One factor that distinguishes older drivers from their younger and middle-aged counterparts is a higher prevalence of medical conditions, and the medications used to treat them. Often, the medical conditions that are more prevalent among older people lead to impairments in visual, cognitive, or psychomotor functions needed to drive safely. Similarly, while some medications restore function and improve mobility for those who would otherwise be unable to drive, an array of potentially driver impairing (PDI) prescriptions and over-the-counter medications have been associated with a statistically significant increase in crash risk. The current understanding of how medical conditions can affect driving is based on the opinions of medical (including rehabilitation) professionals or traffic safety experts, or has been derived from simulation research. Other studies have compared the driving records of drivers whose licenses were restricted as a result of reported medical conditions to those of matched controls with the same conditions who had full driving privilege. However, there is a dearth of empirical data about the relationships between medical conditions common among older adults and either performance or safety outcomes of drivers under realistic driving situations. Further, few studies have explored how people with such conditions may limit their driving exposure.

The Accounting and Review Services Committee (ARSC) has issued Statement on Standards for Accounting and Review Services No. 21, Statements on Standards for Accounting and Review Services: Clarification and Recodification. The issuance of SSARS No. 21 represents a major milestone in the ARSC's project to clarify and revise the standards for reviews, compilations, and

engagements to prepare financial statements. To assist readers to easily locate information, a detailed table of contents is provided at the beginning of the SSARS. This statement recodifies and supersedes all outstanding SSARSs through No. 20, except SSARS No. 14, Compilation of Pro Forma Financial Information. SSARS No. 21 is effective for reviews, compilations, and engagements to prepare financial statements for periods ending on or after December 15, 2015 but early implementation is permitted. This statement is a standalone SSARS and is not a codification of all clarified SSARSs. This statement has been codified in AICPA Professional Standards, which contains a complete codification of Statements on Standards for Accounting and Review Services. Practitioners are advised to use the codified version of this SSARS as they prepare to evaluate and update their methodologies, and prepare for changes precipitated by the clarity project.

The Anticorruption Manual: A Guide for State Prosecutors provides a comprehensive overview of prosecuting corruption in the United States. This is the first publication in 30 years dedicated to guiding prosecutors who investigate and charge public corruption crimes. It is the first-ever publication designed specifically to address the needs of state and local corruption prosecutors. The Anticorruption Manual:* Provides tools and tips for prosecutors initiating or managing a corruption investigation.* Outlines the mechanics of real-world corruption cases, written by the prosecutors who investigated and charged these cases.* Highlights the ethical, statutory, and constitutional limits and obligations most likely to arise in corruption prosecutions, including how to balance the public's interest in a case with the defendant's right to a fair trial.* Explains various civil and administrative remedies that may be effective in corruption prosecutions. Additionally, the 30-chapter book includes information about legal and practical challenges facing prosecutors investigating judges, law enforcement, and government officials; the mechanics of a complex public corruption investigation; federal and state laws; challenges that may arise during corruption trials; ethical issues that may face corruption prosecutors; and civil and administrative relief that may be appropriate in some public corruption cases.

In Ferdinand Porsche - Genesis of Genius, author Karl Ludvigsen reveals a dynamic young innovator who helped to chart the course of the automobile through the first decades of the twentieth century. As early as 1900, at the age of 25, Ferdinand Porsche pioneered hybrid technology to power his automobile designs. Once gasoline gained dominance as the power-source of choice, Porsche became relentless in his goal to design the fastest and most durable automobiles in Europe. Ferdinand Porsche - Genesis of Genius explores in depth the unique combination of ambition, determination and genius that were the genesis of an automotive dynasty which has continued to thrive and expand for over a century.

The word 'Quattro', chosen by Audi for its pioneering high-performance four-wheel-drive cars, immediately captures glamour and excitement in the minds of all motorsport enthusiasts. This book, written by a leading journalist and Quattro devotee, explores 24 years of factory-prepared and factory-supported Quattros in motorsport, from 1980 to 2004. It is a tale that extends from rough rally stages to race tracks, from pine-fringed ice trails in the depths of European winters to the shimmering heat haze and melting asphalt of Texas street racing. Along the way, it explains how Quattros collected four world rally championships, five American driver/manufacturer crowns and a single-year haul of seven international touring car titles, plus numerous other honours. With the five-cylinder turbocharged Quattro in its original form, rallying in the early years yielded numerous wins, most of all in 1982, when seven victories in 11 world championship rallies brought the first title. With the short-wheelbase Sport added to Audi's armoury, 1984 became an all-action, all-conquering rallying season with two more world titles won, for drivers (Stig Blomqvist) and manufacturers. Three stunning Pike's Peak wins were achieved in America in successive years, for Michele Mouton (1985), Bobby Unser (1986) and Walter Röhrl (1987). Starting with double championships for the 200 quattro in TransAm (1988) and the 90 Quattro in IMSA (1989), racing success unfolded in America. Exuberant Hans Stuck was the star driver, but consistent team-mate Hurley Haywood captured that 1988 title. Touring car campaigns during the 1990s brought huge success, starting with fearsome V8 Quattro 'racing limos' in Germany. Global achievements followed with A4 Quattros in many national Super Touring series throughout Europe and in Australia, including Frank Biela's 1996 title-winning campaign in Britain. Audi continued to win on track in the new millennium as race versions of the S4 and RS6 captured five SCCA GT Championship titles in America.

Goldfrank's is the premier toxicology textbook that should be in every emergency department or poison center library. Whether you are a student, resident, or faculty, there is something here for you. If you are a toxicology fellow or poison specialist studying for your boards, this is your go-to book. I highly recommend this work... —The Journal of Emergency Medicine The best edition yet of the landmark text in medical toxicology A Doody's Core Title for 2020! Covering every aspect of poison management, this indispensable case-based resource has been thoroughly refreshed to deliver evidence-based principles viewed through the lens of an active bedside clinical practice. In no other reference will you find such a diverse roster of esteemed editors and authors who deliver expert insights into every type of toxicologic emergency, whether due to substance abuse or exposure to toxins. Fully referenced and supported by a cohesive organization and full-color format, Goldfrank's begins with a historical perspective on medical toxicology principles and the general approach to the patient. It then progresses to the fundamental principles of medical toxicology, encompassing biochemical and molecular concepts; the effect of xenobiotics on vital organs and body systems; and toxicologic principles in special populations. The Eleventh Edition of Goldfrank's Toxicologic Emergencies is the most rigorous volume to date, driven by a precise analysis of the latest medical literature and complex cases designed to facilitate differential diagnosis. New to this Edition:

- Additional cases and "Special Considerations" chapters designed to enhance clinical decision-making and patient outcomes
- New "Antidotes in Depth" provides timely, critical information on toxicologic treatment strategies
- New content on toxicogenomics explores its increasingly important role in predictive toxicology
- Chapter-ending bulleted summaries of key points
- Updated coverage of synthetics such as "K2"
- Revised chapters on medical, clinical, and chemical toxicology include updated insights on poison emergencies, treatment strategies, and risk assessment tools

Autonomous vehicles have the potential to bring major improvements in highway safety. Motor vehicle crashes caused an estimated 37,133 fatalities in 2017; a study by the National Highway Traffic Safety Administration (NHTSA) has shown that 94% of crashes are due to human errors. For this reason, federal oversight of the testing and deployment of autonomous vehicles has been of considerable interest.
