Simon and Schuster  
Higher score money back guarantee!  
High yield chemistry practice questions with detailed explanations and step-by-step solutions.  
Covers all topics tested on SAT Chemistry: -  
Electronic and atomic structure of matter -  
Periodic table -  
Chemical bonding -

States of matter: gases, liquids, solids -  
Solution chemistry -  
Acids and bases -  
Stoichiometry -  
Equilibrium and reaction rates -  
Thermochemistry  
General chemistry is heavily tested on the MCAT as part of "Chemical and Physical Foundations of Biological Systems" and, to a much smaller extent, "Biological and Biochemical Foundations of Living Systems" sections. This

book provides 1,200 practice questions that test your knowledge of all general chemistry topics tested on the MCAT. The detailed explanations provide step-by-step solutions and cover a broad spectrum of concepts that you must be well versed in order to answer related questions on the test and do well on it. By reading these explanations carefully and understanding how they apply to

solving the question, you will learn important concepts and the relationships between them. This will prepare you for the test and you will significantly increase your score. All the content of our publications is prepared by our editors who possess extensive credentials, are educated at top colleges and universities and have been admitted to medical school with stellar MCAT scores. Our

editors are experts on teaching, preparing students for the MCAT and have coached thousands of premeds on admission strategies.

the Second Edition and its technology program with a separate section of new Conceptual Problems appearing in the printed and computerized Test Bank. Answer Checks follow selected Examples throughout the chapters in the text. They appear after the Solution and are designed to help students evaluate their answer to ensure that it is reasonable. Figures, drawings, and photos in the art program help students connect molecular-level activity to macro-scale phenomena. Animations in the student and instructor technology supplements also enhance students' ability to visualize molecular behavior. Based on instructor feedback, 60-70 percent of the material from Chapter 13, "Materials of Technology" and from Chapter 23, "The Transition Elements and Coordination Compounds" has been divided into two new chapters: Chapter 21, "Chemistry of the Metals" and Chapter 22, "Chemistry of the Nonmetals." A suite of integrated technology tools for students and instructors includes materials (except restricted testing items) that are web accessible, with passwords included in the media guides.
