The focus in this volume is on grammatical aspects of the clause in English, presenting a fine balance between theoretically- and descriptively-oriented approaches. Some authors investigate the status and properties of 'minor' or 'fringe' constructions, including 'deictic-presentationals'; non-restrictive relative clauses with that; 'isolated if-clauses', and 'exceptional clauses'. In some articles the validity of conventional accounts and approaches is questioned: such as traditional constituency trees and labelled bracketings as a means of representing relationships between parenthetical elements and their 'hosts'; or traditional morphophonemic analyses as explanations for Ross's 'doubl-ing' constraint. While some authors question commonly made assumptions (for example those concerning the relationships of clauses to sentences and propositions; or those concerning the status of post-head dependents in the NP), others appeal to new frameworks (for instance 'emergence theory' is used as a source of inspiration in dealing with 'intransitive prepositions'). This collection also includes articles that adopt a solidly corpus-based approach. The *Clause in English* has been prepared by colleagues past and present, friends and admirers of Rodney Huddleston, in order to honour his consistently outstanding contribution to grammatical theory and description.

Middle Egyptian introduces the reader to the writing system of ancient Egypt and the language of hieroglyphic texts. It contains twenty-six lessons, exercises (with answers), a list of hieroglyphic signs, and a dictionary. It also includes a series of twenty-five essays on the most important aspects of ancient Egyptian history, society, religion and literature. The combination of grammar lessons and cultural essays allows users to not only read hieroglyphic texts but also to understand them, providing readers with the foundation to understand texts on monuments and to read great works of ancient Egyptian literature in the original text. This second edition contains revised exercises and essays, providing an up to date account of current research and discoveries. New illustrations enhance discussions and examples. These additions combine with the previous edition to create a complete grammatical description of the classical language of ancient Egypt for specialists in linguistics and other fields.
