 Over generations, Australian women have envisaged a world of freedom. This new collection of documents - letters, songs, poetry, diary extracts - charts the visions that inspired women and the obstacles that confronted them. Exploring twentieth-century Australia, *Freedom Bound II* shows how intertwined were women's public and personal lives, and how bound by custom, ties, affections and duties. The different meanings of freedom have been shaped by the nature of women's oppression, their

quests given focus by their different points of departure. Aboriginal women sought self-determination and the right to keep their children; migrant women sought to affirm culture and family ties, and escape discrimination and poverty. Overburdened mothers wanted relief from continual childbearing and a measure of self-fulfilment. Numerous women have campaigned for freedom from domestic tyranny and male violence. Together with its companion volume, *Freedom Bound I*, which deals with the period of colonisation, this volume documents the dreams that inspired women, the pleasures and the pain that informed their politics and the desires

that enthralled them, even as they bade them to be free. It is an essential resource for students and teachers of Australian women's history.

**The Wheel Extended**

Bristol University Press

An essential overview as well as a theoretical critique for all students of design history.

Walker studies the intellectual discipline of Design History and the issues that confront scholars writing histories of design.

Taking his approach from a range of related fields, he discusses the problems of defining design and writing history. He considers the different methods that leading scholars have used in the absence of a theoretical framework, and looks critically at a number of histories of

design and architecture.

Andre Gorz is one of the most important contemporary socialist thinkers. He has acquired a reputation as an iconoclastic theorist who poses radical questions about the future of the Left. This is the first full length assessment of his work which critically evaluates all of his writings from the 1950s to the 1990s.

The outsourcing of domestic work in the UK has been steadily rising since the 1970s, but there has been little research which

has considered white British women working as independent cleaning service-providers. A cross-cultural analysis of two particular social contexts (one within the UK and one within India) based on new research argues that outsourced domestic cleaning can be undertaken either as work (using mental and manual skills) or as labour (usually defined as unskilled, 'natural' women's work) depending on the social context and working conditions. The book challenges feminist dogma and popular myths about housework.

Macmillan International Higher Education  
The Routledge History of Women in Europe since 1700 is a

landmark publication that provides the most coherent overview of woman's role and place in western Europe, spanning the era from the beginning of the eighteenth century until the twentieth century. In this collection of essays, leading women's historians counter the notion of 'national' histories and provide the insight and perspective of a European approach. Important intellectual, political and economic developments have not respected national boundaries, nor has the story of women's past, or the interplay of gender and culture. The interaction between women, ideology and female agency, the way women engaged with patriarchal and

gendered structures and systems, and the way women carved out their identities and spaces within these, informs the writing in this book. For any student of women's studies or European history, *The Routledge History of Women in Europe since 1700* will prove an informative addition to their studies.

For centuries science and faith have been drifting apart. Science lost its transcendent foundations, faith lost its credibility. Science conquered the future; faith got stuck in the past. Science unleashed unprecedented powers; faith became a private pastime. The economic and

ecological consequences are catastrophic. Science and faith must reconnect and lead the way out of the crisis.

This new study from Ben Highmore looks at the seemingly banal world of objects, work, daily media, and food, and finds there a scintillating array of passionate experience. Through a series of case studies, and building on his previous work on the everyday, Highmore examines our relationship to familiar objects (a favourite chair), repetitive work (housework, typing), media (distracted television viewing and radio listening) and food (specifically the food of multicultural

Britain). A chair allows him to consider the history of flat-pack furniture as well as the lively presence of inorganic 'stuff' in our daily lives. Distracted television watching and radio listening becomes one of the preconditions for experiencing wonder through the media. *Ordinary Lives* links the concrete study of routine existence to theoretical reflection on everyday life. The book discusses philosophers such as Jacques Rancière, William James and David Hume and combines them with autobiographical testimonies, historical research and the analysis of popular culture to investigate the minutiae of day-to-day life. Highmore argues that aesthetic

experience is embedded in the mundane sensory world of everyday life. He asks the reader to reconsider the negative associations of habit and routine, focusing specifically on the intrinsic ambiguity of habit (habit, we find out, is both rigid and adaptive). Rather than ask 'what does everyday life mean?' this book asks 'what does everyday life feel like and how do our sensual, emotional and temporal experiences interconnect and intersect?' Ordinary Lives is an accessible, animated and engaging book that is ideally suited to both students and researchers working in cultural studies, media and communication and sociology.

 Providing a comprehensive analysis of comparative gender difference in the EU, this book addresses a spectrum of gender issues. From employment and households, to culture, sexuality and male violence, the book transcends any 'economy/culture' divide. This wide coverage is placed within a conceptual view of structured 'gender cultures' which vary spatially and historically. Individual chapters are written around this common theme by an expert board of international contributors, drawn from a variety of intellectual and disciplinary backgrounds, allowing

the reader to compare between chapters and read across them.

*Socialist Economic Review* Brighton, Sussex : Wheatsheaf Books ; Bloomington : Indiana University Press  
This book is the first comprehensive survey of women in the Weimar Republic, exploring the diversity and multiplicity of women's experiences in the economy,

politics and society. Taking the First World War as a starting point, this book explores the great changes in the lives, expectations, and perceptions of German women, with new opportunities in employment, education and political life and greater freedoms in their private and social life, all played out in the media spotlight. Engaging with the most recent research and debates, this book portrays the Weimar Republic as a period of progressive change for young, urban women, to be stalled in 1933. This book will be essential reading for students and researchers of German women in the early twentieth century, and will also appeal to anyone interested in

the Weimar Republic and women's history. *Inside the Victorian Home* Manchester University Press  
The book offers one of the first detailed studies of South Asian women, it provides new empirical data on the issues apparent in South Asian women's lives by 'giving voice' to a group of women who would otherwise remain silent. It is based upon an ethnographic study of a small South Asian community in an inner city. The book offers a new and compelling account of South Asian women, as well as focussing on the ways in which gender and 'race' interact in women's lives. The book offers an important theoretical contribution to the area of feminist theory.

The concept of patriarchy is contested and reworked and applied to the study of South Asian women and their cultural experiences. In this sense, practices such as arranged marriages, dowries, domestic labour and domestic finance are analyzed as different influences of patriarchy inside the household, as well as education and the labour market as influences of patriarchy outside the household.

A middle class home, circa 1850, of the sort that many people live in today, is the focus of Judith Flanders' book.

The Victorian age is both recent and unimaginably distant. In the most prosperous and technologically advanced nation in the

world, people carried slops up and down stairs; buried meat in fresh earth to prevent mould forming; wrung sheets out in boiling water with their bare hands. This drudgery was routinely performed by the parents of people still living, but the knowledge of it has passed as if it had never been. Running water, stoves, flush lavatories - even lavatory paper - arrived slowly throughout the century; and most were luxuries available only to the prosperous. A Portrait of Domestic Life in Victorian England Cambridge University Press  
New developments in biotechnology radically alter our relationship with our bodies. Body tissues can now be used for commercial

purposes, while external objects, such as pacemakers, can become part of the body. Property in the Body: Feminist Perspectives transcends the everyday responses to such developments, suggesting that what we most fear is the feminisation of the body. We fear our bodies are becoming objects of property, turning us into things rather than persons. This book evaluates how well-grounded this

fear is, and suggests innovative models of regulating what has been called 'the new Gold Rush' in human tissue. This is an up-to-date and wide-ranging synthesis of market developments in body tissue, bringing together bioethics, feminist theory and lessons from countries that have resisted commercialisation of the body, in a theoretically sophisticated and practically significant approach.
