QUINTIN IBARRA

Near Field Communication (NFC) Routledge

An irreverent black comedy about sex, drugs, murder... and children's baseball. Dwayne Devero is just like you and me, except he simply doesn't give a s**t any more. He's had enough. He's done with people living life wrong. You'll do it right, or he'll bury you under the bases at the ballpark where he coaches. It's just that simple. Tired of poor decisions being made all around him, from the politics of player positions on his son's little league baseball team to the philandering of his wife in his own bedroom, Dwayne decides that breaking is better than bending. What follows is a wild ride full of carnage and revenge, led by a man who will stop at absolutely nothing to bring honor back to his family, his community... and children's baseball. Baseball Dads is a pitch black comedy in which one man takes on the duty of bludgeoning honor back into a sometimes dishonorable world.

The main objective of this book is to provide the necessary background to work with big data by introducing some novel optimization algorithms and codes capable of working in the big data setting as well as introducing some applications in big data optimization for both academics and practitioners interested, and to benefit society, industry, academia, and government. Presenting applications in a variety of industries, this book will be useful for the researchers aiming to analyses large scale data. Several optimization algorithms for big data including convergent parallel algorithms, limited memory bundle algorithm, diagonal bundle method, convergent parallel algorithms, network analytics, and many more have been explored in this book.

Design Is How It Works John Wiley & Sons

The Okiek people of Kenya's forested highlands have a long history of hunting, honey gathering, and trading with their Maasai and Kipsigis neighbors; several decades ago, they also began farming and herding. This book follows a traveling exhibition of anthropologist Corinne Kratz's photographs of the Okiek through showings at seven venues, including the National Museum in Nairobi and the Smithsonian Institution in Washington, D.C. Kratz tells the story of the exhibition--the stereotypes it sought to challenge, how commentaries by Okiek people were incorporated, and different ways that viewers in Kenya and the United States understood it. In addition to presenting wonderful images of a little-known people, this inviting book explores the exhibition medium itself, focusing on the complexities and possibilities of cultural representation. Walking a fine line between the photographic intimacy of a family album and the ethnographic distance of documentary photography, *The Ones That Are Wanted* reproduces the exhibition in full, with its vibrant color photographs, multilingual captions, and lively commentary. Throughout, Kratz incorporates insightful reflections on her changing involvement with the exhibition as anthropologist, photographer, and curator, and she provides perceptive discussions of such topics as photography in Kenya, stereotypes, and the post-1970s proliferation of the politics of representation. Build mobile applications for Nokia's S60 phones using the hot Qt GUI tool This vital primer--written by developers involved in the latest release of Qt--is a must for anyone wanting to learn this cutting-edge programming environment. Qt is a multi-platform, C++ GUI toolkit that allows you to develop applications and user interfaces once, then deploy them across many desktop and embedded operating systems, without rewriting the source code. Now being applied to the S60 platform (Nokia's new, uniform UI), Qt promises to save development resources, cut costs, and get you to market faster. This unique guide helps you master this exciting tool with step-by-step instruction from some of the best developers in the S60 field. Find easy-to-access tips, techniques, examples, and much more. Walks you through installation of the Qt developer platform and SDK Explains the basic Qt environment and how it can save you development time Delves into the extension of Qt for the S60, including communication and sensors Provides plenty of examples to help you quickly grasp concepts Help revolutionize the S60 mobile market and stay ahead of the crowd with your own state-of-the-art applications, developed with Qt and the detailed information in this unique guide.

Communities Dominate Brands University of Michigan Press

Take a look inside Symbian OS with an under-the-hood view of Symbian's revolutionary new real-time smartphone kernel Describes the functioning of the new real-time kernel, which will become ubiquitous on Symbian OS phones in the next 5-10 years Will benefit the base-porting engineer by providing a more solid understanding of the OS being ported Contains an in-depth explanation of how Symbian OS drivers work. Device drivers have changed considerably with the introduction of a single code - this book helps those converting them to the new kernel The book has broad appeal and is relevant to all who work with Symbian OS at a low level, whatever Symbian OS they are targeting Written by the engineers who actually designed and built the real-time kernel

Research Paper from the year 2014 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, course: Management, language: English, abstract: This study gives an insight into the mobile market industry in Sri Lanka. Mobile phone manufactures and marketers are facing hyper competition in Sri Lanka as well as in the world mobile market. Mobile phone marketers should have a clear idea about the factors which are affecting the choice of mobile phones. In order to get more market share and win whole hard of the potential consumers and stakeholders they have to design, produce, communicate and promote the mobile phone in the best possible manner. This study aims to find out the factors which are affecting the choice of a particular mobile brand when a purchase decision is made with reference to Sri Lankan university students. The primary data was collected through an online-based questionnaire sent to randomly selected students who are following any program of study in universities island-wide. Descriptive statistics; mean and standard deviation are used to identify the factors which are affecting the mobile brand preference. Price, stylish appearances and perceived quality are found as very important factors on purchase decision when selecting a mobile phone brand.

Provides step-by-step instructions and manufacturer specifications for all aspects of firearms maintenance while sharing accompanying tips for a wide range of firearms categories.

Big Data Optimization: Recent Developments and Challenges John Wiley & Sons

In the tradition of international bestsellers, *Future Shock* and *Megatrends*, Michael J. Saylor, CEO of MicroStrategy, brings *The Mobile Wave*, a groundbreaking analysis of the impact of mobile intelligence -- the fifth wave of computer technology. The *Mobile Wave* argues that the changes brought by mobile computing are so big and widespread that it's impossible for us to see it all, even though we are all immersed in it. Saylor explains that the current generation of mobile smart phones and tablet computers has set the stage to become the universal computing platform for the world. In the hands of billions of people and accessible anywhere and anytime, mobile computers are poised to become an appendage of the human being and an essential tool for modern life. With the perspective of a historian, the precision of a technologist, and the pragmatism of a CEO, Saylor provides a panoramic view of the future mobile world. He describes how: A Harvard education will be available to anyone with the touch of a screen. Cash will become virtual software and crime proof. Cars, homes, fruit, animals, and more will be tagged so they can tell you about themselves. Buying an item will be as easy as pointing our mobile device to scan and pay. Land and capital will become more of a liability than an asset. Social mobile media will push all businesses to think and act like software companies. Employment will shift as more service-oriented jobs are automated by mobile software. Products, businesses, industries, economies, and even society will be altered forever as the *Mobile wave* washes over us and changes the landscape. With so much change, *The Mobile Wave* is a guidebook for individuals, business leaders, and public figures who must navigate the new terrain as mobile intelligence changes everything.

Qt for Symbian Oxford University Press

Jerry Kaplan had a dream: he would redefine the known universe (and get very rich) by creating a new kind of computer. All he needed was sixty million dollars, a few hundred employees, a maniacal belief in his ability to win the Silicon Valley startup game. Kaplan, a well-known figure in the computer industry, founded GO Corporation in 1987, and for several years it was one of the hottest new ventures in the Valley. *Startup* tells the story of Kaplan's wild ride: how he assembled a brilliant but fractious team of engineers, software designers, and investors; pioneered the emerging market for hand-held computers operated with a pen instead of a keyboard; and careened from crisis to crisis without ever losing his passion for his revolutionary idea. Along the way, Kaplan vividly recreates his encounters with eccentric employees, risk-addicted venture capitalists, and industry giants such as Bill Gates and John Sculley. And no one -- including Kaplan himself -- is spared his sharp wit.

Factors Affecting Mobile Phone Brand Preference. Empirical Study on Sri Lankan University Students John Wiley & Sons

Communities Dominate Brands: Business and marketing challenges for the 21st century is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. *Communities Dominate Brands* discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. *Communities Dominate Brands* addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book

discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, *Communities Dominate Brands* arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. *Communities Dominate Brands* covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. *Communities Dominate Brands* analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc. The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, *Communities Dominate Brands* is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

Come see what's new with 5 Elements. There has never been a 5 Elements Guide like this. It contains 40 answers, much more than you can imagine; comprehensive answers and extensive details and references, with insights that have never before been offered in print. Get the information you need--fast! This all-embracing guide offers a thorough view of key knowledge and detailed insight. This Guide introduces what you want to know about 5 Elements. A quick look inside of some of the subjects covered: Polyfill - html5shiv, Immortality - Terminology, Dubnium, Cooperative learning - History, Bismuth - Bismuthine and bismuthides, Nokia 808 Pureview - PureView Pro specifications, Photo Raster, 2008 Olympics torch relay protests - Torch, Dublin Core - Qualified Dublin Core, Ununtrium - Dubna-Livermore collaboration, Chinese astrology - Background, Ununpentium - Discovery, Heat of vaporization, Quod erat demonstrandum - Etymology and early use, Nested RAID levels - RAID 50 (RAID 5+0), Chinese calendar - Ancient Yi calendars, Transition metal - Classification, Period 5 element, Group 5 element - Biological occurrences, Inexpensive - Deduction of business expenses under the United States tax code, 98th Range Wing - European Mission, Transition metals - Classification, Priest - Taoism, Organometallic chemistry - Organometallics, Dublin Core - Levels of the standard, List of elements by stability of isotopes, Vehicular homicide - Canada, Bombing of Hildesheim in World War II - March 14, 1945, TI-BASIC - TI-83/84 (Z80), 2014 Eastern Syria offensive - Al-Raqqa, Al-Hasakah and Aleppo assaults, Pregnancy from rape - Law, Acid-base theories - Lewis definition, AVUM - Future developments, UNESCO Intangible Cultural Heritage Lists, Storyspace - Artistic and educational use, American Elements - Educational Programs, and much more...

Transforming NOKIA Skyhorse Publishing, Inc.

Back in the 1980s Jean Baudrillard wrote that public space was collapsing due to a double obscenity: 'The most intimate operation of your life becomes the potential grazing ground of the media....The entire universe also unfolds unnecessarily on your home screen.' He termed this the ecstasy of communication. But today, your everyday life is not just the potential grazing ground of the media, but of anyone with a camera, and the entire universe unfolds not just at home but in the palm of your hand virtually anywhere you travel. Bringing together a transdisciplinary team of leading scholars and artists from North America, Europe and Asia, this volume documents and theorizes this new visibility. It focuses on the proliferation of a range of new visual technologies, examining questions of subjectivity, agency, and surveillance as well as mapping and theorizing new practices of visibility within this new visual assemblage. *New Visualities, New Technologies* addresses the pressing need for the conceptual understanding of new forms of seeing, looking, presenting, and hiding.

Programming the Mobile Web Penguin

Do workers hired from superstar tech-firms contribute to better firm performance? To address this question, we analyze the effects of tacit knowledge spillovers from Nokia in the context of a quasi-natural experiment in Finland, the closure of Nokia's mobile device division in 2014 and the massive labor movement it implied. We apply a two-stage difference-in-differences approach with heterogeneous treatment to estimate the causal effects of hiring former Nokia employees. Our results provide new evidence supporting the positive causal role of former Nokia workers on firm performance. The evidence of the positive spillovers on firms is particularly strong in terms of employment and value added.

High Performance Silicon Imaging John Wiley & Sons

Feel the Mach 3 power generated by Lockheed's incredibly fast SR-71 Blackbird! Former SR-71 pilot, instructor and wing commander, Richard Graham, presents the most intriguing SR-71 stories ever told. This once highly classified program is fully revealed through the words of pilots,

commanders, mechanics, and instructors involved in the Blackbird's creation and flight-testing. From grueling reconnaissance missions to the Persian Gulf conflict, this insightful book tells stories of bravery and daring determination.

The Ones that are Wanted Springer

This book provides the technical essentials, state-of-the-art knowledge, business ecosystem and standards of Near Field Communication (NFC) by NFC Lab - Istanbul research centre which conducts intense research on NFC technology. In this book, the authors present the contemporary research on all aspects of NFC, addressing related security aspects as well as information on various business models. In addition, the book provides comprehensive information a designer needs to design an NFC project, an analyzer needs to analyze requirements of a new NFC based system, and a programmer needs to implement an application. Furthermore, the authors introduce the technical and administrative issues related to NFC technology, standards, and global stakeholders. It also offers comprehensive information as well as use case studies for each NFC operating mode to give the usage idea behind each operating mode thoroughly. Examples of NFC application development are provided using Java technology, and security considerations are discussed in detail. Key Features: Offers a complete understanding of the NFC technology, including standards, technical essentials, operating modes, application development with Java, security and privacy, business ecosystem analysis Provides analysis, design as well as development guidance for professionals from administrative and technical perspectives Discusses methods, techniques and modelling support including UML are demonstrated with real cases Contains case studies such as payment, ticketing, social networking and remote shopping This book will be an invaluable guide for business and ecosystem analysts, project managers, mobile commerce consultants, system and application developers, mobile developers and practitioners. It will also be of interest to researchers, software engineers, computer scientists, information technology specialists including students and graduates.

Crime Scene Photography Hachette+ORM

This is the definitive guide for Symbian C++ developers looking to use Symbian SQL in applications or system software. Since Symbian SQL and SQLite are relatively new additions to the Symbian platform, *Inside Symbian SQL* begins with an introduction to database theory and concepts, including a Structured Query Language (SQL) tutorial. *Inside Symbian SQL* also provides a detailed overview of the Symbian SQL APIs. From the outset, you will "get your hands dirty" writing Symbian SQL code. The book includes snippets and examples that application developers can immediately put to use to get started quickly. For device creators and system software developers, *Inside Symbian SQL* offers a unique view into the internals of the implementation and a wealth of practical advice on how to make best and most efficient use of the Symbian SQL database. Several case studies are presented - these are success stories 'from the trenches', written by Symbian engineers. Special Features: The book assumes no prior knowledge of databases Includes detailed and approachable explanations of database concepts Easy to follow SQL tutorial with SQLite examples Unique view into the Symbian SQL internals Troubleshooting section with solutions to common problems Written by the Symbian engineers who implemented SQLite on Symbian, with more than 40 years combined Symbian C++ experience, this book is for anyone interested in finding out more about using a database on Symbian.

The Symbian OS Architecture Sourcebook John Wiley & Sons

The work presented in this book focuses on modeling audiovisual quality as perceived by the users of IP-based solutions for video communication like videotelephony. It also extends the current framework for the parametric prediction of audiovisual call quality. The book addresses several aspects related to the quality perception of entire video calls, namely, the quality estimation of the single audio and video modalities in an interactive context, the audiovisual quality integration of these modalities and the temporal pooling of short sample-based quality scores to account for the perceptual quality impact of time-varying degradations.

Nature Photography Simplified Univ of California Press

Fusing perspectives from politics, media studies and cultural studies, *Sousveillance, Media and Strategic Political Communication* offers insights into impacts on strategic political communication of the emergence of web-based participatory media ('Web 2.0') across the first decade of the 21st century. Countering the control engendered in strategic political communication, Steve Mann's concepts of hierarchical sousveillance (politically motivated watching of the institutional watchers) and personal sousveillance (apolitical, human-centred life-sharing) is applied to Web 2.0. Focusing on interplays of user-generated and mainstream media about, and from, Iraq, detailed case studies explore different levels of control over strategic political communication during key moments, including the start of the 2003 Iraq war, the 2004 Abu Ghraib scandal, and Saddam Hussein's execution in 2006. These are contextualized by overviews of political and media environments from 2001-09. Dr Bakir outlines broader implications of sousveillant web-based participatory media for strategic political communication, exploring issues of agenda-building, control, and the cycle of emergence, resistance and reincorporation of Web 2.0. *Sousveillance cultures* are explored, delineating issues of anonymity, semi-permanence, instantaneity resistance and social change.

Someone Comes to Town, Someone Leaves Town Academic Press

Babies can be a joy—and hard work. Now, they can also be a 50-in-1 science project kit! This fascinating and hands-on guide shows you how to re-create landmark scientific studies on cognitive, motor, language, and behavioral development—using your own bundle of joy as the research subject. Simple, engaging, and fun for both baby and parent, each project sheds light on how your baby is acquiring new skills—everything from recognizing faces, voices, and shapes to understanding new words, learning to walk, and even distinguishing between right and wrong. Whether your little research subject is a newborn, a few months old, or a toddler, these simple, surprising projects will help you see the world through your baby's eyes—and discover ways to strengthen newly acquired skills during your everyday interactions.
