With nightmares of past deeds threatening his sanity, Martin Palmer - hero of "A Warrior's Code" - wants out of the mercenary soldier business. The problem: he was good at it. The question: will the business let him go? His solution: try any damned thing that does not require pointing guns at people. Keeping his profile obscured he ends up in Nigeria where, more or less on a whim, he opens a motor-repair business. Chance brings him together with a full-

blooded Kenyan tribesman, Kowato Segani. The pair hit it off from the start, like long lost brothers, and Palmer hires him to help in the repair business. Neither of them know too much about motor repair and, understandably, the business as such does not exactly prosper. Of the two of them, only Segani really wants to make a go of it. But, for Palmer at least, it's a lot of fun, and he's sleeping nights. Then, out of the blue, up pops a man who bears all the hallmarks of a

mercenary recruiter. The offer is in mercenary numbers and the job is related to the mercenary business. Apparently, something Palmer stole many years before, had already been stolen...and they want it back!

Service robots are those that work closely with humans to help them with their lives. The first FSR was held in Canberra, Australia, in 1997. Since that first meeting, FSR has been held roughly every two years, cycling through Asia, Americas, Europe.

 Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys – half way round the world, from the English Channel to

Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates,

they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them)

ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film. Leyland Rover is an
account of Ken Ryeland's

tours of the Far East as a service engineer for British Leyland during the early 1970s. After serving an engineering apprenticeship and several years working in Nigeria, Ryeland and his family returned to the UK, where he joined the Rover Company at Solihull. Later he transferred to Rover/Triumph's overseas service department; his job was to see that Leyland's Far East distributors conformed to all operational and engineering standards.

The culture and different working practices in the various countries presented many challenges for Ryeland, but he managed to survive being held hostage by the military in Malaysia; interrogated by police in Afghanistan; hospitalised in Thailand and summoned to the palace by the king in Nepal.
