Chapter 1 Strategic Management Revision
Chapter 1 Strategic Management And Strategic management, strategy for short, is essentially about choice — in terms of what the organization will do and won't do to achieve specific goals and objectives, where such goals and objectives lead to the

realization of a stated mission and vision.
Strategy is a central part of the planning function in P-O-L-C.
Strategy is also about making choices that provide the organization with some measure of a sustainable competitive advantage.
