Language, Literacy and
Diversity brings together
researchers who are

leading the innovative and important re-theorization of language and literacy in relation to social mobility, multilingualism and globalization. The volume examines local and global flows of people, language and literacy in relation to social practice; the role (and nature) of boundary maintenance or disruption in global, transnational and translocal contexts; and the lived experiences of individuals on the front lines of global, transnational and translocal processes. The

contributors pay attention to the dynamics of multilingualism in located settings and the social and personal management of multilingualism in socially stratified and ethnically plural social settings. Together, they offer ground-breaking research on language practices and documentary practices as regards to access, selection, social mobility and gate-keeping processes in a range of settings across several continents: Africa, Asia, the Americas and Europe.

This is an analysis of the revolution of the last two decades that has built an extensive new regulatory apparatus governing British public ethics. The book sets the new machinery in the wider institutional framework of British government. Its main purpose is to understand the dilemmas of regulatory design that have emerged in each area examined.

 Rooted in a long and diverse genealogy, biographical approaches have developed from a focus upon a single story, a 'life story' and personal documents (e.g. diaries), to encompass (more routinely) autobiographical secondary and archival research and analysis - as well as multi-media, arts based creative multi-sensory methods. Biographical Research and practices as part of human understanding

helps people to make sense of what has been and what is happening in their lives, cultures, communities and societies. Advances in Biographical Methods: Creative Applications takes up these themes: theorising, doing and applying current advances in biographical methods. It demonstrates the momentum with which they areas are developing as a field of scholarship, especially in relation to creative innovations and applications, such as in new forms of interview

and other practices, and debates on its interlinking with art, performance and digital methods.

Christians Shaping Identity from the Roman Empire to Byzantium Routledge

This book explores the possibility for an anthropology of services and outlines a practice approach to designing services. The reader is taken on a journey that Blomberg and Darrah have been on for the better part of a decade from their respective positions helping to

establish a services research group within a large global enterprise and an applied anthropology master's program at a Silicon Valley university. They delve into the world of services to understand both how services are being conceptualized today and the possible benefits that might result from taking an anthropological view on services and their design. The authors argue that the anthropological gaze can be useful precisely because it combines

attention to details of everyday life with consideration of the larger milieu in which those details make sense. Furthermore, it asks us to reflect upon and assess our own perspectives on that which we hope to understand and change. Central to their exploration is the question of how to conceptualize and engage with the world of services given their heterogeneity, the increasing global importance of the service economy, and the possibilities introduced for

an engaged scholarship on service design. While discourse on services and service design can imply something distinctively new, the authors point to parallels with what is known about how humans have engaged with each other and the material world over millennia. Establishing the ubiquity of services as a starting point, the authors go on to consider the limits of design when the boundaries and connections between what can be designed and what can only be

performed are complex and deeply mediated. In this regard the authors outline a practice approach to designing that acknowledges that designing involves participating in a social context, that design and use occur in concert, that people populate a world that has been largely built by and with others, and that formal models of services are impoverished representations of human performance. An Anthropology of Services draws attention to the conceptual and

methodological messiness of service worlds while providing the reader with strategies for intervening in these worlds for human betterment as complex and challenging as that may be.

This book seeks to demonstrate the role of public policy in support of equitable and inclusive development. The achievement of this overarching goal rests on an assumption that development does not happen by chance or by

accident, but rather, through the deliberate application of analytical tools which public policy is able to provide. Set within an Asian context, the book emphasizes the role of public policy in reducing poverty, eliminating deprivation, promoting equity, and ensuring social justice. The book likewise aims to provide an argument for the developmental role of the state — one which has been the subject of a long-standing debate among development scholars. In addition, the

book accounts for the role of civil society organizations, particularly their involvement in multi-stakeholder participation. Through different case studies, this book explains the outcome of public policy decisions as combinations of efforts among government and civil society actors, to ensure the creation of the most optimal public good. Finally, the book takes a comparative perspective, i.e., there are cases that directly or indirectly implicate the regional character of public

policies that result in the creation and distribution of regional public goods. **A Research Agenda for Entrepreneurship and Context** Penguin Politics for the Love of Fandom examines what Ashley Hinck calls “fan-based citizenship”: civic action that blends with and arises from participation in fandom and commitment to a fan-object. Examining cases like Harry Potter fans fighting for fair trade, YouTube fans donating money to charity, and football fans volunteering

to mentor local youth, Hinck argues that fan-based citizenship has created new civic practices wherein popular culture may play as large a role in generating social action as traditional political institutions such as the Democratic Party or the Catholic Church. In an increasingly digital world, individuals can easily move among many institutions and groups. They can choose from more people and organizations than ever to inspire their civic actions—even the fandom

for children's book series Harry Potter can become a foundation for involvement in political life and social activism. Hinck explores this new kind of engagement and its implications for politics and citizenships, through case studies that encompass fandoms for sports, YouTube channels, movies, and even toys. She considers the ways in which fan-based social engagement arises organically, from fan communities seeking to change their world as a group, as well as the

methods creators use to leverage their fans to take social action. The modern shift to networked, fluid communities, Hinck argues, opens up opportunities for public participation that occurs outside of political parties, houses of worship, and organizations for social action. Fan-based citizenship performances help us understand the future possibilities of public engagement, as fans and creators alike tie the ethical frameworks of fan-objects to desired social goal, such as

volunteering for political candidates, mentoring at-risk youth, and promoting environmentally friendly policy. Politics for the Love of Fandom examines the communication at the center of these civic actions, exploring how fans, nonprofits, and media companies manage to connect internet-based fandom with public issues. *Legal Mobilisation in the Multi-Level European System* Oxford University Press
Postpartum depression is hard on a marriage. In their private practices,

authors Karen Kleiman and Amy Wenzel often find themselves face-to-face with marriages that are suffocating, as if the depression has sucked the life out of a relationship that was only prepared for the anticipated joy of pending childbirth. What happens to marriage? Why do couples become angry, isolated, and disconnected? *Tokens of Affection* looks closely at marriages that have withstood the passing storm of depression and are now seeking, or in

need of, direction back to their previous levels of functioning and connectedness. The reader is introduced to a model of collaboration that refers to 8 specific features, which guide postpartum couples back from depression. These features, framed as “Tokens,” are based on marital therapy literature and serve as a reminder that these are not just communication skill-building techniques; they are gift-giving gestures on behalf of their relationship. A reparative

resource, *Tokens of Affection* helps couples find renewed harmony, a solid relational ground, and reconnection. *CTET and TET Child Development and Pedagogy Paper 1 and 2 for 2021 Exams* Farrar, Straus and Giroux (BYR)

Demeter Press This volume highlights key aspects of new media, knowledge practices and multiliteracies in communication and education, providing readers with a range of

empirical findings, novel theories and applications. The reports also include best practices, case studies, innovative solutions and lessons learned with regard to three core fields: (1) New media: discussions on the effects of traditional and new media, legal risks concerning social media, the effects of media intervention on help-seeking attitudes, obstacles of using tablets for learning, qualitative interpretation of media reporting, use of social media for enhancing

design practices, and news-reading habits; (2) Knowledge practices: exploration of online viewing and lifestyles, reform of school management models, undergraduate students' mathematics learning experiences, perceived accounting ethics and online knowledge sharing, creating knowledge repositories, digital technologies outside school, smartphone usage and life satisfaction, and cultural differences and isomerism; and (3) Multiliteracies: studies on

learning style inventories, the impact of ICT in interdisciplinary approaches, ePortfolios for learning, video production and generic skills enhancement, mobile-assisted collaborative learning, and the effects of project-based learning on student achievements. The reports presented are from various countries and organizations. *Doing the right thing?* Bloomsbury Publishing The Oxford Handbook of Theology, Sexuality, and Gender presents an

unrivalled overview of the theological study of sexuality and gender. These topics are not merely contentious and pervasive: they have escalated in importance within theology. Theologians increasingly agree that even the very doctrine of God cannot be contemplated without a prior grappling with each. Featuring 41 newly-commissioned essays, written by some of the foremost scholars in the discipline, this authoritative collection presents and develops the

latest thinking in these areas. Divided into eight thematic sections, the Handbook explores: methodological approaches; contributions from neighbouring disciplines; sexuality and gender in the Bible, and in the Christian tradition; controversies within the churches, and within four of the non-Christian faiths; and key concepts and issues. The final, extended section considers theology in relation to married people and families; gay and lesbian people; bisexual

people; intersex and transgender people; disabled people; and to friends. This volume is an essential reference for students and scholars, which will also stimulate further research. *A Global Perspective on the Science of Positive Human Existence* Psychology Press Evidence suggests that the first 10 or so years of life create the foundation for subsequent participation in recreational and health-related physical activity. This book brings together

researchers and practitioners with expertise in issues related to physical activity, physical education, and sport during the primary/elementary phase of schooling, to explore these important issues. Combining interdisciplinary perspectives, the book addresses the inherent complexity of researching with young children. It looks at the evidence on development during the first 10 years and how that evidence relates to physical activity and to sport, in pre-

school, school and out of school. Finally, the book offers a series of national case studies, from Asia, Europe and Africa, demonstrating the importance of age-appropriate sport and physical activity. This is important reading for any student, researcher, educator or policy maker with an interest in physical activity and health, education in the early years or at primary/elementary level, paediatric exercise science, or youth sport.

This best-selling text on marriages, families, and relationships combines a rigorous scholarly and applied approach with a theme especially relevant to today's dynamic global environment: making choices in a diverse society. The authors use an engaging narrative to create a highly readable text that offers insightful perspectives on the diversity of our modern society, including different ethnic traditions and

family forms. The balanced presentation discusses a variety of theoretical perspectives (e.g., family ecology, structure-functional, interaction-constructionist, family systems, biosocial), emphasizing both social structure and the importance of individual agency, choice, and decision-making. Students are encouraged to question assumptions and reconcile conflicting ideas and values as they make informed choices in their own lives. Important

as a groundbreaking idea of the year. The path to personal and professional fulfillment is rarely straight. Ask anyone who has achieved his or her biggest goals or whose relationships thrive and you'll hear stories of many unexpected detours along the way. What separates those who master these challenges and those who get derailed? The answer is agility—emotional agility. Emotional agility is a revolutionary, science-based approach that allows us to navigate life's

twists and turns with self-acceptance, clear-sightedness, and an open mind. Renowned psychologist Susan David developed this concept after studying emotions, happiness, and achievement for more than twenty years. She found that no matter how intelligent or creative people are, or what type of personality they have, it is how they navigate their inner world—their thoughts, feelings, and self-talk—that ultimately determines how successful they will

become. The way we respond to these internal experiences drives our actions, careers, relationships, happiness, health—everything that matters in our lives. As humans, we are all prone to common hooks—things like self-doubt, shame, sadness, fear, or anger—that can too easily steer us in the wrong direction. Emotionally agile people are not immune to stresses and setbacks. The key difference is that they know how to adapt, aligning their actions with

their values and making small but powerful changes that lead to a lifetime of growth. Emotional agility is not about ignoring difficult emotions and thoughts; it's about holding them loosely, facing them courageously and compassionately, and then moving past them to bring the best of yourself forward. Drawing on her deep research, decades of international consulting, and her own experience overcoming adversity after losing her father at a young age, David shows

how anyone can thrive in an uncertain world by becoming more emotionally agile. To guide us, she shares four key concepts that allow us to acknowledge uncomfortable experiences while simultaneously detaching from them, thereby allowing us to embrace our core values and adjust our actions so they can move us where we truly want to go. Written with authority, wit, and empathy, Emotional Agility serves as a road map for real behavioral

change—a new way of acting that will help you reach your full potential, whoever you are and whatever you face. *Toward a Practice Approach to Designing Services* FriesenPress

generated scenarios. Human behavior is replicated in virtual scenarios, where every detail is controlled by computers, and in situations that can be repeated under the same conditions. Based on technology and design, the user can experience presence. In the virtual world, users are embodied in avatars that represent them and are the means to interact with the virtual environment. Avatars are graphical models that behave on behalf of the human behind them. The

user avatar is a proxy that also backs interaction with others, allowing computer-mediated interactions. Analyses directed to understand people's perceptions, personal and social behavior in computer mediated interactions, comprise a multidisciplinary area of study that involves, among others, computer science, psychology and sociology. In the last two decades a number of studies supported by Virtual Reality have been conducted to understand

human behavior, in some cases the implications of the technology, or to reproduce artificial human behavior. This book presents a collection of studies from recognized researchers in the area. In *Journeys to New Life, Identity, and Community*, Dr. Peter K. Yun explores the complexities of identity for Muslim background believers

(MBBs) in Bangladesh. Encompassing scholarship surrounding contextualization and the insider movement, as well as extensive personal interviews with Bangladeshi MBBs, this book offers insight into the lived reality of following Christ within a Muslim context. Yun

identifies three primary approaches to negotiating social identity within MBB communities and examines the potential strengths and weaknesses of each, as well as the implications for believers navigating the gospel's call to be within culture and simultaneously

beyond it. This book offers careful anthropological observation while speaking to missiological concerns and offering practical suggestions for local believers, practitioners, and future scholars. It is a powerful resource for anyone passionate about God's work in Muslim contexts.
