KORBIN DEMARION

A Taste for Intrigue Yearling Books
One of the greatest defenders of faith answers penetrating questions about the meaning of life and the existence of a God who is there for his children, inviting readers on a journey through his life--from East to West and then back again. 85,000 first printing. \$40,000 ad/promo.
The Petroleum Handbook Mohr Siebeck
While working on what he hopes will be the world's first sentient computer, Neill Bassett tries to deal with unresolved feelings for his ex-wife as well as an intended one-night stand who is turning into much more. 75,000 first printing.
Problems and Practice in Foundation and Pavement Engineering Pearson Education
Drawn from our best-selling anthology, *The Bedford Introduction to Literature*, *Literature to Go* is a brief and inexpensive collection of stories, poems, and plays supported by the superior instruction you expect from a Michael

Meyer anthology. With literature from many periods, cultures, and diverse voices, the book is also a complete guide to close reading, critical thinking, and thoughtful writing about literature. The second edition features a new thematic chapter on our working lives and a new in-depth chapter on the fiction of Dagoberto Gilb, created in collaboration with the author himself—continuing the anthology's mission to present literature as a living, changing art form.

Treehouses Simon and Schuster
Stella's new life in Portbay is going well. The only hassle is Rachel and her gang, who still manage to make Stella feel like she doesn't belong... Then all this weird stuff happens to Rachel and her so-called mates start avoiding her. Should Stella come to her rescue, or is that possibly the worst idea she's ever had...?
Meet the Real World, Rachel Pearson Education India

This collection of essays aims to broaden and update scholarly approaches to Schumann, by considering his works and their reception in the context of various cultural and socio-institutional

frameworks, from mid-nineteenth-century politics, through Nazi Germany, to late-twentieth-century popular culture.

Rethinking Schumann Haynes Publications

Once upon a time, fairies were the stuff of bedtime stories and sweet dreams. Then came the mutations, and the dreams became nightmares. Mosquito-size fairies now indulge their taste for human blood—and for most humans, a fairy bite means insanity or death. Luckily, Annabelle Lee isn't most humans. The hard-drinking, smart-mouthed, bicycle-riding redhead is immune to fairy venom, and able to do the dirty work most humans can't. Including helping law enforcement— and Cane Cooper, the bayou's sexiest detective—collect evidence when a body is discovered outside the fairy-proof barricades of her Louisiana town. But Annabelle isn't equipped to deal with the murder of a six-year-old girl or a former lover-turned-FBI snob taking an interest in the case. Suddenly her already bumpy relationship with Cane turns even rockier, and even the most trust-worthy friends become suspects. Annabelle's life is imploding: between relationship drama, a heartbreaking murder investigation, Breeze-crazed drug runners, and a few too many rum and Cokes, Annabelle is a woman on the run—from her past, toward her future, and into the arms of a darkness waiting just for her. . . .

The Go Programming Language

Phrasebook Essential Go code and

idioms for all facets of the development process This guide gives you the code

“phrases” you need to quickly and effectively complete a wide variety of

projects with Go, today's most exciting

new programming language. Tested,

easy-to-adapt code examples illuminate

every step of Go development, helping

you write highly scalable, concurrent

software. You'll master Go-specific

idioms for working with strings,

collections, arrays, error handling,

goroutines, slices, maps, channels,

numbers, dates, times, files, networking,

web apps, the runtime, and more.

Concise and Accessible Easy to carry and

easy to use: Ditch all those bulky books

for one portable pocket guide Flexible

and Functional Packed with more than

100 customizable code snippets: Quickly

create solid Go code to solve just about

any problem Register your book at

This is the ideal reference for both new

and existing web developers who want

to be able to augment their skills and

showcase their content in a truly

professional manner.

I Need a Day to Pray Elsevier

Differential Geometry is a wide field. We

have chosen to concentrate upon certain

aspects that are appropriate for an

introduction to the subject; we have not

attempted an encyclopedic treatment. In

Book I, we focus on preliminaries.

Chapter 1 provides an introduction to

multivariable calculus and treats the Inverse Function Theorem, Implicit Function Theorem, the theory of the Riemann Integral, and the Change of Variable Theorem. Chapter 2 treats smooth manifolds, the tangent and cotangent bundles, and Stokes' Theorem. Chapter 3 is an introduction to Riemannian geometry. The Levi-Civita connection is presented, geodesics introduced, the Jacobi operator is discussed, and the Gauss-Bonnet Theorem is proved. The material is appropriate for an undergraduate course in the subject. We have given some different proofs than those that are classically given and there is some new material in these volumes. For example, the treatment of the Chern-Gauss-Bonnet Theorem for pseudo-Riemannian manifolds with boundary is new.

Essential technical information for building on expansive soils--complete with practical, proven design methods. *Expansive Soils* examines factors that influence the design of foundations and pavements built on expansive soils, and explores key design procedures and

remedial measures that address these factors effectively. Backed by the authors' extensive research and experience --including interviews with practicing engineers working with expansive soils --this authoritative volume is an important reference text for geotechnical and foundation engineers, geologists, construction professionals, and students. Easy to understand and apply, *Expansive Soils* contains: * Site investigation techniques for identification and classification of expansive soils * Heave prediction methods using different types of data --with rigorous treatment of soil suction theory and measurement, oedometer tests, and more * Alternative design procedures for drilled pier and slab-on-grade foundations, highway and airfield pavements * Treatment and chemical stabilization techniques --including salt treatment; moisture barriers; lime and cement stabilization; and other procedures * Remedial measures such as drainage control, and removal with replacement and compaction control * Sample problems illustrating practical applications.

Parenting with PACE to Nurture Confidence and Security in the Troubled Child OUP USA

On board diagnostics. 1997 model year (UN) Explorer. Related to the Ford Explorer repair manual (Part no. WM312). The 1997 service manual provides information covering emissions for 1997 Ford Motor Company trucks. Complete emissions related diagnostic procedures for all affected systems or components that are affected are covered in this manual. The descriptions and specifications contained in this manual were in effect at the time this manual was approved for printing.

Those connected with the petroleum industry will need no introduction to The Petroleum Handbook. It is a technically-oriented manual whose aim is to provide explanations of the processes of today's petroleum industry, from crude oil exploration to product end use, with some historical background and explanation of the economic context in which the oil, gas and petrochemical businesses operation. Much of the material in this sixth edition is completely new and includes the latest information on world oil and gas reserves, future prospects, transportation, storage, refining, marketing, research, and environmental conservation.

Methods in Protein Design A&C Black

The Grammy-winning gospel singer, wife, and mother offers her insights on prayer and the faith that has helped her through life's most overwhelming challenges.

Markers in Cardiology - AHA Henry Holt and Company

The work will explore issues related to educational leadership in various settings in the 21st century. It will argue that the context for leadership within many nation states and international scenarios involves interaction between multiple and diverse social cultures. A

further proposition is that the dominant leadership theory and discourse in the past reflects forms of western hegemony and mono-cultural assumptions drawn largely from the Anglo-American worldview. It will argue that such frameworks have limited validity in multicultural societies such as Australia, Britain, Canada, Europe and the USA and with indigenous communities within such nations. These societies contain significant populations which do not share the core values which inform established leadership practice and institutional paradigms in such nations. The consequence can often be insensitivity towards non-mainstream cultures, inappropriate structures, failed interventions and alienation of individuals from major institutions and traditions. Another proposition is that as more developing nations increase in affluence and view education as a key economic strategy, they become increasingly exposed to western discourses about leadership and management. Whilst acknowledging that western traditions have much to offer, there is a danger that this can involve forms of cultural imperialism whereby local traditions are ignored or subjugated. There is a need for developing nations to recognise and value the traditions and practices from their own cultures and assess the extent to which they are compatible with borrowings from other nations. Such processes require a sophisticated degree of reflective analysis to determine potential compatibilities and conflicts. This is an alternative to unmediated cultural borrowing, cloning, and hybridization. Western leadership scholars who work in such contexts have some responsibility to address this interaction instead of blithely offering

practices and recipes from their metropolitan world views. The final proposition is that there is a need to develop models and practices for intercultural dynamics which are responsive to intercultural complexity. When these are thoroughly developed there will be clear implications for education. The unique features of this book include;

- It introduces a new theoretical perspective on leadership and intercultural issues which builds upon the previous work of cross-cultural theorists from previous decades in educational leadership discourse
- It will explore the three primary contexts for leadership and intercultural interaction; with indigenous communities in nation states, with multicultural communities in nation states and with international education and development programs
- The book will draw upon a variety of authors from across the globe; from Australia, Britain, Canada, China, Fiji, Hong Kong, Mexico Sweden and the United States
- The book will provide opportunities for the development of comparative and wide ranging perspectives within specific fields. For instance students will be able to compare issues related to indigenous

education in New Zealand, Canada and Fiji. Multicultural perspectives can be informed by experiences from Britain, Canada and the US. One of the strong chapters in the book is on A First Nation leadership program in the US. International programs can be compared from contexts as diverse as Bellarus, China and Pacific Islands.

- As such the book will supplement and challenge the mono-cultural texts which tend to dominate leadership preparation programs in both developed and developing nations. The intended audience for this book includes academics and students in the fields of education, health, public administration and community development in both the developed and developing world. It will also appeal to practitioners in national state and local sites who operate in intercultural contexts.
