13-2 During the day, cool air over the
ocean moves inland and creates a sea
breeze. The cool air forces warm air over
the land to rise. The rising air cools and
sinks, creating a convection cell. These
conditions can produce strong updrafts
that result in thunderstorms. Chapter 13:

Anyone who does not know God is
simply foolish. Such people look at the
good things around them and still fail to
see the living God. They have studied
the things he made, but they have not
recognized the one who made them. 2
