Spaces of Multilingualism Routledge

To respond to the multilingual turn in language education, this volume constitutes a challenge to the traditional, monolingual, and native speakerism paradigm in the field of Teaching English to Speakers of Other Languages (TESOL) through a translanguaging lens. The chapters offer complex global perspectives – with contributions from five continents – to open critical conversations on how to conceptualize and implement translanguaging in teacher education and classrooms of various contexts. The researchers exhibit a shared commitment to transforming TESOL profession that values teachers' and learners' full linguistic repertoires. This volume should prove a valuable resource for students, teachers, and researchers interested in English teaching and learning, applied linguistics, second language acquisition, and social justice.

Attitudes and Language Multilingual Matters

This book addresses the multilingual reality of study abroad across a variety of national contexts and target languages. The chapters examine multilingual socialization and translanguaging; how the target language is entwined in global, local and historical contexts; and how students use local and global varieties of English.

Translanguaging John Wiley & Sons

This book is a multidisciplinary analysis of the meaning and dynamics of multilingualism from the perspectives of multilingual societies and language communities in the margins, who are trapped in a vicious circle of disadvantage. It analyses the social, psychological and sociolinguistic processes of linguistic dominance and hierarchical relationships among languages, discrimination, marginalisation and assertive maintenance in multilingualism characterised by a Double Divide, and shows the relationship between educational neglect of languages, capability deprivation and poverty, and loss of linguistic diversity. Its comparative analysis of language-in-education policies and practices and applications of multilingual education (MLE) in diverse contexts shows some promises and challenges in the education of indigenous/tribal/minority children. This book will be of interest to students, researchers, educators and practitioners in sociolinguistics, educational linguistics, psycholinguistics, multilingualism and bilingual/multilingual education.

Bilingual and Multilingual Education in the 21st Century Springer Nature

The Bilingual Revolution is a collection of inspirational vignettes and practical advice that tells the story of the parents and educators who founded dual language programs in New York City public schools. The book doubles as a "how to" manual for setting up your own bilingual school and, in so doing, launching your own revolution.

The Multilingual Apple Psychology Press

Winner of the British Association of Applied Linguistics Book Prize 2014 This book addresses how the new linguistic concept of 'Translanguaging' has contributed to our understandings of language, bilingualism and education, with potential to transform not only semiotic systems and speaker subjectivities, but also social structures.

Cross-linguistic Influences in Multilingual Language Acquisition Routledge

Decolonizing Foreign Language Education interrogates current foreign language and second language education approaches that prioritize white, western thought. Edited by acclaimed critical theorist and linguist Donaldo Macedo, this volume includes cutting-edge work by a select group of critical language scholars working to rigorously challenge the marginalization of foreign language education and the displacement of indigenous and non-standard language varieties through the reification of colonial languages. Each chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL/ESL/EFL educators as literature or linguistic theory.

The Multilingual Internet Springer Nature

The languages of the world can be seen and heard in cities and towns, forests and isolated settlements, as well as on the internet and in international organizations like the UN or the EU. How did

the world acquire so many languages? Why can't we all speak one language, like English or Esperanto? And what makes a person bilingual? Multilingualism, language diversity in society, is a perfect expression of human plurality. About 6,500-7,000 languages are spoken, written and signed, throughout the linguistic landscape of the world, by people who communicate in more than one language (at work, or in the family or community). Many origin myths, like Babel, called it a 'punishment' but multilingualism makes us who we are and plays a large part of our sense of belonging. Languages are instruments for interacting with the cultural environment and their ecology is complex. They can die (Tasmanian), or decline then revive (Manx and Hawaiian), reconstitute from older forms (modern Hebrew), gain new status (Catalan and Maori) or become autonomous national languages (Croatian). Languages can even play a supportive and symbolic role as some territories pursue autonomy or nationhood, such as in the cases of Catalonia and Scotland. In this Very Short Introduction John C. Maher shows how multilingualism offers cultural diversity, complex identities, and alternative ways of doing and knowing to hybrid identities. Increasing multilingualism is drastically changing our view of the value of language, and our notion of the part language plays in national and cultural identities. At the same time multilingualism can lead to social and political conflict, unequal power relations, issues of multiculturalism, and discussions over 'national' or 'official' languages, with struggles over language rights of local and indigenous communities. Considering multilingualism in the context of globalization, Maher also looks at the fate of many endangered languages as they disappear from the world. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Multilingual Self Studies in World Language Problems Second Language Acquisition: introduces the key areas in the field, including multilingualism, the role of teaching, the mental processing of multiple languages, and patterns of growth and decline explores the key theories and debates and elucidates areas of controversy gathers together influential readings from key names in the discipline, including: Vivian Cook, William E. Dunn and James P. Lantolf, S.P. Corder, and Nina Spada and Patsy Lightbown.

Plurilingual Pedagogies Greenwood Publishing Group

The Routledge Handbook of Plurilingual Language Education is the first comprehensive publication on plurilingualism, offering a multidimensional reflection on the nature, scope, and potential of plurilingualism in language education and society. Authored by a range of internationally recognized experts, the Handbook provides an overview of key perspectives on plurilingualism in a complementary range of fields. After a comprehensive introduction to the concept itself, 24 chapters are organized in six parts, each examining plurilingualism through a different lens. The Handbook spans historical, philosophical, and sociological dimensions, examines cognitive and neuroscientific implications, and the limitations of boundaries before moving to a pragmatic perspective: How is plurilingual language education developing in different contexts around the world? How can it contribute to language revitalization? How can it be expected to develop in education, digital spaces, and society as a whole? Written for an international audience, this handbook is an indispensable reference tool for scholars in education and applied linguistics, educators, graduate and post-graduate students, and policy makers.

Multilingualism and third language acquisition Multilingual Matters This volume depicts the phenomenon of cross-linguistic influences in the specific context of multilingual language acquisition. It consists of articles on various issues relating to the syntactic and lexical development of foreign language learners from different L1 backgrounds, in many cases involving languages which are typologically distant from English, such as Russian, Croatian, Greek and Portuguese. Individual chapters highlight different areas expected to be especially transfer-prone at the level of grammatical and lexical transfer in particular contexts of language contact.

Third Or Additional Language Acquisition Multilingual Matters Limited

This innovative collection explores critical issues in understanding

multilingualism as a defining dimension of identity creation and negotiation in contemporary social life. Reinforcing interdisciplinary conversations on these themes, each chapter is co-authored by two different researchers, often those who have not written together before. The combined effect is a volume showcasing unique and dynamic perspectives on such topics as rethinking of language policy, testing of language rights, language pedagogy, meaning-making, and activism in the linguistic landscape. The book explores multilingualism through the lenses of spaces and policies as embodied in Elizabeth Lanza's body of work in the field, with a focus on the latest research on linguistic landscapes in diverse settings. Taken together, the book offers a window into better understanding issues around processes of change in and of languages and societies. This ground breaking volume will be of particular interest to students and scholars in multilingualism, applied linguistics, and sociolinguistics.

Advances in Interdisciplinary Language Policy Translanguaging in Theory and

"... focuses on issues at the forefront of heritage language teaching and research. Its state-of-the-art presentation will make this volume a standard reference book for investigators, teachers, and students. It will also generate further research and discussion, thereby advancing the field." Maria Carreira, California State University – Long Beach, United States "In our multilingual and multicultural society there is an undeniable need to address issues of bilingualism, language maintenance, literacy development, and language policy. The subject of this book is timely.... It has potential to make a truly significant contribution to the field." Maria Cecilia Colombi, University of California – Davis, United States This volume presents a multidisciplinary perspective on teaching heritage language learners. Contributors from theoretical and applied linguistics, sociolinguistics, psychology, educational policy, and pedagogy specialists explore policy and societal issues, present linguistic case studies, and discuss curricular issues, offering both research and hands-on innovation. - The term "heritage language speaker" refers to an individual exposed to a language spoken at home but who is educated primarily in English. Research and curriculum design in heritage language education is just beginning. Heritage language pedagogy, including research associated with the attrition, maintenance, and growth of heritage language proficiency, is rapidly becoming a field in its own right within foreign language education. This book fills a current gap in both theory and pedagogy in this emerging field. It is a significant contribution to the goals of formulating theory, developing informed classroom practices, and creating enlightened programs for students who bring home-language knowledge into the classroom. Heritage Language Education: A New Field Emerging is dedicated to Professor Russell Campbell (1927-2003), who was instrumental in advocating for the creation of the field of heritage language education.

Second Language Acquisition Routledge

This book includes the work of 20 specialists working in various educational contexts around the world to create comprehensive and multidimensional coverage of current bilingual initiatives. Themes covered include issues in language use in classrooms; participant perspectives on bilingual education experiences; and the language needs of bi- and multilingual students in monolingual schools.

The Multilingual Mind Multilingual Matters

This collection brings together recent research on the influences between first and additional languages with a focus on the development of multilingual lexicons. Featuring work from an international group of scholars, the volume examines the complex dynamics underpinning vocabulary in second and third languages and the role first languages play within this process. The book is organized around three different facets of research in this area – lexical recognition, processing, and knowledge; the effects of first languages on second language reading and writing, collocations, and translation skills; and, vocabulary testing – drawing on examples from a variety of languages, including European languages, Arabic, and Japanese. Setting the stage for further research on the interplay between first languages and multilingual lexicons, this volume is key reading for students and researchers in applied linguistics, language learning and teaching, bilingualism, second language acquisition, and translation studies. *(Re)defining Success in Language Learning* Multilingual Matters Recent developments in education, such as the increasing

linguistic diversity in school populations and the digital revolution which has led to new ways of being, learning and socialising, have brought about fresh challenges and opportunities. In response, this book shows how technology enriches multilingual language learning, as well as how multilingual practices enrich computer assisted language learning (CALL) by bringing together two, thus far distinct, fields of research: CALL and multilingual approaches to language learning. The collection includes contributions from researchers and practitioners from three continents to illustrate how native languages, previously studied languages, heritage languages or dialects are activated through technology in formal and informal learning situations. The studies in this book showcase multilingual language use in chat rooms, computer games, digital stories, ebook apps, online texts and telecollaboration/virtual exchange via interactive whiteboards. This volume will be of interest to researchers interested in language learning and teaching and to practitioners looking for support in seizing the opportunities presented by the multilingual, digital classroom.

Translanguaging in Translation Multilingual Matters

The purpose of this book is to present recent studies in the field of multilingualism and L3, bringing together contributions from an international group of specialists from Austria, Canada, Germany, Portugal, Spain, Switzerland, Turkey, and United States. The main focuses of the articles are three: language acquisition, language learning and teaching. A collection of theoretical and empirical articles from scholars of multilingualism and language acquisition makes the book a significant resource as the papers present a wide perspective from main theories to current issues, reflecting new trends in the field. The authors focus on the heterogeneity and complexity that characterize third language acquisition, multilingual learning and teaching. As the issues addressed in this book intersect, it represents an asset and therefore the texts will be of great relevance for the scientific community. Part I presents different topics of L3 acquisition, such as syntax, phonology, working memory and selective attention, and lexicon. Part II comprises texts that show how the research on language acquisition informs pedagogical issues. For instance, the role of the knowledge of previous languages in the teaching of L3, the attitudes of multilingual teachers to plurilingual approaches, and the benefits of crosslinguistic pedagogy versus classroom monolingual bias. In sequence, Part III consists of texts on individual learning strategies, such as motivation and attitudes, crosslinguistic awareness, and students' perceptions about teachers' "plurilingual nonnativism". All these chapters include several different languages in contact in an acquisition/learning context: Basque, English, French, German, Italian, Ladin, Portuguese, Russian, Spanish, and Turkish.

The Multilingual Reality Language Science Press

This book critically engages with theoretical shifts marked by the 'multilingual turn' in applied linguistics, and articulates the complexities associated with naming and engaging with the everyday language practices of bi/multilingual communities. It discusses methodological approaches that enable researchers and educators to observe and interact with these communities and to understand their teaching and learning needs. It also highlights pedagogical approaches and instructional strategies involved with learning and teaching language and/or content curriculum to students across various learning and educational contexts. The book addresses recent debates on the multi/plural turn in applied linguistics and articulates the limitations of these debates - particularly the absence of discussion of social power relations and contexts in applying different theoretical lenses. It features empirical research from primarily North American classrooms to highlight how plurilingual pedagogies take shape in unique educational contexts, resisting monolingual approaches to language in education. Furthermore, it includes commentary/response pieces from established scholars in dialogue with recent plurilingual research in the field, to put the work in critical perspective within extant theories and literature.

The Bilingual Revolution Multilingual Matters

This book follows four emergent bilingual students in an English-medium pre-kindergarten in the US as they navigate the social and linguistic demands of school. It illustrates how students' differing classroom social positions shaped their participation in interaction and, in turn, their English language learning across a school year. With a unique focus on both processes and outcomes, the book highlights language strategies that are overlooked if the focus is solely on one language or on group participation, and it emphasizes the importance of assessment choice in shaping which learners appear to be successful. It is a powerful argument for recognising the translingual and multimodal abilities of learners, even in education which is officially English-medium and monolingual.

The Multilingual Turn Multilingual Matters

This book deals with the phenomenon of third language (L3) acquisition. As a research field, L3 acquisition is established as a branch of multilingualism that is concerned with how multilinguals learn additional languages and the role that their multilingual background plays in the process of language learning. The volume points out some current directions in this particular research area with a number of studies that reveal the complexity of multilingual language learning and its typical variation and dynamics. The eight studies gathered in the book represent a wide range of theoretical positions and offer empirical evidence from learners belonging to different age groups, and with varying levels of proficiency in the target language, as well as in other

non-native languages belonging to the learner's repertoire. Diverse linguistic phenomena and language combinations are viewed from a perspective where all previously acquired languages have a potential role to play in the process of learning a new language. In the six empirical studies, contexts of language learning in school or at university level constitute the main outlet for data collection. These studies involve several language backgrounds and language combinations and focus on various linguistic features. The specific target languages in the empirical studies are English, French and Italian. The volume also includes two theoretical chapters. The first one conceptualizes and describes the different types of multilingual language learning investigated in the volume: i) third or additional language learning by learners who are bilinguals from an early age, and ii) third or additional language learning by people who have previous experience of one or more non-native languages learned after the critical period. In particular, issues related to the roles played by age and proficiency in multilingual acquisition are discussed. The other theoretical chapter conceptualizes the grammatical category of aspect, reviewing previous studies on second and third language acquisition of aspect. Different models for L3 learning and their relevance and implications for representations of aspect and for potential differences in the processing of second and third language acquisition are also examined in this chapter. As a whole, the book presents current research into third or additional language learning by young learners or adults, considering some of the most important factors for the complex process of multilingual language learning: the age of onset of the additional language and that of previously acquired languages, social and affective factors, instruction, language proficiency and literacy, the typology of the background languages and the role they play in shaping syntax, lexicon, and other components of a L3. The idea for this book emanates from the symposium Multilingualism, language proficiency and age, organized by Camilla Bardel and Laura Sánchez at Stockholm University, Department of Language Education, in December 2016.

[Theoretical and Applied Perspectives on Teaching Foreign Languages in Multilingual Settings](#) Springer

This volume offers fresh perspectives on a controversial issue in applied linguistics and language teaching by focusing on the use of the first language in communicative or immersion-type classrooms. It includes new work by both new and established scholars in educational scholarship, second language acquisition, and sociolinguistics, as well as in a variety of languages, countries, and educational contexts. Through its focus at the intersection of theory, practice, curriculum and policy, the book demands a reconceptualization of code-switching as something that both proficient and aspiring bilinguals do naturally, and as a practice that is inherently linked with bilingual code-switching.
