This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The 'War to end all Wars', as seen through the eyes of three young women War is being fought on a horrific scale in the trenches of France, but it might as well be a world away from sixteen-year-old New Zealander Midge Macpherson, at school in England learning to be a young lady. But the war is coming closer: Midge's brothers are in the army, and her twin, Tim, is listed as 'missing' in the devastating defeat of the Anzac forces at Gallipoli . Desperate to do their bit - and avoid the boredom of school and the restrictions of Society - Midge and her friends Ethel and Anne start a canteen in France, caring for the endless flow of wounded soldiers returning from the front. Midge, recruited by the over-stretched ambulance service, is thrust into carnage and scenes of courage she could never have imagined. And when the war is over, all three girls - and their Anzac boys - discover that even going 'home' can be both strange and wonderful. Kerala, on the south-western coast of India, was described as late as 1838, as 'God's Garden' by German missionary and scholar, Hermann Gundert. Even as this land continues to sustain its reputation, little is known about its social and cultural ethos. Lore and Legends of Kerala is a distillation of 48 of the most sparkling of the 800 or so stories that form Aithiyamala, the definitive collection of the myths and social history of Kerala. Aithiyamala, which was first published in 1909, is a compilation of narratives that were recorded by Kottarathil Sankunni and published by the Malayala Manorama newspaper and its literary journal Bhashaposhini. Peopled by sorcerers, spirits, dynamic women, and snakes and elephants, the stories of this grand collection explore universal human values like faith, commitment to spirituality, respect for elders, reverence for parents and mentors, love for the young, and compassion for dependants. Significantly, the stories range across all the religious groups of Kerala. A representative selection of the themes and stories of this classic work, this book includes illustrations by leading Malayalee artists C.N. Karunakaran and Namboodiri. This book has been designed to appeal to young readers who will find the stories interesting and the illustrations delightful, as also for enthusiasts of Indian literature and culture and general readers.

Britain, in the mid 21st century. A new prime minister, Lev Solokov is elected. In spite of his Russian surname, he is the charismatic politician who, on the surface, appears to be just what Britain needs. But he's not what Gavin needs. Gavin is a Pustoy, a human who, among countless others, Solokov's researchers has declared a soulless, subhuman race. Solokov joins a dark lineage of genocidal tyrants that have gone before him. In synthesizing his own race to persecute others, perhaps he has succeeded in a horror more insidious than any of his forebears, especially as he appears to have done so with both overwhelming public blessing and encouragement. Or at least he would have, if not for the increasing din of the Pustoy protesting outside his offices. Chosen at random owing to his position as a forefront campaigner for the rights of the Pustoy, Gavin is framed for a crime he didn't commit and is forced to go on the run, and so Solokov in one fell swoop kills any budding sympathy the people may have had for the Pustoy, and would appear to have silenced one of his loudest protestors. Just who are the Pustoy of this world? The persecutors or the persecuted? Will Gavin remain a hunted scapegoat? Is Solokov acting for the greater good; are the Pustoy really devoid of a soul? More importantly, how far away is this future, really? Phillippe Blenkiron's conceptual poetry collection demands these questions of the reader, whilst offering an unflinching examination of the human psyche, exploring the clouded moral hues between black and white, between right and wrong, that exist inside all of us. For fans of "1984," "Brave New World," and other greats of dystopian fiction, Philippe Blenkiron's debut poetry collection is shocking, unsettling, and closer to real-life than we dare admit...
