businesses and organizations. From promising startups to Fortune 500 companies, Babin and Willink have helped scores of clients across a broad range of industries build their own high-performance teams and dominate their battlefields. Now, detailing the mind-set and principles that enable SEAL units to accomplish the most difficult missions in combat, Extreme

Ownership shows how to apply them to any team, family or organization. Each chapter focuses on a specific topic such as Cover and Move, Decentralized Command, and Leading Up the Chain, explaining what they are, why they are important, and how to implement them in any leadership environment. A compelling narrative with powerful instruction and direct application, Extreme Ownership

revolutionizes business management and challenges leaders everywhere to fulfill their ultimate purpose: lead and win.

TRADOC Pamphlet TP 600-4 The Soldier's Blue Book St. Martin's Press
"An excellent, vividly written" (The Washington Post) account of leadership in wartime that explores how four great democratic statesmen—Abraham Lincoln, Georges Clemenceau,

Winston Churchill, and David Ben-Gurion—worked with the military leaders who served them during warfare. The relationship between military leaders and political leaders has always been a complicated one, especially in times of war. When the chips are down, who should run the show—the politicians or the generals? In Supreme Command, Eliot A. Cohen expertly

argues that great statesmen do not turn their wars over to their generals, and then stay out of their way. Great statesmen make better generals of their generals. They question and drive their military men, and at key times they overrule their advice. The generals may think they know how to win, but the statesmen are the ones who see the big picture. Abraham Lincoln, Georges Clemenceau,

Winston Churchill, and David Ben-Gurion led four very different kinds of democracy, under the most difficult circumstances imaginable. They came from four very different backgrounds—backwoods lawyer, dueling French doctor, rogue aristocrat, and impoverished Jewish socialist. Yet they faced similar challenges. Each exhibited mastery of detail and fascination with technology. All

four were great learners, who studied war as if it were their own profession, and in many ways mastered it as well as did their generals. All found themselves locked in conflict with military men. All four triumphed. The powerful lessons of this “brilliant” (National Review) book will touch and inspire anyone who faces intense adversity and is the perfect gift for history buffs of all

backgrounds. *The Mask of Command* Presidio Press How does an ordinary person become a hero? It happens in a split second, a moment of focus and clarity, when a choice is made. Here are the gripping accounts of Medal of Honor recipients who demonstrated guts and selflessness on the battlefield and confronted life-threatening danger to make a

difference. There are the stories of George Sakato and Vernon Baker—both of whom overcame racial discrimination to enlist in the army during World War II (Sakato was a second-generation Japanese American, Baker an African American) and went on to prove that heroes come in all colors—and Clint Romesha, who led his outnumbered fellow soldiers against a

determined enemy to prevent the Taliban from taking over a remote U.S. Army outpost in Afghanistan. Also included are civilians who have been honored by the Congressional Medal of Honor Foundation for outstanding acts of bravery in crisis situations, from a school shooting to the 9/11 attacks on the World Trade Center. Adding depth and context are

illuminating essays on the combat experience and its aftermath, covering topics such as overcoming fear; a mother mourning the loss of her son; and “surviving hell” as a prisoner of war.

Choosing Courage

Harvard Business Press *The Courage to Be* introduced issues of theology and culture to a general readership. The book examines ontic, moral,

and spiritual anxieties across history and in modernity. The author defines courage as the self-affirmation of one's being in spite of a threat of nonbeing. He relates courage to anxiety, anxiety being the threat of non-being and the courage to be what we use to combat that threat. Tillich outlines three types of anxiety and thus three ways to display the courage to be. Tillich writes

that the ultimate source of the courage to be is the "God above God," which transcends the theistic idea of God and is the content of absolute faith (defined as "the accepting of the acceptance without somebody or something that accepts"). Casemate Bomber combat crews faced a wide array of perils as they flew over German territory. Bursts of heavy flak could tear the wings from their planes in a split second. Flaming bullets from German fighter planes could explode their fuel tanks, cut their oxygen supplies, destroy their engines. Thousands of young men were shot, blown up, or thrown from their planes five miles above the earth; and even those who returned faced the subtler dangers of ice and fog as they tried to land their battered aircraft back home. The winter of 1944 was the most dangerous time to be a combat airman in RAF Bomber Command. The chances of surviving a tour were as low as one in five, and morale had finally hit rock bottom. In this comprehensive history of the air war that year, Kevin Wilson describes the most dangerous period of the Battle of Berlin, and the unparalleled losses over Magdeburg, Leipzig and Nuremberg. Men of Air reveals how these ordinary men coped with the

extraordinary pressure of flying, the loss of their colleagues, and the threat of death or capture. Brilliantly placing these stories within the context of The Great Escape, D-Day, the defeat of the V1 menace, and more, Wilson shows how the sheer grit and determination of these "Men of Air" finally turned the tide against the Germans. Courage will be a valuable resource for anyone who is interested in the military and social history of New Zealand. It is a comprehensive history of the Royal New Zealand Armoured Corps, the Mounted Rifles and predecessor units ...' — Governor-General Dame Cindy Kiro, Foreword The product of painstaking, multi-year research by esteemed historian and author Matthew

Wright, this richly illustrated hardback is a must-have for the history reader. Part 1 covers the colonial cavalry that fought in the NZ Wars and Anglo-Boer War, then Part 2 moves to the Mounted Rifles distinguishing themselves in the First World War, at the end of which the tank came into play. Part 3 describes the Armoured Corps' varied roles in the Second World War; Part 4 details what Wright calls

an 'armoured evolution', through actions from the Korean War to Vietnam and Part 5 records action in East Timor and Afghanistan, and modern challenges, rounding out this readable story. The appendices include rolls of honour, lists of vehicles and organisational charts. Extreme Ownership McGraw Hill Professional General Sir David Richards is one of the best known British

generals of modern times. In 2013 he retired after over forty years of service in the British Army and a career that had seen him rise from junior officer with 20 Commando to Chief of the Defence Staff, the professional head of the British Armed Forces. He served in the Far East, Germany, Northern Ireland and East Timor. He was the last Governor of Berlin's Spandau Prison, when

Rudolf Hess, Hitler's deputy, was its sole prisoner. In 2005 he was appointed Commander of the Allied Rapid Reaction Corps in Afghanistan and as commander of NATO forces became the first British General to command US Forces in combat since the Second World War. In 2000, Richards won acclaim when he brought together a collation of forces in Sierra Leone

to stop the ultra-violent Revolutionary United Front from attacking the capital, Freetown. In so doing he ended one of the bloodiest civil wars to bedevil the region. He did so without the official sanction of London, and failure could have cost him his career. As Chief of the Defence Staff he advised the government during the crises and interventions in Libya and Syria and oversaw the controversial Strategic

Defence and Security Review. Taking Command is Richards' characteristically outspoken account of a career that took him into the highest echelons of military command and politics. Written with candour, and often humour, his story reflects the changing reality of life for the modern soldier over the last forty years and offers unprecedented insight into the readiness

of our military to tackle the threats and challenges we face today. **The Courage to Accept** Simon and Schuster Get all the support and guidance you need to succeed in developing courage. Moral Courage Or Heresy* John Wiley & Sons How to build a culture of high performance within your organization The U.S. military in general, and its many elite organizations in particular, possesses a culture of high performance. Courage to

Execute outlines the six basic principles that operate at the foundation of high performance, which include leadership, organization, communication, knowledge, experience, and discipline, known together as LOCKED. When all are practiced effectively, teamwork emerges. But the most elusive quality that exists at the heart of all elite military teams, the element that organizations and

businesses deeply desire to perform more efficiently and effectively, is trust. Trust is easily spent, but hard won. Author James Murphy, an employer of approximately fifty senior military officers that have served in elite units such as the U.S. Navy Blue Angels, U.S. Navy SEALs, and U.S. Army Rangers, shares a multitude of personal leadership stories that illustrates the principles of LOCKED.

Shares compelling anecdotes from leaders in elite units of the U.S. Military. Written by James D. Command is the ultimate service. It is a time when we have the singular responsibility to create and lead strong Air Force units. A time when our passion for our Air Force and our vision for its future must be overwhelmingly clear. Early in the "Developing Aerospace Leaders" initiative, we began to focus on the way in

which the institution teaches leadership and prepares airmen for command. What we found was a wide range of practices and a wide range of expectations - a complicating factor in today's Expeditionary Aerospace Force. We realize that preparing our officers to command effective, mission-oriented units must be a deliberate process. It must develop our unique

airman perspective, creating commanders who are able to communicate the vision, have credibility in the mission area, and can lead our people with inspiration and heart. The foundation of our institution's effectiveness has always been its leaders. Colonel Goldfein's work provides valuable lessons learned and serves as a

worthwhile tool to optimize your effectiveness as a squadron commander. This book is a must-read, not only for those selected to command a squadron but for all our young officers, helping them understand what the requirements of squadron command will be. Remember, command is a unique privilege - a demanding and crucial position in our Air Force. "Sharing

Success - Owning Failure" takes you a step closer to successfully meeting that challenge. Command of the Seas WaterBrook Analyzes the leadership and strategies of three forefront military leaders from the ancient world, offers insight into the purposes behind their conflicts, and shows what today's leaders can glean from their successes and failures.
