Humanities at the Crossroads Palgrave Macmillan

"Simple text and colorful images illustrate types of reptiles, including common characteristics, diet, and life cycle"--

Best Is Temporary - Be Better ASCD

With text of P.L. 89-290, National Foundation on the Arts and the Humanities Act.

Amongst Digital Humanists University of Chicago Press
Interdisciplining Digital Humanities sorts through definitions and patterns of practice over roughly sixty-five years of work, providing an overview for specialists and a general audience alike. It is the only book that tests the widespread claim that Digital Humanities is interdisciplinary. By examining the boundary work of constructing, expanding, and sustaining a new field, it depicts both the ways this new field is being situated

within individual domains and dynamic cross-fertilizations that are fostering new relationships across academic boundaries. It also accounts for digital reinvigorations of "public humanities" in cultural heritage institutions of museums, archives, libraries, and community forums.

Defining Digital Humanities Bloomsbury Publishing USA

Als Vorläufer jetziger Debatten kann der Bildungsstreit, der in den 1930er Jahren an der University of Chicago ausbrach, wertvolle Einsichten liefern. Die Studie zeigt, wie die formalistische Literaturtheorie der Chicago Critics aus diesem Kontext einer Verteidigung der Humanities Impulse zog.

Questions and Answers Bucknell University Press

A Companion to Virginia Woolf is a thorough examination of her life, work, and multiple contexts in 33 essays written by leading scholars in the field. Contains insightful and provocative new scholarship and sketches out new directions for future research Approaches Woolf's writing from a variety of perspectives and disciplines, including modernism, post-colonialism, queer theory,

animal studies, digital humanities, and the law Explores the multiple trajectories Woolf's work travels around the world, from the Bloomsbury Group, and the Hogarth Press to India and Latin America Situates Woolf studies at the vanguard of contemporary literature scholarship and the new modernist studies
Examination Section, Questions and Answers John Wiley & Sons
 These are troubling days for the humanities. In response, a recent proliferation of works defending the humanities has emerged. But, taken together, what are these works really saying, and how persuasive do they prove? *The Battle of the Classics* demonstrates the crucial downsides of contemporary apologetics for the humanities and presents in its place a historically informed case for a different approach to rescuing the humanistic disciplines in higher education. It reopens the passionate debates about the classics that took place in late nineteenth- and early twentieth-century America as a springboard for crafting a novel foundation for the humanistic tradition. Eric Adler demonstrates that current defenses of the humanities rely on the humanistic disciplines as inculcators of certain poorly defined skills such as "critical thinking." It criticizes this conventional approach, contending that humanists cannot hope to save their disciplines without arguing in favor of particular humanities content. As the uninspired defenses of the classical humanities in the late nineteenth century prove, instrumental apologetics are bound to fail. All the same, the book shows that proponents of the Great Books favor a curriculum that is too intellectually narrow for the twenty-first century. *The Battle of the Classics* thus lays out a substance-based approach to undergraduate education that will revive the humanities, even as

it steers clear of overreliance on the Western canon. The book envisions a global humanities based on the examination of masterworks from manifold cultures as the heart of an intellectually and morally sound education.

100 Questions (and Answers) About Qualitative Research, by Lisa M. Given, addresses the practical decisions that researchers must

make in their work, from the design of the study, through ethics approval, implementation, and writing. The book's quick-scan, question-and-answer format make it ideal as a supplementary text or as a ready reference for graduate students preparing for comprehensive exams and writing research proposals, undergraduates in affiliated programs who will not be taking a primary course in qualitative research methods, and researchers working across disciplines in academic or practice environments.

A Question and Answer Book Bloomsbury Publishing USA
This book provides an accessible introduction to, and overview of, the digital humanities, one of the fastest growing areas of literary studies. Lane takes a unique approach by focusing on the technologies and the new environment in which the digital humanities largely takes place: the digital laboratory. The book provides a brief history of DH, explores and explains the methodologies of past and current DH projects, and offers resources such as detailed case studies and bibliographies. Further, the focus on the digital laboratory space reveals affiliations with the types of research that have traditionally taken place in the sciences, as well as convergences with other fast-growing research spaces, namely innovation labs, fabrication labs, maker spaces, digital media labs, and change labs. The volume highlights the profound transformation of literary studies that is underway, one in which the adoption of powerful technology – and concomitantly being situated within a laboratory environment – is leading to an important re-engagement in the arts and humanities, and a renewed understanding of literary studies in the digital age, as well as a return to large-scale financial investment in humanistic research.

It will be useful to students and teachers, as well as administrators and managers in charge of research infrastructure and funding decisions who need an accessible overview of this technological transformation in the humanities. Combining useful detail and an overview of the field, the book will offers accessible entry into this rapidly growing field.

Questions and Answers Open Book Publishers

"The essays in this collection offer a timely intervention in digital humanities scholarship, bringing together established and emerging scholars from a variety of humanities disciplines across the world. The first section offers views on the practical realities of teaching digital humanities at undergraduate and graduate levels, presenting case studies and snapshots of the authors' experiences alongside models for future courses and reflections on pedagogical successes and failures. The next section proposes strategies for teaching foundational digital humanities methods across a variety of scholarly disciplines, and the book concludes with wider debates about the place of digital humanities in the academy, from the field's cultural assumptions and social obligations to its political visions." (4e de couverture).

University of Michigan Press

Best is always temporary. Becoming better as an individual is possible every day. The collective of humanity only rises when the individuals within that collective take personal responsibility to become better each day. Living with a platitude such as live your best life, or do your best, historically, sets up more failed attempts than successful accomplishments. Results require

action, not platitudes or soundbites. Knowledge and individual participation are critical for longevity and quality. Best is Temporary; Be Better is a guide to learning the importance of self-discovery and personal development influencers on all performance enhancement. Enhancements that create a better person. Anyone can become better each day if they participate. Learn how to ask better questions, understand proximity to greatness, control environments and set boundaries, increase communication skills, improve your health and wellness, think, do, and become by your own design. Opening your full potentiality, not another fortune cookie, or Lao Tzu quote on Instagram! Make the choice to be better every day – it is your choice to make, but you can always use a guidebook! Here it is, that guidebook that you are looking for.

A Manifesto SAGE Publications

This reader brings together the essential readings that have emerged in Digital Humanities. It provides a historical overview of how the term 'Humanities Computing' developed into the term 'Digital Humanities', and highlights core readings which explore the meaning, scope, and implementation of the field. To contextualize and frame each included reading, the editors and authors provide a commentary on the original piece. There is also an annotated bibliography of other material not included in the text to provide an essential list of reading in the discipline.

The Big Humanities John Wiley & Sons

The first scholarly discussion on the band, Pearl Jam and Philosophy examines both the songs (music and lyrics) and the activities (live performances, political commitments) of one of the most celebrated and charismatic rock bands of the last 30 years.

The book investigates the philosophical aspects of their music at various levels: existential, spiritual, ethical, political, metaphysical and aesthetic. This philosophical interpretation is also dependent on the application of textual and poetic analysis: the interdisciplinary volume puts philosophical aspects of the band's lyrics in close dialogue with 19th- and 20th-century European and American poetry. Through this widespread philosophical examination, the book further looks into the band's immense popularity and commercial success, their deeply loyal fanbase and genuine sense of community surrounding their music, and the pivotal place the band holds within popular music and contemporary culture.

What are "essential questions," and how do they differ from other kinds of questions? What's so great about them? Why should you design and use essential questions in your classroom? Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to

designing curriculum, instruction, and assessment, the authors

- *Give a comprehensive explanation of why EQs are so important;
- *Explore seven defining characteristics of EQs; *Distinguish between topical and overarching questions and their uses;
- *Outline the rationale for using EQs as the focal point in creating units of study; and *Show how to create effective EQs, working from sources including standards, desired understandings, and student misconceptions. Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

The digital humanities is a rapidly growing field that is transforming humanities research through digital tools and resources. Researchers can now quickly trace every one of Issac Newton's annotations, use social media to engage academic and public audiences in the interpretation of cultural texts, and visualize travel via ox cart in third-century Rome or camel caravan in ancient Egypt. Rhetorical scholars are leading the revolution by fully utilizing the digital toolbox, finding themselves at the nexus of digital innovation. Rhetoric and the Digital Humanities is a timely, multidisciplinary collection that is the first to bridge scholarship in rhetorical studies and the digital humanities. It offers much-needed guidance on how the theories and methodologies of rhetorical studies can enhance all work in digital humanities, and vice versa. Twenty-three essays over three sections delve into connections, research methodology, and future directions in this field. Jim Ridolfo and William Hart-Davidson have assembled a broad group of more than thirty accomplished scholars. Read together, these essays represent the cutting edge of research, offering guidance that will energize and inspire future collaborations.

New Rudman's Questions and Answers on the Graduate Record Advanced Test in Humanities Routledge

This book constitutes selected revised papers of the 14th International Conference, Nooj 2020, held Zagreb, Croatia, in June 2020. Due to the COVID-19 pandemic the conference was held online. Nooj is a linguistic development environment that allows linguists to formalize several levels of linguistic phenomena. Nooj provides linguists with tools to develop dictionaries, regular grammars, context-free grammars, context-sensitive grammars

and unrestricted grammars as well as their graphical equivalent to formalize each linguistic phenomenon. The 20 full papers presented were carefully reviewed and selected from 68 submissions. The papers are organized in the following topics: Linguistic Formalization; Digital Humanities and Teaching with Nooj; Natural Language Processing Applications.

General Examination in Humanities Ashgate Publishing, Ltd. Digital Humanities is a burgeoning field of research and education concerned with the intersection of technology and history, philosophy, linguistics, literature, music, cultural studies, and the arts. Supporting Digital Humanities for Knowledge Acquisition in Modern Libraries aims to stand at the forefront of this emerging discipline, targeting an audience of researchers and academicians, with a special focus on the role of libraries and library staff. In addition to a collection of chapters on crucial issues surrounding the digital humanities, this volume also includes a fascinating account of the painstaking restoration efforts surrounding a 110-year-old handwritten historical source document, the results of which (never before published on this scale) culminate in a full-color, 70-page photographic reproduction of the 1904 Diary of Anna Clift Smith.

New Rudman's Questions and Answers on the CLEP College Level Examination Program General Examination: Humanities Capstone Classroom

In his famous classification of the sciences, Francis Bacon not

only catalogued those branches of knowledge that already existed in his time, but also anticipated the new disciplines he believed would emerge in the future: the "desirable sciences." Mikhail Epstein echoes, in part, Bacon's vision and outlines the "desirable" disciplines and methodologies that may emerge in the humanities in response to the new realities of the twenty-first century. Are the humanities a purely scholarly field, or should they have some active, constructive supplement? We know that technology serves as the practical extension of the natural sciences, and politics as the extension of the social sciences. Both technology and politics are designed to transform what their respective disciplines study objectively. The Transformative Humanities: A Manifesto addresses the question: Is there any activity in the humanities that would correspond to the transformative status of technology and politics? It argues that we need a practical branch of the humanities which functions similarly to technology and politics, but is specific to the cultural domain.

Questions and Answers IGI Global

The book raises questions about the underlying paradigms of contemporary learning and social thinking, including the nature of consciousness and the mind, the purpose and conduct of education, the role of science and scientific methodologies, the place of art and literature, or relationship to the environment, our concepts of spirituality, our attitudes to the past and also what we are doing to our own future.
