Critical Theory constitutes one of the major intellectual traditions of the twentieth century, and is centrally important for philosophy, political theory, aesthetics and theory of art, the study of modern European literatures and music, the history of ideas, sociology, psychology, and cultural studies. In this volume an international team of distinguished contributors examines the major figures in Critical Theory, including Horkheimer,

Adorno, Marcuse, Benjamin, and Habermas, as well as lesser known but important thinkers such as Pollock and Neumann. The volume surveys the shared philosophical concerns that have given impetus to Critical Theory throughout its history, while at the same time showing the diversity among its proponents that contributes so much to its richness as a philosophical school. The result is an illuminating overview of the entire history of Critical Theory in the twentieth century, an examination of its central conceptual concerns, and an in-depth discussion of its future prospects.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains

one of the most important books written about our divided world.
