This book explores how people may use music in ways that are helpful for them, especially in relation to a sense of wellbeing, belonging and participation. The central premise for the study is that help is not a decontextualized effect that music produces. The book contributes to the current discourse on music, culture and society and it is developed in dialogue with related areas of study, such as music sociology, ethnomusicology, community psychology and health promotion. *Where Music Helps* describes the emerging movement that has been labelled Community Music Therapy, and it presents ethnographically informed case studies of eight music projects (localized in England, Israel, Norway, and South Africa). The various chapters of the book portray "music's help" in action within a broad range of contexts; with individuals, groups and communities - all of whom have been challenged by illness or disability, social and cultural disadvantage or injustice. Music and musicing has helped these people find their voice (literally and metaphorically); to be welcomed and to welcome, to be accepted and to accept, to be together in different and better ways, to project alternative messages about themselves or their community and to connect with others beyond their immediate environment. The overriding theme that is explored is how music comes to afford things in concert with its environments, which may suggest a way of accounting for the role of music in music therapy without reducing music to a secondary role in relation to the "therapeutic," that is, being "just" a symbol of psychological states, a stimulus, or a text reflecting socio-cultural content.

Actors know about "falling up": a split-second ignition from the wings, propelling entrance as a new character, an unwilling ascent to a different mode of being, an in-body experience that overlays preparation, opportunity, choice, or chance. *Falling Up*, the first and only full-length Floyd study, is a metaphor for humanity's uncanny ability to rise from seeming disaster into rebirth. Floyd's consistent succession of soars, stumbles, slides, or wrenches sings of triumph over odds. A modern Renaissance man, Floyd is our greatest living opera composer and librettist, a trained concert pianist, a master stage director, and a teacher. In *Falling Up*, Holliday offers an intimate account of the life that shaped the words and music. Combining insights from hundreds of interviews with Floyd, his family, and many of the last half-century's greatest singers, conductors, and opera administrators, *Falling Up* traces Floyd's Southern roots and the struggles and sacrifices that accompanied his rise to operatic stardom. With more than forty photographs, the detailed evolution of Floyd's fourteen operas, and in-depth analysis of his nonoperatic works, *Falling Up* is essential reading for opera fans and professionals alike, a book that moves, informs, and entertains.

The Musical Times and Singing-class Circular Rowman & Littlefield

During the American Civil War, songs united and inspired people on both sides. The North had a well-established music publishing industry when the war broke out, but the South had no such industry. The importance of music as an expression of the South's beliefs was obvious; as one music publisher said, "The South must not only fight her own battles but sing her own songs and dance to music composed by her own children." Southern entrepreneurs quickly rose to the challenge. This reference book is distinguished by three major differences from previously published works. First, it lists sheet music that is no longer extant (and listed nowhere else). Second, it gives complete lyrics for all extant songs, a rich source for researchers. And third, a brief historical background has been provided for many of the songs. Each entry provides as much of the following as possible (staying faithful to the typography of each title page): the title as published, names of all lyricists, composers and publishers; dates of publication; cities of publication; and if applicable, the names of catalogs or magazines in which the song appeared. Music published in Southern cities under Federal occupation is excluded.

The Confident Choir McFarland

Charles Villiers Stanford wrote two cycles of songs for baritone with orchestra and chorus, setting nautical verses by the popular poet Henry Newbolt. From its premiere at the Leeds Musical Festival in October 1904, *Songs of the Sea* was a great success; *Songs of the Fleet* followed in 1910 and was transparently modeled on it (even quoting from the earlier work). Both works became very popular among amateur choral societies. *Songs of the Sea* was published in full score a year after its composition; it now appears in a critical edition for the first time in the present volume, which also includes the first publication of the orchestral version of *Songs of the Fleet*. Both works demonstrate Stanford's mastery of orchestral technique and sureness of touch. Newbolt's texts alternate between heroic and sentimental moods; Stanford responded with music that is dramatic and atmospheric—indeed, with some of the most remarkable textures of his whole oeuvre.

Where Music Helps: Community Music Therapy in Action and Reflection Syracuse University Press

The Confident Choir is an exploration of conditions affecting the confidence levels in singers of all levels to create an accessible synthesis of the psychological models and offer practical confidence-building strategies for conductors, teachers, community musicians, and workshop leaders. Michael Bonshor combines his experience as a singing teacher and choral director with a series of in-depth interviews that give an intimate

depiction of the challenges faced by the contemporary choral singer. These insights provide the basis for a range of suggested techniques to bolster confidence and reduce anxiety in the group-singing context. This book is primarily designed as a guide for leaders of amateur group singing activities and is relevant to choirs of all sizes and genres. The content will appeal to singers, teachers, and choir leaders; students and scholars in the fields of choral research, community music, music psychology, and adult education; and educators training the musical leaders of the future.

A provocative, inspiring account of our neglected American ideals and the people who are living them today--and restoring our nation's dream Patriotism has become a loaded word: one that is wielded against people with whom we might disagree, or whose cultural origins don't match our own. But our founding fathers--Washington, Jefferson, Adams, and others--saw patriotism as a dynamic force: an act of service, in an evolving nation that defined its purpose by offering all people a better way of life. In *Authentic Patriotism*, author and award-winning journalist Stephen P. Kiernan explores the original ideals that have been lost in our current climate, where war and economic turmoil have eroded our sense of civic obligation. Kiernan describes "a nation adrift," out of touch with its origins--and then introduces a range of inspiring people who have revived our national purpose by taking action: - The out-of-work college graduate who led an

economic and environmental renewal of her blighted home community. - The retired executive who pioneered a revolutionary concept in health care for people without insurance. - The minister who created a legendary choir, with the goal of uniting children of different races, genders, and classes in one voice. - The family who donated their daughter's heart, so that another might live. These and other "New Americans" are profiled in a book that offers hope, ideas, examples, and practical resources for readers who want to renew the American spirit.
