More than 300,000 engineers have relied on the Engineer-In-Training Reference Manual to prepare for the FE/EIT exam. The Reference Manual provides a broad review of engineering fundamentals, emphasizing subjects typically found in four- and five-year engineering degree programs. Each chapter covers one subject with solved example problems illustrating key points. Practice problems at the end of every chapter use both SI and English units. Solutions are in the companion Solutions Manual. Comprehensive review of thousands of engineering topics, including FE exam topics Over 980 practice problems More than 590 figures Over 400 solved sample problems Hundreds of tables and conversion formulas More than 2,000 equations and formulas A detailed 7,000-item index for quick reference For additional discipline-specific FE study tools, please visit feprep.com.

Since 1975, more than 2 million people have entrusted their exam prep to PPI. For more information, visit us at ppi2pass.com.

Another powerful story in the Logan Family Saga and companion to Mildred D. Taylor's Newbery Award-winning *Roll of Thunder, Hear My Cry*. For David Logan, a time of distress means taking the higher road. During a drought, the Logan family shares their well water with their neighbors, black and white alike. But David's brother Hammer finds it hard to share with Charlie Simms, who torments them because they are black. Hammer's pride and Charlie's meanness are a dangerous combination, and tensions between the boys build and build—until they explode. * "A compelling novel about prejudice and the saving power of human dignity."—School Library Journal, starred review

HVAC Control System Design Diagrams. The Complete Engineer's Solutions Manual. This complete "cookbook" of generic segments and sequences is a most useful reference for designers or specifiers of HVAC control systems. this indispensable book not only gives you a broad array of diagrams but also: PROVIDES everything you need to design controls for an in-place or in-plan HVAC system. OFFERS ready-to-go details for retrofitting, updating, or designing controls for altered systems. ALLOWS clear comparisons among commercial control systems. SHOWS frequently made and useful modifications to controls. DEMONSTRATES how to create controls for peak efficiency, air quality, and energy conservation. COVERS air-handling, terminal, and primary systems. OFFERS sequences and segments for virtually any HVAC system. SHOWS you how standard control algorithms work in particular systems. These highly useful control diagrams, many of them comparable to commercially available models, let you design or specify needed configurations in the most efficient manner possible. Written by an experienced HVAC control engineer, it's in full compliance with ASHRAE standards and covers both hardware and software applications. This unique volume fills a definite need and should be a part of every HVAC engineer's design library.

One of the most exciting sculptors of our time, Antony Gormley is the creator of breathtaking public installations. Even casual fans will recognize Event Horizon, a collection of thirty-one life-size casts of the artist's body that have been installed atop buildings in places like London's South Bank and New York's Madison Square, and Field, formed by tens of thousands of standing clay figurines overflowing across a room's floor. Projects like these demonstrate Gormley's ongoing interest in exploring the human form and its relationships with the rest of the material world, and in Antony Gormley on

Sculpture, he shares valuable insight into his work and the history of sculpture itself. Combining commentary on his own works with discussions of other artists and the Eastern religious traditions that have inspired him, Gormley offers wisdom on topics such as the body in space, how to approach an environment when conceiving an installation, bringing mindfulness and internal balance to sculpture, and much more. Lavishly illustrated, this book will be of interest to not only art lovers, curators, and critics, but also artists and art students. Dynamic and thought-provoking, Antony Gormley on Sculpture is essential reading for anyone fascinated by sculpture and its long and complex history as a medium.

Leadership Lessons from the World's Greatest Car Company Professional Publications Incorporated Today's stringent design requirements and difficult-to-machine materials such as tough super alloys, ceramics, and composites, have made traditional machining processes costly and obsolete. As a result, manufacturers and machine design engineers are turning to advance machining processes. These machining processes utilizes electrical, chemical, and optimal sources of energy to bind, form and cut materials. El-Hofy rigorously explains how each of these advanced machining process work, their machining system components, process variables and industrial applications, making this book the perfect guide for anyone designing, researching or converting to a more advance machining process.
