Clinical Child Interview person interviewing a child witness faces two major tasks: 1. to elicit a complete, credible account of the offence; 2. to protect the child's psychological well-being, which has been seriously harmed by the abuse experience. Successful performance of these tasks requires deep understanding of developmental processes

The Child Interview. Practice Guidelines unique and highly acclaimed the clinical interview of the child uses actual interviews with children to show readers how to apply a developmental biopsychosocial framework for understanding the inner lives of children at different ages and stages it outlines proven techniques for helping infants and children to reveal their feelings thoughts and behaviors during the clinical interview the clinical child interview - don-simmonds.co.uk To obtain a child's perspective during a

mental health assessment, he or she is usually interviewed. Although researchers and clinicians generally agree that it is beneficial to hear a child's account of his or her presenting issues, there is debate about whether children provide reliable or valid clinical information during these interviews. Clinical Child Psychology Interviews with children about the child interview is designed to

elicit information about the child's own understanding of the problematic behavior. The clinician is also interested in learning what the child thinks causes those problems. The interview will typically explore the child's emotions surrounding the concerns of their caregivers and teachers. Step 2: Clinical Interviews - ADHD: Attention Deficit ... "John" - the
