Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeshooled graduates. Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond.

First Published in 1985, Examinations presents a balanced overview and commentary on all the main aspects of public examinations. The key themes are examinations and their context (historical, political, social, and educational); functions of examination (how they work); equity and fairness of the process; and future of public examinations. Recurring issues in the book are the tension between the need for common national standards and the need for diverse individuality and the conflict between competitive functions of examinations as instruments of selection and their descriptive function as reports on standards of performance. The author argues that the main aspects of examinations are not given a prominent place in the training of teachers though public examinations have widespread impact on society. This book will be an essential read for scholars and researchers of education, higher education and also for administrators and policy makers.

The first book to explore the development of Singapore's much-talked-about education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of politics, economy and society. The study covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore.

`This excellent book is long overdue. It will be of benefit to anyone with an interest in general practitioner education, and anyone considering applying for the post of course organiser should read the opening chapters to prepare them for interview. This is a thoughtful book, written in a clear and witty style and it deserves a wide readership. It provides an educational framework on which general practitioner teaching can be based.' British Journal of General Practice `This book is excellent because it deals not only with the `nuts and bolts' of being a course organizer, but also addresses the difficulties, frustrations and emotions involved in a witty and entertaining manner. Anyone with an interest in postgraduate medical education, at any level, would benefit from reading this book.' Update `Paddy McEvoy's book has rapidly and deservedly established itself as invaluable to anyone

responsible for any form of postgraduate medical education.' Education for General Practice ``As well as updating and revising the book throughout. Paddy McEvoy has managed to include sections about the wider context of training without making the book overly long or losing any of the delightful flavour of the first edition. I have no doubt that you will find it both useful and enjoyable."

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: \*providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and \*presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.

The Civil Service Commission was created in 1855 and became the key institution in the development of the British civil service. Its work was primarily the recruitment of civil servants by fair methods, treating all qualified applicants equally, and using open competitions wherever practicable. It was held in high esteem not only in the United Kingdom but also in the many other countries throughout the world which, in many places, modelled their methods of public service recruitment on its pioneering work. It continued until 1991, when most of its work was devolved to over 3,000 government departments and executive agencies. This book describes the gestation, growth, development and eventual demise of the Commission and includes a number of in-depth case studies. Using source material such as official files, many only recently available for research, together with other records and evidence to official committees, the book provides a biography of an institution. It shows how the department was formally organised and there is a particular focus on how it actually worked on a day-to-day basis. With three in-depth chapters on the chronological development of the Commission and seven case studies of themes or issues that reveal methods of work and influences on its activities, this book uses file-based research more extensively than any other history of a British government department. The Civil Service Commission, 1855-1991 reveals insights into civil service recruitment and makes a major original contribution to our understanding of the practice and politics of public administration.

In some hands, history can be an inspirational and rewarding subject, yet in others it can seem dry and of little relevance. The aim of this textbook is to enable student teachers to learn to teach history in a way that pupils will find interesting, enjoyable and purposeful. It incorporates a wide range of ideas about the teaching of history with practical suggestions for classroom practice. This is the third edition of a textbook that has established itself as the leading text for student teachers of history. It has been thoroughly updated, with a revised chapter on the use of ICT in history teaching and major new sections in the areas of inclusion, resources, assessment and professional development. It provides an array of references and materials that give a sound theoretical foundation for the teaching of history, including weblinks to further resources. A range of tasks enable students to put their learning into practice in the classroom. The book also provides reference and access to a wide range of recent and relevant research in the field of history education, which will be of use to student teachers pursuing courses that have a Masters Level component. In all, it is an invaluable resource for student and beginning history teachers.
