If you are one of those who love technology, not for technology's sake, but for what it can do for you, and if you want to be able to say that you "Know Computers" instead of "No Computers", this is the book for you! A First Course in Computers is a computer manual, quick guide, helpdesk and your computer teacher, all rolled in one. Just keep the book in front of you, look at the sample exercises given at the beginning of each section and start following the step-by-step visual instructions to complete the exercise. Learn easily and effectively—learn by doing. THIS BOOK COVERS Computer Background: Get to know a brief history of computers,

different parts of a computer...Basic Terms and Concepts: Demystify the computer jargon—bits & bytes, hardware & software, memory & storage...Windows 8:

Commonly used features and how to get the maximum out of them. How to customize your PC to your needs and preferences.Windows 8.1: What's new, as compared to Windows 8.MS Word: Create aesthetically appealing documents—letters, reports, memos, faxes, etc.— quickly and easily. Do spell check and mail merge, create office and personal templates, and a lot more...MS Excel: Create highly functional spreadsheets, involving tables, graphs and Clip Art images. Sort, filter and query data based upon single or multiple criteria...MS PowerPoint: Create effective and visually appealing presentations using text, graphs, movie & animation clips, images, organization charts, etc.Internet: What is Internet, how to set up a TCP/IP account and configure a modem, surf the Net, create free email accounts, send and receive emails, search the Web for jobs, friends, products, services or any subject, Internet chat and telephony...

Welcome to the Proceedings of ICCHP 2010! We were proud to welcome participants from more than 40 countries from all over the world to this year's ICCHP. Since the late 1980s, it has been ICCHP's mission to support and reflect development in the field of "Assistive Technologies," eAccessibility and inclusion. With a focus on scientific quality, ICCHP has become an important reference in our field. The 2010 conference and this collection of papers once again fulfilled this mission. The International Programme Committee, comprising 106 experts from all over the world, selected 147 full and 44 short papers out of 328 abstracts submitted to ICCHP. This acceptance ratio of about half of the submissions demonstrates our strict pursuit of scientific quality both of the programme and in particular of the proceedings in your hands. An impressive number of experts agreed to organize

"Special Thematic Sessions" (STS) for ICCHP 2010. These STS help to bring the meeting into sharper focus in several key areas. In turn, this deeper level of focus helps to collate a state of the art and mainstream technical, social, cultural and political developments.

The Forms of Slavery that Prevailed in Ancient Nations, Particularly in Greece and Rome. The African Slave Trade and the Political History of Slavery in the United States Springer Science & Business Media

The digital age has had a profound effect on our cultural heritage and the academic research that studies it. Staggering amounts of objects, many of them of a textual nature, are being digitised to make them more readily accessible to both experts and laypersons. Besides a vast potential for more effective and efficient preservation, management, and presentation, digitisation offers opportunities to work with cultural heritage data in ways that were never feasible or even imagined. To explore and exploit these possibilities, an interdisciplinary approach is needed, bringing together experts from cultural heritage, the social sciences and humanities on the one hand, and information technology on the other. Due to a prevalence of textual data in these domains, language technology has a crucial role to play in this endeavour. Language technology can break through the "Google barrier" by offering the potential to analyse texts at advanced levels, extracting information and knowledge at the level of the humanities or social sciences researcher, who wants to know about the who, what, where, and when, but also the how and the why. At the same time cultural heritage data poses considerable challenges for existing language technology: technology aimed at "generic" language has to face such disparate problems as historical language variation, OCR digitisation errors, and near-extinct academic expertise. This book is primarily intended for researchers in information technology and language processing who would like to receive a state-of-the-art overview of the whole breadth of the new and vibrant field of language technology for cultural heritage

and its associated academic research in the humanities and social sciences. Researchers working in the target domains of cultural heritage, the social sciences and humanities will also find this book useful, as it provides an overview of how language technology can help them with their information needs. The book covers applications ranging from pre-processing and data cleaning, to the adaptation and compilation of linguistic resources, to personalisation, narrative analysis, visualisation and retrieval.

McGraw Hill Professional

Containing instructions to the inexperienced in cutting out and completing those articles of wearing apparel, &c., which are usually made at home; also, explanations on upholstery, straw-plaiting, bonnet-making, knitting, &c.

Hawaii's Story Vikas Publishing House

After World War II, tracing and documenting Nazi victims emerged against the background of millions of missing persons and early compensation proceedings. This was a process in which the Allies, international aid organizations, and survivors themselves took part. New archives, documentation centers and tracing bureaus were founded amid the increasing Cold War divide. They gathered documents on Nazi persecution and structured them in specialized collections to provide information on individual fates and their grave repercussions: the loss of relatives, the search for a new home, physical or mental injuries, existential problems, social support and recognition, but also continued exclusion or discrimination. By doing so, institutions involved in this work were inevitably confronted with contentious issues—such as varying political mandates, neutrality vs. solidarity with those formerly persecuted, data protection vs. public interest, and many more. Over time, tracing bureaus and archives changed methods and policies and even expanded their activities, using historical documents for both research and public remembrance. This is the first publication

to explore this multifaceted history of tracing and documenting past and present.
