Corporate finance and corporate strategy have long been seen as different sides of the same coin. Though both focus on the same broad problem, investment decision-making, the gap between the two sides--and between theory and practice--remains embarrassingly large. This book synthesizes cutting-edge developments in corporate finance and related fields--in particular, real options and game theory--to help bridge this gap. In clear, straightforward exposition and through numerous examples and applications from various industries, Han Smit and Lenos Trigeorgis set forth an extended valuation framework for competitive strategies. The book follows a problem-solving approach that synthesizes ideas from game theory, real options, and strategy. Thinking in terms of options-games can help managers address questions such as: When is it best to invest early to preempt competitive entry, and when to wait? Should a firm compete in R&D or adopt an accommodating stance? How does one value growth options or infrastructure investments? The authors provide a wide range of valuation examples, such as acquisition strategies, R&D investment in high-tech sectors, joint research ventures, product introductions in consumer electronics, infrastructure, and oil exploration investment. Representing a major step beyond standard real options or strategy analysis, and extending the power of real options and strategic thinking in a rigorous fashion, Strategic Investment will be an indispensable guide and resource for corporate managers, MBA students, and academics alike.

The Limited Liability Partnership were introduced in India vide the Limited Liability Partnership Act, 2008. LLP has combined the flexibility of a partnership and the advantages of limited liability of a company at a low compliance cost. Limited Liability Partnership Law effective from 1st April 2009 is a new business vehicle that provides the benefits of limited liability of a company but allows its partners the flexibility of organizing their internal management on the basis of a mutually arrived agreement. The new concept of LLP is gaining strength in India. Procedures for LLP compliance have changed since 2009. Taxation of LLP has been made clear by the provisions made in the Income-tax Act, 1961 through the Finance (No 2) Act 2009 and Finance Act, 2010. An attempt has been made in this book to analyze the provisions of Limited Liability Partnership Act, Rules and its taxation keeping in mind the practical difficulties, which a business entity/professional could face while adhering to the provisions contained in laws. Tables, charts and examples have been used sparingly to make the provisions understand easily. Book would be immensely useful for Company Secretaries, Law professionals, Chartered Accountants and everyone concerned with formation, incorporation, conversion, administration & management, accounting & audit and taxation of a LLP.

The Joint Contracts Tribunal Standard Form of Building Contract, JCT 98, is now a well established and widely used form. That is not to say, however, that it is always well understood. It is a large, complex contract with a number of particularly difficult provisions. It is not surprising, therefore, that not much guidance has been published on the form. This book, first written by John Parris in 1982, and revised in 1985, was widely regarded as a valuable commentary on the Standard Form. Unavailable for some years, it has now been substantially updated and completely rewritten by David Chappell. Major changes have occurred since the last edition, including a raft of amendments to the contract itself, much new legislation including the Housing Grants, Construction and Regeneration Act 1996, and substantial new case law. The book covers all these as well as the complex performance specified work provisions and the difficult problems of nomination. The nominated sub-contract conditions are referred to where appropriate, and the book contains guidance on related matters, such as warranties, letters of intent and quantum meruit. The book is not simply a re-writing of the contract in simple terms. It contains very valuable insights and much needed guidance on some of the lesser known implications of the current form. The book will provide a valuable reference for clients' professional advisers and contractors, as well as for lawyers needing an introduction to the contract.

Valuation of Portfolio Company Investments of Venture Capital and Private Equity Funds and Other Investment Companies John Wiley & Sons

How can a company that has never turned a profit have a multibillion dollar valuation? Why do some start-ups attract large investments while others do not? Aswath Damodaran, finance professor and experienced investor, argues that the power of story drives corporate value, adding substance to numbers and persuading even cautious investors to take risks. In business, there are the storytellers who spin compelling narratives and the number-crunchers who construct meaningful models and accounts. Both are essential to success, but only by combining the two, Damodaran argues, can a business deliver and sustain value. Through a range of case studies, *Narrative and Numbers* describes how storytellers can better incorporate and narrate numbers and how number-crunchers can calculate more imaginative models that withstand scrutiny. Damodaran considers Uber's debut and how narrative is key to understanding different valuations. He investigates why Twitter and Facebook were valued in the billions of dollars at their public offerings, and why one (Twitter) has stagnated while the other (Facebook) has grown. Damodaran also looks at more established business models such as Apple and Amazon to demonstrate how a company's history can both enrich and constrain its narrative. And through Vale, a global Brazil-based mining company, he shows the influence of external narrative, and how country, commodity, and currency can shape a company's story. *Narrative and Numbers* reveals the benefits, challenges, and pitfalls of weaving narratives around numbers and how one can best test a story's plausibility.
