Things Fall Apart Penguin UK

In this comprehensive response to the education crisis, the author of Teaching as a Subversive Activity returns to the subject that established his reputation as one of our most insightful social critics. Postman presents useful models with which schools can restore a sense of purpose, tolerance, and a respect for learning.

Wiley AP English Language and Composition Penguin

#1 New York Times bestseller "Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history."—Bill Gates "Monumental... an authoritative and disturbing morality tale."—Chicago Tribune The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, *The Great Influenza* provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, "The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart." At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a

century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.

A book that's built for you and your students. Flexible and innovative, American Literature & Rhetoric provides everything you need to teach your course. Combining reading and writing instruction to build essential skills in its four opening chapters and a unique anthology you need to keep students engaged in Chapters 5-10, this book makes it easy to teach chronologically, thematically, or by genre.

American Literature and Rhetoric Macmillan Higher Education

In twenty short books, Penguin brings you the classics of the environmental movement. With honesty, passion and heart, Terry Tempest Williams's essays explore the impact of nuclear testing, the vital importance of environmental legislation, and the guiding spirit of conservation. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

Where I Lived, and What I Lived For Research & Education Assoc.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

Its Nature, Origins and Transformations Routledge

The lives of two sisters--Nettie, a missionary in Africa, and Celie, a southern woman married to a man she hates--are revealed in a series of letters exchanged over thirty years

Letter from the Birmingham Jail Penguin UK

Fictionalism is the view that a serious intellectual inquiry need not aim at truth. It came to prominence in philosophy in 1980, when Hartry Field argued that mathematics does not have to be true to be good, and Bas van Fraassen argued that the aim of science is not truth but empirical adequacy. Both suggested that the acceptance of a mathematical or scientific theory need not involve belief in its content. Thus the distinctive commitment of fictionalism is that acceptance in a given domain of inquiry need not be truth-normed, and that the acceptance of a sentence from the associated region of discourse need not involve belief in its content. In metaphysics fictionalism is now widely regarded as an option worthy of serious consideration. This volume represents a major benchmark in the debate: it brings together an impressive international team of contributors, whose essays (all but one of them appearing here for the first time) represent the state of the art in various areas of metaphysical controversy, relating to language, mathematics, modality, truth, belief, ontology, and morality.

Cracking the AP English Language & Composition Exam, 2012 Vintage

Metaphysics: A Contemporary Introduction is for students who have already completed an introductory philosophy course and need a fresh look at the central topics in the core subject of metaphysics. It is essential reading for any student of the subject. This Fourth Edition is revised and updated and includes two new chapters on (1) Parts and Wholes, and (2) Metaphysical Indeterminacy or vagueness. This new edition also keeps the user-friendly format, the chapter overviews summarizing the main topics, concrete examples to clarify difficult concepts, annotated further reading at the end of each chapter, endnotes, and a full bibliography. Topics addressed include: the problem of universals the nature of abstract entities the problem of individuation the nature of modality identity through time the nature of time the nature of parts and wholes the problem of metaphysical indeterminacy the Realism/anti-Realism debate. Wherever possible, Michael J. Loux and Thomas M. Crisp relate contemporary views to their classical sources in the history of philosophy. As experienced teachers of philosophy and important contributors to recent debates, Loux and Crisp are uniquely qualified to write this book.

Reading, Writing, Rhetoric Clarendon Press

Based on Wardle and Downs' research, the first edition of *Writing about Writing* marked a milestone in the field of composition. By showing students how to draw on what they know in order to contribute to ongoing conversations about writing and literacy, it helped them transfer their writing-related skills from first-year composition to other courses and contexts. Now used by tens of thousands of students, *Writing about Writing* presents accessible writing studies research by authors such as Mike Rose, Deborah Brandt, John Swales, and Nancy Sommers, together with popular texts by authors such as Malcolm X and Anne Lamott, and texts from student writers. Throughout the book, friendly explanations and scaffolded activities and questions help students connect to

readings and develop knowledge about writing that they can use at work, in their everyday lives, and in college. The new edition builds on this success and refines the approach to make it even more teachable. The second edition includes more help for understanding the rhetorical situation and an exciting new chapter on multimodal composing. The print text is now integrated with e-Pages for *Writing about Writing*, designed to take advantage of what the Web can do. The conversation on writing about writing continues on the authors' blog, *Write On: Notes on Writing about Writing* (a channel on Bedford Bits, the Bedford/St. Martin's blog for teachers of writing).

Saving Our Children From Nature-Deficit Disorder Routledge

Metaphysical and ontological debates, concerning what exists and the nature of reality, are perennial features of the philosophical landscape. However, some have argued that ontological debates are non-substantive, pointless, trivial, incoherent, or impossible. Debates about whether tables exist, for example, or about the nature of reality, are taken to be in some way deficient. This has led to a burgeoning literature studying the nature of metaphysical and ontological disputes themselves. One major debate within this context concerns the language of ontology. The central question is whether the nature of language influences or limits our ability to engage productively in ontological disputes. While we typically think that our language describes the world, or at least can accurately describe the world, there have been many who have argued that the nature of language inherently influences and limits our attempts to understand the nature of reality—that our claims about what exists are, in fact, merely a reflection of how we happen to speak or think. The *Language of Ontology* collects chapters from established participants in the debate alongside new voices, to explore the range of issues relating to our ability or inability to get beyond the limits of our language.

The Story of the Deadliest Pandemic in History Beacon Press (MA)

The Book That Launched an International Movement “An absolute must-read for parents.” —The Boston Globe “It rivals Rachel Carson’s *Silent Spring*.” —The Cincinnati Enquirer “I like to play indoors better ‘cause that’s where all the electrical outlets are,” reports a fourth grader. But it’s not only computers, television, and video games that are keeping kids inside. It’s also their parents’ fears of traffic, strangers, Lyme disease, and West Nile virus; their schools’ emphasis on more and more homework; their structured schedules; and their lack of access to natural areas. Local governments, neighborhood associations, and even organizations devoted to the outdoors are placing legal and regulatory constraints on many wild spaces, sometimes making natural play a crime. As children’s connections to nature diminish and the social, psychological, and spiritual implications become apparent, new research shows that nature can offer powerful therapy for such maladies as depression, obesity, and attention deficit disorder. Environment-based education dramatically improves standardized test scores and grade-point averages and develops skills in problem solving, critical thinking, and decision making. Anecdotal evidence strongly suggests that childhood experiences in nature stimulate creativity. In *Last Child in the Woods*, Louv talks with parents, children, teachers, scientists, religious leaders, child-development researchers, and environmentalists who recognize the threat and offer solutions. Louv shows us an alternative future, one in which parents help their kids experience the natural world more deeply—and find the joy of family connectedness in the process. Now includes *A Field Guide with 100 Practical Actions We Can*

Take Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad Richard Louv's new book, *Our Wild Calling*, is available now.

When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

Metaphysics John Wiley & Sons

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.
