### **Media Education in Asia**

Media education in Asia is a relatively  
 young, but rapidly developing part of the  
 curriculum. Research has been  
 conducted and papers have been written  
 on various issues concerning media

education in Asia. The dominant models of media education in the world are broadly Western and most are drawn from English-speaking countries. The question is whether a similar pattern exists in Asia, where there may be differences in culture, heritage, beliefs, values, education policy, as well as curriculum and pedagogy. Are educators in Asia following the Western model in developing and implementing media

education, or are they devising their own models? With this question in mind, this book sets out to understand the prevailing perspectives regarding media education in various Asian societies. While most debates about media education are carried out in Western contexts, this book hopes to provide a platform for readers to examine this issue in an Asian context.
