The Mechanics of Teaching Glencoe/McGraw-Hill School Publishing Company

Centering on the theme of university-based teacher education at a time of system change and its connections with broader global political issues, this book investigates the changing nature of initial teacher education (ITE) as it amalgamated into universities in the New Zealand context. The New Zealand government, like many across the world is seeking improvement in education system performance, with a particular interest in meeting the needs of those traditionally disadvantaged through education. As a result, over the last 20 years, most ITE has been relocated into universities and teacher qualifications have changed. Not immune to international discourses about the criticality of the teacher workforce to system performance, Aotearoa New Zealand provides a bounded yet connected case of ITE development and reform. The authors draw from a study of teacher education practice in Aotearoa New Zealand and also look at recent research carried out in other jurisdictions to consider how ITE and the academic category of teacher educator is constructed, maintained and practiced within the institution of the university. They highlight the promise of university-based ITE provision, noting areas for development and provide an opportunity to better understand how student teachers within ITE respond to and engage with teacher educators' work in the service of their own learning.

Guided Reading is the classroom Reading Recovery with supplements. In the classroom every child is involved in focussed reading instruction, small groups necessitate exceptional organization, all this without the year-long training that Reading Recovery participants have. Over the years teachers have been directed towards Guided Reading without knowledge of how to organize the class while working with small groups and further, without the knowledge of what is involved in overt reading instruction. This book will change that and give teachers the resources to organize and put in place worthwhile and relevant activities for children to independently engage in. In this book, significant suggestions are forwarded to make Guided Reading easier to implement and more effective. This book challenges held views about Guided Reading - misconceptions and misapplications of Guided Reading will be highlighted and in place will be effective pedagogy to help children move towards being truly confident, thinking readers. The teaching practices emphasized are: \* Managing differentiated reading instruction for early, developing, early fluent readers, including a chapter relating to older readers. \* Class management while working with small groups - independent tasks. \* Questioning and prompting so children acquire and use self-help reading and comprehension strategies. \* Encouraging student talk where they explore and exchange ideas. \* Assessment (and recording) that informs instruction.
