Westerfield, Jeffrey Jaffe* Irwin Professional Pub Fundamentals of Investments was written to: 1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a

balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the

four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade. **Corporate Finance** McGraw-Hill Education Corporate Finance: Core Principles and Applications, 3rd edition, by Ross, Westerfield, Jaffe and Jordan was written to convey the most important corporate finance concepts and applications at a level that is approachable to the
