Nolan Riley can't believe his eyes when woman in historical dress lands on top of his lighting van while they're filming a Western. She claims she's from 1891. He knows he shouldn't believe her. He's stayed away from women after a disastrous relationship, but something about the lost look in Phoebe's eyes makes him feel protective, despite his distrust of women and Phoebe's unbelievable claim. Against his better judgment, he takes Phoebe home and gets her a job on the movie set. As they explore their relationship, they discover that old

wrongs need to be righted before they can move on. Phoebe's fledgling faith demands she go back to 1891 Nebraska to ask forgiveness from her family and obligations she left behind. Nolan has to deal with his inability to trust a woman. Separated by time, both are uncertain of their lives, but they throw themselves upon God's mercy. But love transcends time. Is their love is strong enough to secure a future together?

Daten - Werke - Zeichen. Halbbd. 1 : Aerzen-Hamburg. Halbbd. 2 : Hameln-Zellerfeld Walter de Gruyter GmbH & Co KG

Complete Atlas of the World, 3rd Edition is now fully revised and updated to reflect the latest changes in world geography, including the annexation of Crimea and

the new nation of South Sudan. Bringing each featured landscape to life with detailed terrain models and color schemes and offering maps of unsurpassed quality, this atlas features four sections: a world overview, the main atlas, fact files on all the countries of the world, and an easy-to-reference index of all 100,000 place names. All maps enjoy a full double-page spread, with continents broken down into 330 carefully selected maps, including 100 city plans. You will also find a stimulating series of global thematic maps that explore Earth's place in the universe, its physical forms and processes, the living world, and the human condition. From Antarctica to Zambia, discover the Earth continent-by-continent with Complete Atlas of the World, 3rd Edition.

Springer Science & Business Media
vollständiges Gemeindelexikon
Charging the Internal Combustion Engine
Discusses equalization of wastewater flows at municipal wastewater treatment plants. Focuses on equalization of dry weather flows. Includes performance and case histories.

Patentblatt Elsevier

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and

encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Die Orchidee Pelican Ventures Book Group

This book covers all aspects of supercharging internal combustion engines. It details charging systems and components, the theoretical basic relations between engines and charging systems, as well as layout and evaluation criteria for best interaction. Coverage also describes recent experiences in design and development of supercharging systems, improved graphical

presentations, and most advanced calculation and simulation tools.

 Vols. for 1970-71 includes manufacturers' catalogs.

Index Geographicus, Being a List Alphabetically Arranged of the Principal Places on the Globe, with the Countries and Subdivisions of the Countries in which They are Situated, and Their Latitudes and Longitudes Compiled Specially with Reference to Keith Johnston's Royal Atlas
 Penguin

This book describes fresh approaches to compression technology. The authors describe in detail where, why, and how these can be of value to process plants. As such plants have become ever larger and more complex, more technology-intensive solutions have had to be developed for process machinery. The best practices that have emerged to address these requirements are assembled in this book.

Rand McNally Encyclopedic World

Atlas Walter de Gruyter GmbH & Co KG

The purpose of this book is to present a state of art summary of current knowledge of methods of assessment of radionuclides

in the terrestrial and marine environments. It cover the traditional methods of radioactivity measurements such as radiometrics techniques, but also recent developments in the mass spectrometry sector. The book starts with a short preface introducing the subject of the book, summarising content and philosophy of the book, as well as the most important historical achievements. The scientific topics are introduced by description of sampling methods, optimisation of sampling sites and sampling frequency. The recent developments in radiochemical separation methods using chromatography resins for the treatment of actinides, transuranics and other groups of radioelements are also described. No other book is available covering all aspects of environmental radioactivity measurements, although remarkable progress has been made in detection techniques over the last ten years. At present the new methods enable to carry out investigations which were not possible before, either because of lack of sensitivity or because of the fact that they required too large samples.

Compressor Technology Advances

Mid Ocean is a Novel of fiction by Author T. Rafael Cimino and is about the war on drugs as it occurs in South Florida in the year 1984. Joel Kenyon has lived in his father's shadow for most of his life. Even after his Dad's death, the man's powerful legacy still haunts him at every turn. As he graduates from the U. S. Custom's Academy, Joel is assigned strategic duty in the 'bad-lands' of U. S. drug enforcement, the Florida Keys. Set in 1984, Mid Ocean shows the lives of the sometimes violent drug smugglers and the men and women sworn to uphold the law in this Caribbean 'wild west'. In the end, Joel Kenyon will question everyone, including himself in a quest for what's right and true. It is here that he will find out the sea holds many secrets.
