A practical guide to integrate Design Thinking and Lean Startup in the service era. "Pinheiro will inspire you to think differently about business, design, education, and - perhaps most importantly - the way you work every day." - Kerry Bodine, co-author of Outside In: The Power of Putting Customers at the Center of Your Business "In this book, Tenny offers some extremely valid and hard-hitting criticism regarding the ideals surrounding the dictate of building a Minimum Viable Product. Agreed on many fronts but I found his reinvention of these principles when applied to the service industry to be extremely insightful. The concept of a Minimum Valuable Service is unique, new and sets goals intended to deliver maximum value with measurable results. This is a must read for anyone in the global innovation economy." - Rick Rasmussen, NestGSV. International Business development. This book is a practical guide that explores how startup entrepreneurs and business leaders, who hold no Design degrees, can integrate Service Design into their development cycles in order to create sustainable, desirable and profitable new services. In the first part, Tenny explores the reasons why startups need to move away from the "make and sell" industrial logic we've been exploiting over the last century. To take its place he proposes a new service oriented mindset that

carries the idea of "learn, use and remember" users' journeys. He also discusses the challenges our industrial society is facing and how the combination of design with a service oriented mentality can be key to help new and existent businesses make this shift. In the second part, he will take you on a journey through the MVS - Minimum Valuable Service - model. This model can seamlessly integrate Service Design into the Lean Startup or any Agile development cycle. It adds the human values needed to foster service innovations within the Lean's scientific approach. In this part of the book you will learn tools, methods and practices that will help you get your hands dirty with design. At some point every adventure requires a great guide, and this journey into the heart of the new is led impeccably by Tenny Pinheiro. Slyly sidestepping the pitfalls of the Lean Startup approach, he skillfully navigates us through to a deeper understanding of the forces shaping the evolving service economy. By trusting the wisdom of the many to help design the next phase of business, his approach taps into an inexhaustible source of creativity and innovation. The Service Startup is a trusty roadmap that you will long keep by your side. As Tenny might suggest: learn it, use it, and remember it. - Jamer Hunt, Parsons The New School for Design. Director for the graduate Program in Transdisciplinary Design. "I'll admit it: I enjoy seeing someone who knows their stuff re-assemble and improve on the work of an adjacent profession. Tenny calls out what's lacking in the Lean Startup approach, in the most thorough and insightful ways. In the spirit of iteration, he's taken an existing approach and improved on it. If only all criticism were this good. I enjoyed his delightfully nuanced views on the world of services - how they're perceived, experienced, and remembered - as well as his historical perspectives on the worlds of design, business and marketing. Opinionated but also well-informed, this is a pragmatic, human-centric take on designing and delivering services that I'd recommend to anyone whose work affects other people. - Chad Thornton, Experience Designer, Airbnb""

Having met Beverly Ingle and hearing her speak about design thinking, I was enlightened and enthused. With a depth of knowledge and obvious passion for the usage of design thinking, she has already helped many business people, myself included, inject greater creativity into problem solving to deliver better results—something that is a must for left-brainers! She has an amazingly refreshing ability to create deep understanding within her audience, and a hands-on, practical approach ensures that the results are manageable and within your grasp. —Jill Robb, CEO, Ambition Digital; Belfast, United Kingdom Design Thinking for Entrepreneurs and Small Businesses: Putting the Power

of Design to Work is the first book on the subject for smaller businesses. Until now, design thinking—a methodology for solving business problems and identifying opportunities—has been the playground for companies with big budgets, giving them the advantage of the innovation that comes from using the latest design thinking tools emerging from Stanford, Harvard, Northwestern, and elsewhere. Now, thanks to design thinking expert Beverly Ingle, entrepreneurs and small-business owners can make the design thinking playground their own—and on a much smaller budget. Ingle provides the tools entrepreneurs need as well as step-by-step processes that show how to use design thinking methods to transform your business and drive organizational success. Design Thinking for Entrepreneurs and Small Businesses offers just enough theory to provide you with working knowledge of design thinking, but its value lies in the practical, proven, hands-on information that you can put to use immediately. You will learn: How to incorporate design thinking processes into everyday operations, and in what areas of business the approach is most valuable How to use the most prevalent and popular design thinking tools (like ideation, prototyping, and rapid branding) effectively How to use design thinking to identify and achieve your business goals and create new business models How to create revenue-boosting new products and services using design thinking How to improve the customer/user experience to create more loyal, profitable customers By the time you've finished reading the last chapter of Design Thinking for Entrepreneurs and Small Businesses, you will not just be thinking about producing new products and services, boosting customer service, or developing new business opportunities—you'll be doing it. Best, it'll show up in the top and bottom lines.

*The Product Book: How to Become a Great Product Manager* "O'Reilly Media, Inc."

How to outsmart risk Risk has been defined as the potential for losing something of value. In business, that value could be your original investment or your expected future returns. The Risk-Driven Business Model will help you manage risk better by showing how the key choices you make in designing your business models either increase or reduce two characteristic types of risk—information risk, when you make decisions without enough information, and incentive-alignment risk, when decision makers' incentives are at odds with the broader goals of the company. Leaders who understand how the structure of their business model affects risk have the power to create wealth, revolutionize industries, and shape a better world. INSEAD's Karan Girotra and Serguei Netessine, noted operations and innovation professors who have consulted with dozens of companies, walk you through a business model audit to determine what key decisions get made in a business, when they get made, who makes them, and why we make the decisions we do. By changing your company's key decisions within this framework, you can fundamentally alter the risks that will impact your business. This book is for entrepreneurs and executives in companies involved in dynamic industries where the locus of risk is shifting, and includes lessons from Zipcar, Blockbuster, Apple, Benetton, Kickstarter, Walmart, and dozens of other global companies. The Risk-Driven Business Model demystifies business model risk, with clear directives aimed at improving decision making and driving your business forward.

If you are an entrepreneur anywhere on the enterprise startup journey, Survival to Thrival is for you. In the beginning, it is simply about Survival -- how not to die? With luck and hard work, it becomes about Thrival -- how do we win? This first book is about the company journey. Building enterprise startups is different. Products take longer. Go-To-Market strategies are more complex. Common wisdom on product market fit is not enough to unlock growth. There is a missing link that we call Go-To-Market Fit. Then, growth happens, and everything changes. The startup suddenly shifts from Survival mode to Thrival mode. Maddeningly, what used to work no longer works for the company and for the people. Becoming a market leader depends on everyone, including the CEO, unlearning the very things that made them successful. Survival to Thrival is a mind-meld of a three-time entrepreneur, a longtime venture capitalist, and other enterprise entrepreneurs, which demystifies building enterprise startups. Our mission is to help you succeed, to anticipate what is next, and most importantly, to let you know that you are not alone.

Penetration testers simulate cyber attacks to find security weaknesses in networks, operating systems, and applications. Information security experts worldwide use penetration techniques to evaluate enterprise defenses. In *Penetration Testing*, security expert, researcher, and trainer Georgia Weidman introduces you to the core skills and techniques that every pentester needs. Using a virtual machine-based lab that includes Kali Linux and vulnerable operating systems, you'll run through a series of practical lessons with tools like Wireshark, Nmap, and Burp Suite. As you follow

along with the labs and launch attacks, you'll experience the key stages of an actual assessment—including information gathering, finding exploitable vulnerabilities, gaining access to systems, post exploitation, and more. Learn how to: -Crack passwords and wireless network keys with brute-forcing and wordlists -Test web applications for vulnerabilities -Use the Metasploit Framework to launch exploits and write your own Metasploit modules -Automate social-engineering attacks -Bypass antivirus software -Turn access to one machine into total control of the enterprise in the post exploitation phase You'll even explore writing your own exploits. Then it's on to mobile hacking—Weidman's particular area of research—with her tool, the Smartphone Pentest Framework.
