design** Simon and Schuster

Vanderbilt: the very name signifies wealth. The family patriarch,

"the Commodore," built up a fortune that made him the world's

richest man by 1877. Yet, less than fifty years after the

Commodore's death, one of his direct descendants died

penniless, and no Vanderbilt was counted among the world's

richest people. Fortune's Children tells the dramatic story of all

the amazingly colorful spenders who dissipated such a vast

inheritance.

### Inside the Rise and Fall of a Global Automotive Empire

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Although not quite the stout heavy-duty performer as its big brother, the Turbo 400, the Turbo 350 transmission is a fine, durable, capable, and when modified, stout performer in its own right. Millions of GM cars and trucks have been built with Turbo 350 automatic transmissions. There always comes a time when the old transmission shows signs of wear. At some point, even the best transmissions need to be rebuilt. In *GM Turbo 350 Transmissions: How to Rebuild & Modify*, respected automotive technical author Cliff Ruggles guides you through the complex rebuild procedure of GM's popular rear-wheel-drive automatic transmission. With his proven style, Ruggles goes through the step-by-step rebuild and performance upgrade procedures in a series of full-color photos. He includes instruction on removal and installation, tear-down procedures, parts inspection and replacement, as well as performance mods and shift kit installation. Time-saving tips are part of every buildup as well. Automatic transmissions are a mystery to most. Even if you end up deciding to have a professional take care of your transmission repair and performance needs, the information contained in this book is crucial to understanding how the power gets from the engine to the road. Add a copy of *GM Turbo 350: How to Rebuild & Modify* to your automotive library today.

The Mazda Miata is one of the most popular sports cars on the road today. In production for more than 20 years, the Miata's popularity has grown, and the number of aftermarket components available to the Miata enthusiast has grown, too. This immense selection of parts has made it difficult for many would-be modifiers to choose the proper combination that will help them reach the goals they have set for their two-seaters. Author and Miata expert Keith Tanner has been modifying, repairing, building, and racing Miatas for years, and he will guide you through how to best modify your car to suit your needs, starting with an explanation on how everything works and how the various parts will interact. You'll not only learn what upgrades will help you reach your goals, but also how to adjust or modify what you have to make your car work at its best. From autocross to cross-country touring, the Miata can do it all. Keith Tanner tells

you how to make it happen!

Red Schuhart is a stalker, one of those young rebels who are compelled, in spite of extreme danger, to venture illegally into the Zone to collect the mysterious artifacts that the alien visitors left scattered around. His life is dominated by the place and the thriving black market in the alien products. But when he and his friend Kirill go into the Zone together to pick up a "full empty," something goes wrong. And the news he gets from his girlfriend upon his return makes it inevitable that he'll keep going back to the Zone, again and again, until he finds the answer to all his problems. First published in 1972, "Roadside Picnic" is still widely regarded as one of the greatest science fiction novels, despite the fact that it has been out of print in the United States for almost thirty years. This authoritative new translation corrects many errors and omissions and has been supplemented with a foreword by Ursula K. Le Guin and a new afterword by Boris Strugatsky explaining the strange history of the novel's publication in Russia.

Harper Collins  
The book deals with the fundamentals, theoretical bases, and design methodologies of conventional internal combustion engine (ICE) vehicles, electric vehicles (EVs), hybrid electric vehicles (HEVs), and fuel cell vehicles (FCVs). The design methodology is described in mathematical terms, step-by-step, and the topics are approached from the overall drive train system, not just individual components. Furthermore, in explaining the design methodology of each drive train, design examples are presented with simulation results.

Academic Press  
*Postharvest Handling: A Systems Approach* introduces a new concept in the handling of fresh fruits and vegetable. Traditional treatments have been either physiologically based with an emphasis on biological tissue or technologically based with an emphasis on storage and handling. This book integrates all processes from production practices through consumer consumption with an emphasis on understanding market forces and providing fresh product that meets consumer expectations. *Postharvest* physiologists and technologists across the disciplines of agricultural economics, agricultural engineering, food science and horticulture along with handlers of minimally-processed products within the fresh produce fruit and vegetable processing industries will find this to be an invaluable source of information. Uses a systems approach that provides a unique perspective on the handling of fresh fruits and vegetables Designed with the applied perspective to complement the more basic perspectives provided in other treatments Provides the integrated, interdisciplinary perspective needed in research to improve the quality of fresh and minimally processed products Emphasizes that the design of handling systems should be market-driven rather than concentrating on narrow specifics

### *Pagans and Christians in the City*

CarTech Inc  
The Viper stunned Americans by showing that Dodge, whose cars were all front-wheel drive (and mostly powered by four-cylinder engines), could make a raw, brutal, V-10-powered car that could run with the best. Team Viper went a step further at Le Mans, proving that an American car could handle turns, too - so well that it won its class, repeatedly, at a fraction of the cost of the cars it beat. *Dodge Viper* covers the transition from a concept to a rough and brutal rocket to a world-class supercar, and includes

every generation. The story also tells of the rough times when the entire Viper business could have been sold to the highest bidder, and considers alternative paths the 2013-17 Viper might have taken. This is not just a gushing tribute to the Dodge Viper, the author provides an objective view of the full story, using business, historical, and enthusiast perspectives. The book looks at the business case for each generation, the development stories and their outcomes, and describes some of the issues owners may have to watch out for, particularly in the early models.

*towards 2030 Made in America*

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Woodhead Publishing

Two years ago, Reed Jackson betrayed Calliope Thorne and broke her heart. So she stole his most prized possession – a white mustang – and drove it into the lake for revenge. Now, Callie is stuck at a reform school while Reed is off at college, living his life without repercussions. Until he comes back. With him comes back all the feelings that Callie has been trying to bury: anger and heartbreak. But most of all, desire. At the sight of his beautiful but lying lips and his gunmetal gray eyes that still taunt and smolder when he looks at her. Whatever though. It's not as if Callie is ever going to fall for her ex-boyfriend again. Or let him corner her in a bar one night and touch her, kiss her... Neither is she going to kiss him back. Or worse, sleep with him. Because that would make her naïve and foolish. Oh, and also pregnant. And there's no way Callie is ever going to get pregnant at eighteen and with Reed's baby, no less. The guy she hates. The guy who taught her all about heartbreak. Who might look like a gorgeous hero but really is the villain of her story. NOTE: A standalone novel set in the world of St. Mary's and INCLUDES the prequel, *The Wild Mustang & The Dancing Fairy* KEYWORDS: Sports romance, forbidden romance, Good girl bad boy romance,

bad boy romance, alpha male romance, enemies to lovers romance, college romance, bully romance, angst romance, opposites attract romance, high school romance, second chance romance, accidental pregnancy romance

There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10–20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

Carlos Ghosn and the Culture Wars That Upended an Auto Empire Harvard Business Press

This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagen. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.
