to become winners. Test Your Mind Dearborn Trade Publishing Paperback version of the 2002 paper published in the journal *Progress in Information, Complexity, and Design* (PCID). ABSTRACT Inasmuch as science is observational or perceptual in nature, the goal of providing a scientific model and mechanism for the evolution of complex systems ultimately

requires a supporting theory of reality of which perception itself is the model (or theory-to-universe mapping). Where information is the abstract currency of perception, such a theory must incorporate the theory of information while extending the information concept to incorporate reflexive self-processing in order to achieve an intrinsic (self-contained)

description of reality. This extension is associated with a limiting formulation of model theory identifying mental and physical reality, resulting in a reflexively self-generating, self-modeling theory of reality identical to its universe on the syntactic level. By the nature of its derivation, this theory, the Cognitive Theoretic Model of the Universe or CTMU, can be regarded as a supertautologi-
 cal reality-theoretic extension of logic. Uniting the theory of reality with an advanced form of computational language theory, the CTMU describes reality as a Self Configuring Self-Processing Language or SCSPL, a reflexive intrinsic language characterized not only by self-reference and recursive self-definition, but full self-configuration and self-execution (reflexive read-write functionality). SCSPL reality embodies a dual-aspect monism consisting of infocognition, self-transducing information residing in self-recognizing SCSPL elements called syntactic operators. The CTMU identifies itself with the structure of these operators and thus with the distributive syntax of its self-modeling SCSPL universe,

including the reflexive grammar by which the universe refines itself from unbound telesis or UBT, a primordial realm of infocognitive potential free of informational constraint. Under the guidance of a limiting (intrinsic) form of anthropic principle called the Telic Principle, SCSPL evolves by telic recursion, jointly configuring syntax and state while maximizing a generalized

self-selection parameter and adjusting on the fly to freely-changing internal conditions. SCSPL relates space, time and object by means of conspansive duality and conspansion, an SCSPL-grammatical process featuring an alternation between dual phases of existence associated with design and actualization and related to the familiar wave-particle duality of quantum

mechanics. By distributing the design phase of reality over the actualization phase, conspansive spacetime also provides a distributed mechanism for Intelligent Design, adjoining to the restrictive principle of natural selection a basic means of generating information and complexity. Addressing physical evolution on not only the biological but cosmic level, the CTMU

addresses the most evident deficiencies and paradoxes associated with conventional discrete and continuum models of reality, including temporal directionality and accelerating cosmic expansion, while preserving virtually all of the major benefits of current scientific and mathematical paradigms.

Mensa Guide to Casino Gambling

Penguin (Non-Classics)
 An “outstanding” (Publishers Weekly, starred review) blistering thriller

featuring a brilliant and unorthodox Army investigator, his enigmatic female partner, and their hunt for the Army’s most notorious—and dangerous—deserter from #1 New York Times bestselling author Nelson DeMille and Alex DeMille. When Captain Kyle Mercer of the Army’s elite Delta Force disappeared from his post in Afghanistan, a video released by his Taliban

captors made international headlines. But circumstances were murky: Did Mercer desert before he was captured? Then a second video sent to Mercer's Army commanders leaves no doubt: the trained assassin and keeper of classified Army intelligence has willfully disappeared. When Mercer is spotted a year later in Caracas, Venezuela, by an old Army buddy, top military brass task Scott

Brodie and Maggie Taylor of the Criminal Investigation Division to fly to Venezuela and bring Mercer back to America—preferably alive. Brodie knows this is a difficult mission, made more difficult by his new partner's inexperience, by their undeniable chemistry, and by Brodie's suspicion that Maggie Taylor is reporting to the CIA. With ripped-from-the-headlines appeal, an exotic and

dangerous locale, and the hairpin twists and inimitable humor that are signature DeMille, *The Deserter* is the first in a timely and thrilling new series from an unbeatable team of True Masters: the #1 New York Times bestseller Nelson DeMille and his son, award-winning screenwriter Alex DeMille.
