Africa in World
HistoryFrom

Prehistory to
the Present
Revealing the
central yet
intentionally
obliterated
role of Africa
in the creation
of modernity,
Born in
Blackness

vitality
reframes our
understanding
of world
history.
Traditional
accounts of
the making of
the modern
world afford a
place of

primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the “New World.” Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has

long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the

economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe’s dehumanizing engagement with the “dark” continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe’s yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold

with
legendarily
rich Black
societies
sequestered
away in the
heart of West
Africa.
Creating a
historical
narrative that
begins with
the
commenceme
nt of
commercial
relations
between
Portugal and
Africa in the
fifteenth
century and
ends with the
onset of World
War II, Born in
Blackness
interweaves
precise
historical
detail with
poignant,
personal

reportage. In
so doing, it
dramatically
retrieves the
lives of major
African
historical
figures, from
the
unimaginably
rich medieval
emperors who
traded with
the Near East
and beyond,
to the Kongo
sovereigns
who heroically
battled
seventeenth-
century
European
powers, to the
ex-slaves who
liberated
Haitians from
bondage and
profoundly
altered the
course of
American
history. While

French
cogently
demonstrates
the centrality
of Africa to
the rise of the
modern world,
Born in
Blackness
becomes, at
the same
time, a far
more
significant
narrative, one
that reveals a
long-
concealed
history of
trivialization
and, more
often, elision
in depictions
of African
history
throughout
the last five
hundred
years. As
French shows,
the
achievements

of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siload and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day. “Capacious and compelling”

(Laurent Dubois), *Born in Blackness* is an epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on our present world. There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. *The History of Africa* redresses this by letting the perspectives

of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African

concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website

provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to

African history. *Modern Africa* Routledge Walking Qur'an: Islamic Education, Embodied Knowledge, and History in West Africa **Eastern and Southern Africa in World History, 1000 B.C. to A.D. 400** Farrar, Straus and Giroux Basil Davidson's famous book - - now updated in a welcome Third Edition -- reviews the social and political history of Africa in the

twentieth century. It takes the reader from the colonial era through the liberation movements to independence and beyond. It faces squarely the disappointments and breakdowns that have dulled the early successes of the post-colonial era; yet, for all the sorrows and uncertainties of Africa today, Basil Davidson shows how much has been achieved since decolonization

, and the mood of his new final chapter is hopeful and buoyant. UNESCO Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only

hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

The Daily Show (The Book) James Currey Publishers In An African Classical Age, Christopher Ehret brings to light 1,400 years of social and economic transformation across Africa from Uganda and Kenya in the north to Natal and the Cape in the south. The book offers a much-needed portrait of this region during a crucial period in which basic features of precolonial African societies and cultures emerged. Combining the most recent findings of archaeology and historical linguistics, the author demonstrates that, from 1000 B.C. through the fourth century A.D., eastern and southern African history was invigorated by technological change and intricately reshaped by the clash of distinctive cultures. Contrary to common presumption, he argues, Africans of this period were not isolated actors on their own historical

stage, but direct and indirect participants in the major trends of contemporary world history, such as the Iron Age and the first great rise of long-distance commercial enterprise. In telling their important story, Ehret shows how powerful yet delicate a tool language evidence can be in detecting both the details and the long-term contours of the past. The culmination of twenty-five

years of research, this sweeping historical survey fundamentally challenges how we view the place not only of eastern and southern Africa, but of Africa as a whole, in the early eras of world history. Now available in paperback, *An African Classical Age* has become an essential resource for scholars of linguistics, archaeology, world history, and African studies.

Routledge
The new, fully-updated edition of the acclaimed textbook

covering 200 years of African history. A History of Modern Africa explores two centuries of the continent's political, economic, and social history. This thorough yet accessible text help readers to understand key concepts, recognize significant themes, and identify the processes that shaped the modern history of Africa. Emphasis is placed on the consequences of colonial rule, and the

links between the precolonial and postcolonial eras. Author Richard Reid, a prominent scholar and historian on the subject, argues that Africa's struggle for economic and political stability in the nineteenth century escalated and intensified through the twentieth century, the effects of which are still felt in the present day. The new third edition offers substantial updates and

revisions that consider recent events and historiography. Greater emphasis is placed on African agency, particularly during the colonial period, and the importance of the long-term militarization of African political culture. Discussions of the postcolonial period have been updated to reflect recent developments, including those in North Africa.

Adopting a long-term approach to current African issues, this text: Explores the legacies of the nineteenth century and the colonial period in the context of the contemporary era Highlights the role of nineteenth century and long-term internal dynamics in Africa's modern challenges Combines recent scholarship with concise and effective narrative Features maps,

A prizewinning historian's epic account of the scramble to control equatorial Africa In just three decades at the end of the nineteenth century, the heart of Africa was utterly transformed. Virtually closed to outsiders for centuries, by the early 1900s the rainforest of the Congo River basin was one of the most brutally exploited places on earth. In *Land of Tears*, historian Robert Harms

reconstructs the chaotic process by which this happened. Beginning in the 1870s, traders, explorers, and empire builders from Arabia, Europe, and America moved rapidly into the region, where they pioneered a deadly trade in ivory and rubber for Western markets and in enslaved labor for the Indian Ocean rim. Imperial conquest followed close behind. Ranging from

remote African villages to European diplomatic meetings to Connecticut piano-key factories, Land of Tears reveals how equatorial Africa became fully, fatefully, and tragically enmeshed within our global world.

Patrick Manning follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe, Asia, and the Americas. In joining these stories, he shows how the waters of the Atlantic Ocean, the Mediterranean Sea, and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these

patterns resembled those of a number of connected diasporas concurrently taking shaping across the globe. Manning begins in 1400 and traces the connections that enabled Africans to mutually identify and hold together as a global community. He tracks discourses on race, changes in economic circumstance, the evolving character of family life, and the growth of popular culture. He

underscores the profound influence that the African diaspora had on world history and demonstrates the inextricable link between black migration and the rise of modernity. Inclusive and far-reaching, The African Diaspora proves that the advent of modernity cannot be fully understood without taking the African peoples and the African continent into account. J D Fage

This period of some 9,000 years of history has been sub-divided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the

corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.-

A History Through Culture
Fortress Press
This edited volume addresses the root causes of Africa's

persistent poverty through an investigation of its longue durée history. It interrogates the African past through disease and demography, institutions and governance, African economies and the impact of the export slave trade, colonialism, Africa in the world economy, and culture's influence on accumulation and investment. Several of the chapters take a comparative

perspective, placing Africa's developments aside other global patterns. The readership for this book spans from the informed lay reader with an interest in Africa, academics and undergraduate and graduate students, policy makers, and those in the development world. Now fully revised and updated, this classic text offers an illustrated and critical narrative introduction to the history of Africa from earliest times to the present. Beginning with the evolution of mankind itself, the book traces the history of Africa through the millennia of the ancient world to the centuries of medieval and modern Africa. The clear and simple language and the wealth of carefully

chosen maps and photos combine to make an essential and accessible text. *South Africa in World History* Cambridge University Press "This book tells the story of an African world that grew out of more than one thousand years of trans-Saharan trade linking the Mediterranean lands of North Africa with the internal Sudanic grasslands stretching from the Nile River to the Atlantic

Ocean. It traces the early role of the Sahara, the globe's largest desert, as a divider that separated these two regions into very different worlds. During the heyday of camel caravan traffic--from the eighth-century CE Arab invasions of North Africa to the early-twentieth-century building of European colonial railroads that linked the Sudan with the Atlantic--the Sahara became one of the world's

great commercial highways. The most enduring impact of this trade and the common cultural reference point of trans-Saharan Africa was Islam. This faith played various roles throughout the region, as a legal system for regulating trade, an inspiration for reformist religious-political movements, and a vehicle of literacy and cosmopolitan

knowledge that inspired creativity--often of a very unorthodox kind--within the various ethno-linguistic communities of the region. From the mid-1400s, European voyages to the coast of West and Central Africa provided an alternative international trade route that marginalized trans-Saharan commerce in global terms but stimulated its accelerated

local growth. Inland territorial conquest by France and Britain in the 1800s and early 1900s brought more serious disruptions. Trans-Saharan culture, however, not only adapted to these colonial and postcolonial changes but often thrived upon them to remain a living force well into the twenty-first century"--
