**Care** Organizational Behavior BEHAVIOR IN ORGANIZATIONS, 9/e, by Shani and Lau, is a paperback text that takes a hands-on, experiential approach (learning-by-doing or learning-in-action) to organizational behavior. The majority of the exercises, role-playing simulations, and cases were developed in and for management training workshops. The cases themselves represent different industries and organizations around the globe with diverse size, product, service, and cultures. Instructors appreciate the multiple interactive teaching methods for each teaching module. Experiential methods provide a powerful stimulus for learning, growth, and change by helping participants focus on their own behaviors and reactions as data. The text begins with structured, less personal exercises that are readily recognized as relevant to human effectiveness in organizational settings. Personal growth and self-understanding activities are introduced later in the text, after students have had enough experience to become more comfortable and ready for them. The ninth edition of this book, like the

previous editions, is designed to meet needs that other texts do not satisfy.

### Experiential Approach to Organization Development McGraw-Hill/Irwin

This work explores how external constraints affect organizations and provides insights for designing and managing organizations to mitigate these constraints. All organizations are dependent on the environment for their survival. It contends that it is the fact of the organization's dependence on the environment that makes the external constraint and control of organizational behaviour both possible and almost inevitable. Organizations can either try to change their environments through political means or form interorganizational relationships to control or absorb uncertainty.
