This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the

solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Supercharged! Design, Testing and Installation of Supercharger Systems Naval Inst Press

This is the fifth collection of articles by Eliyahu Ashtor to be published by Variorum and focuses on the fundamental question of why, during the later Middle Ages, technology and industry declined, even collapsed, in the Muslim Levant, while simultaneously making enormous progress in the Christian West. An indefatigable researcher in archives all over the Mediterranean, Ashtor amassed quantities of data on this subject, and began to propose causal links between, on the one hand, demographic trends, types of political regime, economic policies and attitudes towards innovation, and on the other, the progress or decline of technology and industry. Although his work was cut short by his death in 1984, the information that Ashtor has made

available, for instance on the sugar and the alkali industries, and the questions and hypotheses he has suggested will provide a vital basis for continuing research. The final article, dealing more specifically with the history of commerce, represents in effect a summation of the author's views on the role of the Jews in the trade of the Mediterranean. La cinquième collection d'articles d'Eliyahu Ashtor à être publiée par Variorum (pour les deux volumes encore disponibles, voir p.00) se concentre sur la raison fondamentale pour laquelle, durant le Bas Moyen Age, la technologie et l'industrie dans le Levant musulman étaient en déclin, voire même en plein effondrement, alors qu'elles faisaient simultanément d'énormes progrès dans l'Ouest chrétien. Cherchiste infatigable des archives méditerranéennes, Ashtor a amassé quantité d'informations à ce sujet et a commencé à suggérer l'existence de lien de cause entre: d'une part, les tendances démographiques, les types de régimes politiques, la politique économique et les attitudes vis-à-vis du changement et, d'autre part, le progrès ou le déclin de la technologie et de l'industrie. Bien que son travail ait été interrompu par sa mort en 1984, l'information découverte par Ashtor, ainsi que les questions et hypothèses qu'il a suggéré forment une base essentielle à la continuation de la recherche. Le dernier article, qui traite plus spécifiquement de l'histoire du commerce, fait effet de récapitulatif quant aux opinions de l'auteur sur le rôle des juifs dans le commerce méditerranéen.
