As the HVACR industry
continues to move
forward and innovate, the
refrigerants that were
once so commonplace are
now being phased out.

Replacing them are more
energy efficient,
environmentally friendlier
refrigerants, known as
Low GWP refrigerants.

Many of these new
refrigerants are classified
by ASHRAE as A2L, or
slightly flammable. The
industry is also seeing
expanded use of some
hydrocarbon (A3)
refrigerants, such as
propane and isobutane.

Students and technicians
will require additional
training for the safe
handling and
transportation of these
refrigerants. The Low
GWP refrigerant program
manual covers:

Refrigerant safety
Introduction to Low GWP

refrigerants Refrigerant
properties and
characteristics The
refrigeration cycle
Working with refrigerant
blends Proper installation
and service guidelines
Flammable refrigerant
considerations

Explanation of the
associated codes and

 Tuning engines can be a mysterious art, all engines need a precise balance of fuel, air, and timing in order to reach their true performance potential. Engine Management: Advanced Tuning takes engine-tuning techniques to the next level, explaining how the EFI system determines engine operation and how the calibrator can change the controlling parameters to optimize actual engine performance. It is the most advanced book on the market, a must-have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel-injected, electronically controlled engine.
