In 1950, Kathleen O'Malley and her two sisters were legally abducted from their mother and placed in an industrial school ran by the Sisters of Mercy order of nuns, who also ran the notorious Magdalene Homes. The rape of eight-year-old Kathleen by a neighbour had triggered their removal - the Irish authorities ruling that her mother must have been negligent. They were only allowed a strictly supervised visit once a year, until they were permitted to leave the harsh and cruel regime of the institution at the age of sixteen. But Kate survived her traumatic childhood and escaped her past by leaving for England and then Australia when the British government offered a scheme to encourage settlement there. Fleeing her past again, Kate worked as a governess in Paris and then returned to England where she trained as a beautician at Elizabeth Arden. She married and had a son. A turning point in Kate's life came when she applied to become a magistrate and realised that she had to confront her hidden personal history and make it public. This is her inspiring story.

Addressing the Impact of Trauma and Addiction within the Family Da Capo Lifelong Books

Draws on findings in a range of scientific disciplines to demonstrate how chronic fear in early childhood can be linked to common adult health issues, sharing illuminating case studies to reveal how compromises to an overworked fight-or-flight system have the potential to trigger such disorders as obesity, depression and addiction.

Beat Autoimmune Simon and Schuster

"A groundbreaking book showing the link between Adverse Childhood Experiences (ACEs) and adult illnesses such as heart disease, autoimmune disease, and cancer--Childhood Disrupted also explains how to cope with these emotional traumas and even heal from them. Your biography becomes your biology. The emotional trauma we suffer as children not only shapes our emotional lives as adults, it also affects our physical health, longevity, and overall wellbeing. Scientists now know on a biochemical level exactly how parents' chronic fights, divorce, death in the family, being bullied or hazed, and growing up with a hypercritical, alcoholic, or mentally ill parent can leave permanent, physical "fingerprints" on our brains. When we as children encounter sudden or chronic adversity, excessive stress hormones cause powerful changes in the body, altering our body chemistry. The developing immune system and brain react to this chemical barrage by permanently resetting our stress response to "high," which in turn can have a devastating impact on our mental and physical health. Donna Jackson Nakazawa shares stories from people who have recognized and overcome their

adverse experiences, shows why some children are more immune to stress than others, and explains why women are at particular risk. Groundbreaking in its research, inspiring in its clarity, Childhood Disrupted explains how you can reset your biology-- and help your loved ones find ways to heal"--

MenAlive is for everyone who wants to keep stress from shortening their lives and damaging their relationships. It is more than a book. MenAlive is a complete tool kit for relieving stress and bringing about lasting health. "80 percent of all illnesses are stress induced," says Woodson Merrell, M.D., Chairman of the Department of Integrative Medicine at Beth Israel Medical Center. Although stress impacts everyone, men are particularly vulnerable. According to social scientist Dr. Thomas Joiner, "Males experience higher mortality rates than females at all stages of life from conception to old age." Diamond, best-selling author of *Surviving Male Menopause* and *The Irritable Male Syndrome*, teaches men and women four simple, yet effective, practices that can be used to prevent stress-related problems all of us face in this fast-paced, often chaotic world. In Part I of the book, Diamond describes the hazards and blessings of being male, why perpetual stress is deadly, the science behind energy healing, and "the ultimate power tool" for guys who want their lives to work. In Part II, he details the four energy healing tools Diamond believes to be the most effective and scientifically sound: Earthing, Heart-Coherence, Attachment Love, and Emotional Freedom Techniques (EFT). In Part III, he applies the tools to the most pressing problems men face today including: Irritable Male Syndrome (IMS), male-type depression, chronic pain, sexual dysfunction and loss of desire, Andropause (male menopause) and age-related issues, and the stresses related to our economic and ecological transition. Both men and women will be interested in getting answers to the following questions: Is Irritable Male Syndrome (IMS) undermining your health and relationship? How can you treat depression without talk therapy or drugs? Which simple Energy Healing Tool can you use to relieve shoulder, neck, and back pain? What are the best tools for reducing inflammation and improving sleep? How can you keep Andropause (male menopause) from ruining your sex life? Could you and your partner be going through "double menopause?" Why do men frighten women and why do women shame men? Which tools

should you use to best insure that a relationship lasts a lifetime? What are the most important things you can do when the economy hits the fan? How can you prepare for the global changes in 2012 and beyond?

Our health care is staggeringly expensive, yet one in six Americans has no health insurance. We have some of the most skilled physicians in the world, yet one hundred thousand patients die each year from medical errors. In this gripping, eye-opening book, award-winning journalist Shannon Brownlee takes readers inside the hospital to dismantle some of our most venerated myths about American medicine. Brownlee dissects what she calls "the medical-industrial complex" and lays bare the backward economic incentives embedded in our system, revealing a stunning portrait of the care we now receive. Nevertheless, *Overtreated* ultimately conveys a message of hope by reframing the debate over health care reform. It offers a way to control costs and cover the uninsured, while simultaneously improving the quality of American medicine. Shannon Brownlee's humane, intelligent, and penetrating analysis empowers readers to avoid the perils of overtreatment, as well as pointing the way to better health care for everyone.

Discovering the Inner Mother Childhood Disrupted How Your Biography Becomes Your Biology, and How You Can Heal An essential guide for recognizing, preventing, and healing childhood trauma, from infancy through adolescence—what parents, educators, and health professionals can do. Trauma can result not only from catastrophic events such as abuse, violence, or loss of loved ones, but from natural disasters and everyday incidents such as auto accidents, medical procedures, divorce, or even falling off a bicycle. At the core of this book is the understanding of how trauma is imprinted on the body, brain, and spirit, resulting in anxiety, nightmares, depression, physical illnesses, addictions, hyperactivity, and aggression. Rich with case studies and hands-on activities, *Trauma Through a Child's Eyes* gives insight into children's innate ability to rebound with the appropriate support, and provides their caregivers with tools to overcome and prevent trauma.

As children, we learned to get approval by creating facades to help us get our emotional and psychological needs met, but we also rebelled against authority as a way of individuating. As adults, these conflicting desires leave many of us feeling anxious or depressed because our authentic selves are buried deep beneath glitzy or rebellious exteriors or some combination thereof. In this provocative book, eclectic teacher and therapist Ira Israel offers a powerful, comprehensive, step-by-step path to recognizing the ways of being that we created as children and transcending them with compassion and acceptance. By doing so, we discover our true callings and cultivate the authentic love we were born deserving.

The Plight Of The Parentified Child Simon and Schuster

The groundbreaking exploration of the power of empathy by renowned child-psychiatrist Bruce D. Perry, co-author, with Oprah Winfrey, of *What Happened to You? Born for Love* reveals how and why the brain learns to bond with others—and is a stirring call to protect our children from new threats to their capacity to love. “Empathy, and the ties that bind people into relationships, are key elements of happiness. *Born for Love* is truly fascinating.” — Gretchen Rubin, author of *The Happiness Project* From birth, when babies' fingers instinctively cling to those of adults, their bodies and brains seek an intimate connection, a bond made possible by empathy—the ability to love and to share the feelings of others. In this provocative book, psychiatrist Bruce D. Perry and award-winning science journalist Maia Szalavitz interweave research and stories from Perry's practice with cutting-edge scientific studies and historical examples to explain how empathy develops, why it is essential for our development into healthy adults, and how to raise kids with empathy while navigating threats from technological change and other forces in the modern world. Perry and Szalavitz show that compassion underlies the qualities that make society work—trust, altruism, collaboration, love, charity—and how difficulties related to empathy are key factors in social problems such as war, crime, racism, and mental illness. Even physical health, from infectious diseases to heart attacks, is deeply affected by our human connections to one another. As *Born for Love* reveals, recent changes in technology, child-rearing practices, education, and lifestyles are starting to rob children of necessary human contact and deep relationships—the essential foundation for empathy and a caring, healthy society. Sounding an important warning bell, *Born for Love* offers practical ideas for combating the negative influences

of modern life and fostering positive social change to benefit us all.

Lost Childhoods Virago

Sure to become a classic on female empowerment, a groundbreaking exploration of the personal, cultural, and global implications of intergenerational trauma created by patriarchy, how it is passed down from mothers to daughters, and how we can break this destructive cycle. Why do women keep themselves small and quiet? Why do they hold back professionally and personally? What fuels the uncertainty and lack of confidence so many women often feel? In this paradigm-shifting book, leading feminist thinker Bethany Webster identifies the source of women's trauma. She calls it the Mother Wound—the systemic disenfranchisement of women by the patriarchy—and reveals how this cycle is perpetuated by wounded mothers who unconsciously pass on damaging beliefs and behaviors to their daughters. In her workshops, online courses, and talks, Webster has helped countless women re-examine their lives and their relationships with their mothers, giving them the vocabulary to voice their pain, and encouraging them to share their experiences. In this manifesto and self-help guide, she offers practical tools for identifying the manifestations of the Mother Wound in our daily life and strategies we can use to heal ourselves and prevent our daughters from enduring the same pain. In addition, she offers step-by-step advice on how to reconnect with our inner child, grieve the mother we didn't have,

stop people-pleasing, and, ultimately, transform our heartache and anger into healing and self-love. Revealing how women are affected by the Mother Wound, even if they don't personally identify as survivors, *Discovering the Inner Mother* revolutionizes how we view mother-daughter relationships and gives us the inspiration and guidance we need to improve our lives and ultimately create a more equitable society for all.
