MAXIMUS LAM

Fangtales HARCOURT

In the aftermath of a devastating accident that ended the lives of his family, a novelist struggles with overwhelming survivor's guilt and writer's block while limiting his human contacts to a Kurdish neighbor and a woman he glimpses in a flat across the road. Reprint. 10,000 first printing.

308 Circuits Marvel Press

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

A Novel American Medical Association Press

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Robert Service wrote in the golden years of the Klondike--of the rough and ready men, and women just as tough. No-one in Robert's world (real or imagined) minced words or had any self-consciousness about them. It was live and let live and sometimes kill or be killed. "Best Tales of the Yukon" reflects those times. Reading Service's poems transports us back to that frozen place in nature when it was literally every man and every woman for him/herself. Somehow Service conveys only a sensitivity, but the beauties he saw in the others. His poems also have historical interest, as he talked about the arrival of the light switch, gathering around the village's first "grammyphone", and hearing the voice of "canned man" coming from it (some "savages "took to their canoes because it seemed demonic, while others were enraptured by this miracle of sound). Cold cabins, with hoarfrost

clinging to the inside rafters, unwashed masses in itchy long-johns struggling out of bed on an arctic day, and the beauty of the lilies living side by side with a trapper's two-timing woman getting her just desserts (over "a black fox skin"), Robert Service touches the heart and soul of the rough and raw Klondike in the early 1900's, showing us the emotions and colors from inky black to pure gold. "Best Tales of the Yukon" has a magical way of transporting readers to the Yukon-something you won't want to miss. "Best Tales of the Yukon" collects together forty-five of these poems. Selected from two of his earliest volumes, "Spell of the Yukon and Other Verses" and "Ballads of a Cheechako", this volumes includes some of Service's most memorable poetry including the classics "The Shooting of Dan McGrew", "The Law of the Yukon", and "The Cremation of Sam McGee".

In the Wake Time Inc. Books

A very dirty book about a very unusual relationship.

Elements of Petroleum Refinery Engineering Laurence King Publishing

In his art Jonathan Green paints the world of his childhood and an ode to a people imbued with a profound respect for the dignity and value of others—the Gullah people of the South Carolina barrier islands. His canvases, beloved for their sense of jubilation and rediscovery, evoke the meaning of community in Gullah society and display a reverence for the rich visual, oral, and spiritual traditions of its culture. His art also reveals a keen awareness of the interpersonal, social, and natural environments in which we live. The 180 images assembled in this collection showcase the meaning, purpose, and beauty that Green finds in the small but critical tasks of life. His work elevates the everyday—preparing morning meals, doing the wash, accomplishing farming chores, finishing a day's work, relaxing in the evening—and celebrates the social and religious—community dances, baptisms, weddings, funerals. Green allows his audience the space and silence to observe people unobtrusively as they pursue life's mission of labor, love, and belonging and as they work in harmony with nature's mysterious, ever changing fabric. While Green's paintings speak specifically to his own upbringing, they transcend racial, cultural, and ethnic boundaries, thus allowing individuals of all backgrounds to recall fond memories and to reflect on the place that purpose and dignity hold in their lives. In addition to a foreword by Pat Conroy, essays by Bettye J. (Mbitha) Parker Smith, Lynn Robertson, and Ronne Hartfield complement Green's images. They tell of the vitality of the Gullah community, the progression of Green's career, and the authenticity of his work.

All the thrills of off-roading started with the Jeep, and they keep on coming. A celebration of off-road Jeeps and the people who drive them, this book features the vehicles, personalities, events, and maneuvers that make up the Jeep universe of competitive and recreational off-roading. The fact-filled, photograph-packed book explores the joys of Jeep ownership, history, restoration, modification, off-road competition, events, clubs, and more. It includes information on popular accessories and performance enhancing modifications, the different generations and styles of Jeeps, off-road events and the professionals who compete in them. With color photographs of some of the most beautiful custom and restored Jeeps from around the country, The Joy of Jeep takes readers to the edge of this soul-stirring activity and shows why Jeep is America's favorite off-road vehicle.

Hockey: Then to WOW! shows readers how the cool sport has evolved from the early days of its 19th century origins to the game as it is today. Using NHL action photographs, illustrations, stories, and trivia, the book is a journey through time both for hockey fans and those new to the game. Kids will learn how basic equipment has changed from a ball to a puck and how the evolution of game strategy has transformed the sport, players, and equipment. Players throughout history are stacked up against each other in every position so fans can dream up the perfect fantasy team with Wayne Gretzky playing alongside Patrick Roy and Stan Mikita. A fun-filled section of the book explores everything fan culture-from the best ice rinks, to the iconic hockey sweater and the hockey haircut along with key aspects of the toughest sport around.

In Mortal Combat

CreateSpace

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.
