Translation is at the heart of psychoanalysis: from unconscious to conscious, experience to verbal expression, internal to enacted, dream thought to dream image, language to interpretation, unrepresented to represented and transference of past to present. The book's first part discusses the question of translation, literal and metaphoric. Both linguistic and cultural translations are closely tied to specific and significant personalities who were involved in the early history of psychoanalysis and thus in the development of the IJP. There was a close relationship between the IJP and the visual arts via the Bloomsbury Group. The link between the visual arts and the IJP is indeed to be found in its logo, which is taken from a painting by Ingres. The second part of the book approaches transformations between psychoanalysis and the arts from conscious, unconscious and non-represented elements into non-verbal modes, specifically visual, poetic and musical; it also looks at the developments and transformations in psychoanalytic ideas about artistic expression as expressed within the pages of the IJP. This book will be of great interest to psychoanalysts and psychotherapists, and to those interested in the history of psychoanalysis and the IJP.

Cameroon stands as a remarkable example of nation-building in the aftermath of European domination. Split between the French and British empires after World War I, it experienced a unique drive for self-determination at the turn of the 1960s, culminating in both independence from European power and the re-unification of two of its divided territories. This book investigates the influence of foreign policy on nation-building in West Africa in the context of both the Cold War and European integration. Shedding fresh light on the challenges of bridging the political, economic and linguistic divide that France and Britain had left, Melanie Torrent explores the evolution of a nation, charting both Cameroon's importance in Franco-British relations and Cameroon's use of bilateral and multilateral diplomacy in asserting its independence. This work should be essential reading for students of African studies, International Relations and the post-colonial world.

In far too many places, the worldwide trade in English-language teaching, testing and publishing has become a self-perpetuating, self-congratulating, neocolonial monster ... a veritable multi-headed Hydra. Too often the English language industry aggressively promotes itself as some sort of "uplifting", "essential", "proper" or even "better" means of communication than any other language. Unfortunately, its relentless global outreach is taking place at the direct expense, and the active denigration, of local and regional languages - not to mention individual identities. English Language as Hydra brings together the voices of linguists, literary figures and teaching professionals in a wide-ranging exposé of this monstrous Hydra in action on four continents. It provides a showcase of the diverse and powerful impacts that this ever-evolving, gluttonous beast has had on so many non-English language cultures - as well as the surreptitious, drug-like ways in which it can infiltrate individual psyches.

This volume is a unique contribution to the study of language policy and education for English Learners because it focuses on the decade long implementation of "English Only" in Arizona. How this policy influences teacher preparation and classroom practice is the central topic of this volume. Scholars and researchers present their latest findings and concerns regarding the impact that a restrictive language policy has on critical areas for English Learners and diverse students. If a student's language is sanctioned, do they feel welcome in the classroom? If teachers are only taught about subtractive language policy, will they be able to be tolerant of linguistic diversity in their classrooms? The implications of the chapters suggest that Arizona's version of Structured English Immersion may actually limit English Learners' access to English.

The English language as spoken in Namibia has virtually been overlooked in most textbooks, handbooks, and surveys of varieties of English around the world, or else has only been mentioned in passing. However, this variety of English has recently attracted the attention of several researchers and the present volume brings together most scholars actively involved in the research on English in Namibia from various linguistic fields to present their current research. It covers a wide range of linguistic issues, such as empirical analyses on various levels of linguistic description and use, as well as the application of diverse methodologies, from questionnaire surveys, sociolinguistic interviews and focus group discussions, to corpus linguistics, linguistic landscaping, and digital ethnography. This book represents the first comprehensive collection of articles and in-depth discussions of this emerging variety of World Englishes.

100 Years of the International Journal of Psychoanalysis London, Chapman

How can English language teachers contribute to peace locally and globally? English language teachers and learners are located in the global civil society - an international network of civil organizations and NGOs related to human rights, the environment, and sustainable peace. English, with its special role as an international language, is a major tool for communication within this network. On the local level, many teachers are interested in promoting reconciliation and sustainable peace, but often do not know how to do so. This book provides information, analysis, and techniques to help teachers around the world take action toward this goal. Balancing, in a readable and accessible way, the global and the local, core and periphery, cultural diffusion and resistance, theory and practice, pessimism and optimism, outsider and insider perspectives, the

expert role and the apprentice role, and prescriptive and elicitive methods, it offers an alternative to literature about critical applied linguistics, globalization, and peace education that is simply too complex and wordy to spread easily from theoretician to the classroom teacher. The English Teacher in Global Civil Society: synthesizes threads from many fields and topics into a coherent and empowering argument for the activist role English language teachers can take to promote social change draws on humanistic education, peace education, cross-cultural understanding, problem-posing, cooperative learning, and critical thinking methodologies to help English language teachers learn how to teach conflict resolution skills in their classrooms covers issues in critical applied linguistics, approaches and methodologies in ESL/EFL, global and local curricular issues, and specific skill areas such reading, writing, and speaking suggests a new goal for English language teachers: global citizenship. This engaging, informative, provocative, and highly readable book is a welcome resource for English language teacher trainers, pre-service teachers, practicing classroom teachers, and Peace Corps workers around the world.

Routledge Library Editions: Education in Asia Psychology Press

The spread of English is so much an integral part of globalization that it has become an essential global literacy skill. In Asia, this poses immense challenges to governments and English language teaching and teacher education professions as they attempt to meet this demand from students for a high level of English proficiency. This volume examines English language education policies across ten Asian jurisdictions, the corresponding teacher education policies, and how these policies affect teachers and teacher educators. Each chapter covers a different jurisdiction, and is written by a scholar engaged in the implementation of government policies on English language and teacher education, providing the reader with insiders' perspectives. It gives a fascinating glimpse into the remarkable similarities in the challenges posed to these countries and the critical issues that have emerged from the local responses despite their markedly different socioeconomic, political, cultural and historical backgrounds.

This book provides critical insights into the English-medium instruction (EMI) experiences which have been implemented at a number of universities in countries such as China, Finland, Israel, the Netherlands, South Africa, Spain and the USA, which are characterised by differing political, cultural and sociolinguistic situations. In particular, it reflects on the consequences of implementing EMI as an attempt to gain visibility and as a strategy in response to the need to become competitive in both national and international markets. The pitfalls and challenges specific to each setting are analysed, and the pedagogical issues and methodological implications that arise from the implementation of these programmes are also discussed. This volume will serve to advance our awareness about the strategies and tools needed to improve EMI at tertiary level.

A Girl Called Jack Peter Lang

Did you know that . . . a soldier's biggest social blunder is called jack brew - making yourself a cuppa without making one for anyone else? That twitchers have an expression for a bird that can't be identified - LBJ (the letters stand for Little Brown Job)? Or that builders call plastering the ceiling doing Lionel Richie's dancefloor? Susie Dent does. Ever wondered why football managers all speak the same way, what a cabbie calls the Houses of Parliament, or how ticket inspectors discreetly request back-up? We are surrounded by hundreds of tribes, each speaking their own distinct slanguage of colourful words, jokes and phrases, honed through years of conversations on the battlefield, in A&E, backstage, or at ten-thousand feet in the air. Susie Dent has spent years interviewing hundreds of professionals, hobbyists and enthusiasts, and the result is an idiosyncratic phrasebook like no other. From the Freemason's handshake to the publican's banter, Dent's Modern Tribes takes us on a whirlwind tour of Britain, decoding its secret languages and, in the process, finds out what really makes us all tick.

Global Challenges OUP Oxford

This book represents a collection of papers that relate to the challenges and problems posed by the ever-changing and diversified nature of today's classroom. The papers discuss and demonstrate methodologies and learning strategies, and in the process, recommend effective practices that are practical and open to adaptation for different teaching and learning contexts. They range from suggestions on how to exploit information technology resources to individual or specific case studies. These case studies report on a variety of contextual issues and problems that are specified to particular learning contexts. This book, therefore, thus not only offers examples of tried and tested teaching strategies but also offers useful insights into specific sociocultural problems that are experienced by learners as well as teachers and interested stakeholders in particular settings and countries. The papers offer a comprehensive documentation of past as well as present problems faced by teachers, policy makers and students, and discuss ways and strategies of overcoming such problems such that the teaching and learning process is not only enhanced but made more meaningful and fulfilling to both teachers and learners. The inherently global perspective of the papers in this book makes it an enriching compendium.

Maritime Transport Services in the Law of the Sea and the World Trade Organization Multilingual Matters

When James Cracknell and Ben Fogle decided to compete in the Atlantic Rowing Race, they thought they knew what awaited them: nearly three thousand miles of empty ocean, stormy weather and colossal physical stress. But their epic journey would become a living hell that tested the strength of

every fibre of their being. Forty nine days later James and Ben were the first pair to cross the finishing line. They had pushed themselves physically, psychologically and emotionally to the limit. They had survived without water rations, lost the few clothes they had in a freak wave, capsized, hallucinated, played games, wept, fought, grown beards, nursed blisters and rowed 2,930 miles. They will never be the same again.

Implementing Educational Language Policy in Arizona Bloomsbury Publishing

Since the beginnings of international law, the law of the sea has been of paramount importance for international trade. Yet this area of law and international trade regulations have developed as two distinct areas with little interface with each other. As the GATT/WTO emerged in parallel to the LOS Convention since the 1970s, both bodies have made extensive efforts in international treaty making. However, the relationship between trade regulations and the law of the sea has hardly been explored. The author examines some key aspects of this relationship, in particular port entry, access to cargo in coastal shipping (cabotage) and access to cargo in international shipping. The inclusion of services in WTO law will render this relationship of great importance in the future as the agreement extensively covers maritime transport. It is just a matter of time until the current exclusion of maritime transport under special exemptions will be reviewed in future negotiations. The book provides the background and a normative basis for approaching some of the problems which members of the WTO will have to address in coming years. It also deals briefly with the problem of choice of law and competing jurisdictions between trade law and maritime law.
