bestselling book provides all the information a specialist registrar in obstetrics and gynaecology or senior house officer needs during training or when preparing for the MRCOG examination. *Obstetrics & Gynaecology: An Evidence-based Text for MRCOG* covers the latest profession

**Family Medicine** Elsevier Health Sciences

The Save a Life Initiative has just released its newest course: Pediatric Advanced Life Support (PALS). This manual is based on the 2015-2020 Pediatric Advanced Life Support guidelines published by the American Heart Association. The Pediatric Advanced Life Support (PALS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Pediatric Advanced Life Support Certification or Recertification Course. It serves as the primary training material for PALS Certification and Recertification courses. Although it is primarily intended for use during certification courses, the handbook was also created to serve as daily reference material for health care professionals. Information covered in the handbook includes EKG and electrical therapy review, pediatric respiratory failure and more. Specific PALS Algorithms and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.

Managing Medical and Obstetric Emergencies and Trauma Cambridge University Press

Retrieval Medicine is a core, concise and practical text covering the complex clinical and logistical problems experienced in the retrieval

environment. Focusing on evidence-based management and clear clinical guidance, this easily portable handbook provides a comprehensive and accessible guide to this growing field for all health professionals involved in the retrieval and transfer of critically ill patients. Covering the practice of acute, emergency and critical care medicine in the transport environment, this handbook provides the practical guidance and clinical knowledge to enable medical practitioners to function independently in highly variable and resource limited environments with acutely unwell, unstable and often clinically undifferentiated patients over long durations. Closely mapped to the Royal College of Surgeons syllabus on retrieval and transfer medicine, this title comprehensively covers all aspects of retrieval medicine, from basic flight physiology to more complex retrievals and common pitfalls. Authored by an authoritative, international team of expert editors and specialist authors, this clinically focused text is complemented by a range of checklists and reference tools for practical and accessible use in the field. These deliver core information for use in the primary retrieval setting, allowing the retriever to structure their approach to a crisis and correct the problem with suggested interventions. Topics include retrieval systems and coordination, crisis resource management, shock, and a range of chapters focusing on responding to specific areas of medicine when encountered in the retrieval environment, such as cardiology and obstetrics and gynaecology.

*Supporting Women to Give Birth at Home* Lippincott Williams & Wilkins  
A fun and informative approach to learning, this book brings together a

range of case studies from within prehospital care covering various conditions and situations which you may face working in an ambulance setting. Paramedic Case Studies will guide you through a number of detailed and descriptive scenarios, putting you at the centre of the action, each accompanied by full-colour illustrations to help set the scene and aid your understanding. Readers are encouraged to think critically through 'what would you do next?' questions, highlighting appropriate actions for each situation and how to achieve the best outcomes for your patient. Originally published as monthly instalments in Standby CPD, each case study has been brought up to date with the latest guidance and research. It also features brand new content, not published anywhere else before. Evidence-based throughout, each chapter provides up-to-date discussions on treatment and management as well as in-depth information on anatomy, physiology and pathophysiology. Topics include: Airway and breathing Circulation Disability Exposure Medical emergencies Trauma Obstetrics and gynaecology Paediatrics Mental health Older people  
This unique book is an essential resource for anyone working in the ambulance service who wants to test their knowledge of current and frequently encountered areas of paramedic practice, as well as those who are not yet qualified.

Pre-hospital Obstetric Emergency Training Elsevier Health Sciences

The only "how-to" manual on the obstetric patient in the critical care unit! Replete with summary tables and algorithms, this practical manual focuses on the clinical bedside management of the intensive obstetric patient. Features a generous number of tables and

algorithms as well as mnemonics simplifying key points.

### **Monitoring the Critically Ill Patient**

John Wiley & Sons

Designed to enhance the confidence, knowledge and skills needed to perform effectively in urgent or emergency situations that can occur in a hospital, at a birth centre or at home, this fully updated third edition provides an accessible resource for all practising midwives. With contributions from highly experienced midwives, this practical handbook incorporates an all-new chapter on serious infections and continues to provide key, up-to-date information on high-risk medical and obstetric situations. It also covers relevant information on litigation and the conclusions arising from the reports from the Confidential Enquiries into Maternal Deaths. *Emergencies Around Childbirth* is essential reading for practising and trainee midwives, and those who teach them.

*Emergencies in Obstetrics and Gynaecology*, *An Issue of Obstetrics and Gynaecology Clinics*, *E-Book Labour Ward Manual*
