Publ.

This textbook covers the full range of topics and issues normally included in a course on economic growth and development. Both mainstream economic perspectives as well as the multi-paradigmatic, inter-disciplinary, and dynamic-evolutionary perspectives from heterodox economics are detailed. Economic development is viewed in terms of the long-run well-being of humanity, social stability, environmental sustainability, and just distribution of economic gains, not simply as the growth of GDP. Furthermore, this textbook explicitly recognizes the complexity of economic development by linking economic activity to our broader social and natural environments. The textbook's unique feature is its focus on the natural environment. Both the

historical effects of economic development on the environment and the environmental constraints on future economic development are thoroughly discussed in two chapters on environmental issues and policies. In fact, because economic development is defined in terms of economic, social, and environmental sustainability, the natural environment is included in discussions throughout the book. The textbook is inter-disciplinary: knowledge from fields such as sociology, psychology, political science, economic history, and ecology is called on to enhance the economic analysis. A thorough historical account of the development of the principal paradigms of economic development is also included, and the important issues of institutional development and cultural

change merit their own chapters. Two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic, social, and ecological systems. Also, the important relationship between economic development and globalization is presented in three chapters on international trade, international finance and investment, and immigration from both orthodox and heterodox perspectives. Theatre of Nepal and the People Who Make It M.D. Publications Pvt. Ltd.

Few people know that nearly one hundred native languages once spoken in what is now California are near extinction, or that most of Australia's 250 aboriginal languages have vanished.

In fact, at least half of the world's languages may die out in the next century. Daniel Nettle and Suzanne Romaine assert that this trend is far more than simply disturbing. Making explicit the link between language survival and environmental issues, they argue that the extinction of languages is part of the larger picture of near-total collapse of the worldwide ecosystem. Indeed, the authors contend that the struggle to preserve precious environmental resources-such as the rainforest-cannot be separated from the struggle to maintain diverse cultures, and that the causes of language death, like that of ecological destruction, lie at the intersection of ecology and politics. In addition to defending the world's endangered languages, the authors also

pay homage to the last speakers of dying tongues, such as Red Thundercloud, a Native American in South Carolina; Ned Mandrell, with whom the Manx language passed away in 1974; and Arthur Bennett, an Australian who was the last person to know more than a few words of Mbabaram. In our languages lies the accumulated knowledge of humanity. Indeed, each language is a unique window on experience. *Vanishing Voices* is a call to preserve this resource, before it is too late.

Years Cambridge University Press

As cities all over the world have urbanized rapidly after the industrial revolution, most cities have confronted environmental problems such as poor air and water quality, high levels of traffic

congestion and ambient noise, poor-quality built environment, derelict land, greenhouse gas emissions, urban sprawl, generation of waste and waste-water. In particular, cities in the developing world face problems related to the living conditions in which the urban population lives. In the context of urban cities in the developing world, it can be narrowed to the quality of life of living population in the cities. Needless to say that Asia has the largest population, as well as urban population at risk. This book brings the lessons from innovative urban risk management approaches in Asian cities, drawing the lessons from seven Asian countries. The authors of the chapters consists of wider spectrum of stakeholders: from academicians to policy makers to NGO practitioners.

Nepal - India Open Borders Cambridge University Press

The mysteries of the fifth Canto of the Srimad Bhagavatam have long puzzled students of Vedic cosmography and astronomy. Confronted with a description of the universe that seems much at variance with the information provided by our senses and standard astronomical calculations, foreign observers and even Indian commentators from the middle ages up to the present have concluded that the Bhagavatam`s account elaborated in other Puranas must be mythological. On the other hand the same persons have been much impressed with vedic astronomical treatises the jyotisastras which provide remarkably accurate measurements of the solar system.

An NRC ad hoc committee analyzed the current status and future development potential of Armenia's science and technology base, including human and infrastructural resources and research and educational capabilities. The committee identified those fields and institutions offering promising opportunities for contributing to economic and social development, and particularly institutions having unique and important capabilities, worthy of support from international financial

institutions, private investment sources, and the Armenian and U.S. governments. The scope of the study included both pure and applied research as well as education in science-related fields. The committee's report addresses the existing capacity of state and private research institutions, higher education capabilities and trends, scientific funding sources, innovative investment models, relevant success stories, factors hindering development of the science sector, potential domestic Armenian customers for scientific results and products, and opportunities for regional scientific collaboration. An Armenian language version of the report is also available.

A portrait in observance of the first Everest ascent's fiftieth anniversary follows the life of Tibetan-born Sherpa Tenzing Norgay, from his life as an illiterate yak herder to his relationship with Sir Edmund Hillary and his accomplishments as a mountaineer.

[A Comprehensive History of Tea from Prehistoric Times to the Present Day](#)
Mometrix Media Llc

Being a good parent is a skill that is acquired over time, one that requires constantly adapting to the rapidly changing times. In today's world, where academics, extra-curricular activities and distractions in the shape of numerous gadgets make heavy demands on children's time, it is tough to communicate with them. Dr Anupam Sibal, through his experience as father,

paediatrician and Group Medical Director of Apollo Hospitals Group, outlines his approach to effectively getting through to children and mastering the art of parenthood. Focusing on the different values and qualities that make a good person, Dr Sibal has a hands-on approach to instil each of these in a child. Exploring the crux of parenting, this book asks and answers whether your child is ready to face the world. [Toward a Knowledge-Based Economy](#) World Scientific Publishing Company

The Tale of Teas the saga of globalisation. Tea gave birth to paper money, the Opium Wars and Hong Kong, triggered the Anglo-Dutch wars and the American war of independence, shaped the economies and military history of Táng and Sòng China and moulded

Chinese art and culture. Whilst black tea dominates the global market today, such tea is a recent invention. No tea plantations existed in the world's largest black tea producing countries, India, Kenya and Sri Lanka, when the Dutch and the English went to war about tea in the 17th century. This book replaces popular myths about tea with recondite knowledge on the hidden origins and detailed history of today's globalised beverage in its many modern guises.

Rehearsing for Life Oxford University Press

During the June 2020 territorial dispute over Kalapani, India blamed tensions on a newly assertive Nepal's deepening relations with China. But beyond the accusations and grandstanding, this reflects a new reality: the power

equations in South Asia have been redrawn, to make space for China. Nepal did not turn northwards overnight. Its ties with China have deep historical roots built on Buddhism, dating to the early first millennium. While India's unofficial 2015 blockade provided momentum to the rift with Delhi, Nepal has long wanted deeper ties with Beijing, to counteract India's oppressive intimacy. With China's growing South Asian and global ambitions, Nepal now has a new primary bilateral partner-and Nepalis are forging a path towards modernity with its help, both in the remote borderlands and in the cities. All Roads Lead North offers a long view of Nepal's foreign relations, today underpinned by China's world-power status. Sharing never-before-told stories about Tibetan

guerrilla fighters, failed coup leaders and trans-Himalayan traders, Nepal analyst Amish Raj Mulmi examines the histories binding mountain communities together across the Sino-Nepali border. Part history, part journalistic account, Mulmi's is a complex, compelling and rigorously researched study of a small country caught between two neighbourhood giants.

Theatre of Nepal and the People Who Make It is the first comprehensive look at Nepali theatre for readers outside of Nepal. Charting Nepali theatre from ancient times to the present and from the metropolis of Kathmandu to far-flung regions, this book highlights the history of formal theatre and connects it to shifting political and social conditions in the country. Sourcing extensive fieldwork, it takes us back stage to meet individual theatre makers and learn their unique attributes and stories. From these intimate glimpses and the intertwining of political history with theatrical expression, a portrait emerges that conveys the character of Nepalis

who, in spite of adversities, continue to dramatize their hopes, fears, principles, and priorities through theatrical means.

The Pioneering Visits of Protap

Chunder Mozoomdar Dennison Berwick

Based on genealogical breakthroughs and previously unreleased records, this is the first book to explore the inspiring story of the poor Irish refugee couple who escaped famine, created a life together in a city hostile to Irish, immigrants, and Catholics, and launched the Kennedy dynasty in America. Their Irish ancestry was a hallmark of the Kennedys' initial political profile, as JFK leveraged his working-class roots to connect with blue-collar voters. Today, we remember this iconic American family as the vanguard of wealth, power, and style rather than as the descendants of poor immigrants. Here at last, we meet the first American Kennedys, Patrick and Bridget, who arrived as many

thousands of others did following the Great Famine—penniless and hungry. Less than a decade after their marriage in Boston, Patrick's sudden death left Bridget to raise their children single-handedly. Her rise from housemaid to shop owner in the face of rampant poverty and discrimination kept her family intact, allowing her only son P.J. to become a successful saloon owner and businessman. P.J. went on to become the first American Kennedy elected to public office—the first of many. Written by the grandson of an Irish immigrant couple and based on first-ever access to P.J. Kennedy's private papers, *The First Kennedys* is a story of sacrifice and survival, resistance and reinvention: an American story.

This fully updated edition of *Birds of Nepal* is the most comprehensive guide to the birds of this beautiful Himalayan country. The texts have been completely re-written for this edition and many of

the illustrations have been replaced. In addition, maps have been included for the first time. Every species recorded in Nepal is covered, including vagrants, with accurate distribution maps for most species. 142 colour plates are featured, illustrating more than 790 species with text on facing pages for quick and easy reference. The comprehensive text covers identification, voice, habits, habitats, altitudinal range, distribution and status.

An Action Plan for Their

Conservation Emerald Group Publishing
This book positions Brahma Samaj leader Protap Chunder Mozoomdar as the originator of the Hindu mission movement to the United States of America in the late 19th century. It is

known that Protap Mozoomdar, together with Swami Vivekananda, represented Hinduism at the Parliament of Religions at Chicago in 1893. But what has missed the focus of scholars is that Mozoomdar visited the United States ten years earlier in 1883, making him the pioneer of the Hindu mission movement to the United States. The book is the first detailed study of Protap Chunder Mozoomdar in America. It is written through primary research on American newspapers, periodicals, manuscripts, diaries and archival material available in American libraries, and material in possession of the author. On the whole, the book presents new information of interest to both the general reader and the scholarly community.
