Bicycling National Geographic Books

Sometimes living under the shadow of the flashier, high-profile Triumph Twins, the equivalent BSAs were just as numerous and were exported all over the world. BSA was often seen as a less glamorous marque than Triumph or Norton, associated more with commuting and sidecars than coffee bar cowboys, but that doesn't detract from the collectibility of its models today, as the bikes have become highly usable, enjoyable classics. Unlike the many marque histories available, this book is a practical guide to buying one of these bikes. It covers the complete range, from the very first 1946 500cc A7 to the final 1973 650cc A65s. Chapters include what to look for (10min and 30min evaluations); spares prices; guides to auctions and paperwork; lists of useful contacts in the BSA community; and just as important, consideration of whether it's the right bike for you. One hundred colour photos, useful appendices and expert advice mean this book could save you thousands.

As the sales of new bicycles increase every year, these helpful tips will educate and inform beginning cyclists so they perform to the maximum potential, all while having fun. Trusted bicycle consultant Tori Bortman distills the essentials every beginning cyclist needs to know. She covers different types of rides, the components of bicycles, proper cycling clothing and equipment, basic road skills, nutrition, training, maintenance, and how to ride for a cause. She also explores how to approach cycling from the conceptual beginnings into tangible, real-time facts about riding as a new cyclist, as well as elaborating on the bountiful health benefits of cycling, including weight loss, stress reduction, and boosted immunity. This is the ultimate guide to bicycling know-how for beginning cyclists.

Living on Two Wheels - 2nd Edition

Triathlons, such as the famously arduous Ironman Triathlon, and "extreme" mountain biking—hair-raising events held over exceedingly dangerous terrain—are prime examples of the new "lifestyle sports" that have grown in recent years from oddball pursuits, practiced by a handful of characters, into multi-million-dollar industries. In *Why Would Anyone Do That?* sociologist Stephen C. Poulson offers a fascinating exploration of these new and physically demanding sports, shedding light on why some people find them so compelling. Drawing on interviews with lifestyle sport competitors, on his own experience as a participant, on advertising for lifestyle sport equipment, and on editorial content of adventure sport magazines, Poulson addresses a wide range of issues. He notes that these sports are often described as "authentic" challenges which help keep athletes sane given the demands they confront in their day-to-day lives. But is it really beneficial to "work" so hard at "play?" Is the discipline required to do these sports really an expression of freedom, or do these sports actually impose extraordinary degrees of conformity upon these athletes? *Why Would Anyone Do That?* grapples with these questions, and more generally with whether lifestyle sport should always be considered "good" for people. Poulson also looks at what happens when a sport becomes a commodity—even a sport that may have begun as a reaction against corporate and professional sport—arguing that commodification inevitably plays a role in determining who plays, and also how and why the sport is played. It can even help provide the meaning that athletes assign to their participation in the sport. Finally, the book explores the intersections of race, class, and gender with respect to participation in lifestyle and endurance sports, noting in particular that there is a near complete absence of people of color in most of these contests. In addition, Poulson examines how concepts of masculinity in triathlons have changed as women's roles in this sport increase.
