Winner, 2016 Liz Carpenter Award for the Research in the History of Women, presented at the Texas State Historical Association Annual Meeting At Fair Park in Dallas, a sculpture of a Native American figure, bronze with gilded gold leaf, strains a bow before sending an arrow into flight. Tejas Warrior has welcomed thousands of visitors since the Texas Centennial Exposition opened in the 1930s. The iconic piece is instantly recognizable, yet few people know about its creator: Allie Victoria Tennant, one of a notable group of Texas artists who actively advanced regionalist art in the decades before World War II. Light Townsend Cummins follows Tennant's public career from the 1920s to the 1960s, both as an artist and as a culture-bearer, as she advanced cultural endeavors, including the arts. A true pathfinder, she helped to create and nurture art institutions that still exist today, most especially the Dallas Museum of Art, on whose board of trustees she sat for almost thirty years. Tennant also worked on behalf of other civic institutions, including the public schools, art academies, and the State Fair of Texas, where she helped create the Women's Building. Allie Victoria Tennant and the Visual Arts in Dallas sheds new light on an often overlooked artist.

History 12 Twentieth Century World History Student Workbook *Strategic Reading Level 3 Student's Book* R.I.C. Publications

"Miriam Pawel's fascinating book . . . illuminates the sea change in the nation's politics in the last half of the 20th century."--New York Times Book Review California Book Award Gold Medal Winner * Finalist for the Los Angeles Times Book Prize * A Los Angeles Times Bestseller * San Francisco Chronicle's "Best Books of the Year" List * Publishers Weekly Top Ten History Books for Fall * Berkeleyside Best Books of the Year * Shortlisted for NCIBA Golden Poppy Award A Pulitzer Prize-winning journalist's panoramic history of California and its impact on the nation, from the Gold Rush to Silicon Valley--told through the lens of the family dynasty that led the state for nearly a quarter century. Even in the land of reinvention, the story is exceptional: Pat Brown, the beloved father who presided over California during an era of unmatched expansion; Jerry Brown, the cerebral son who became the youngest governor in modern times--and then returned three decades later as the oldest. In *The Browns of California*, journalist and scholar Miriam Pawel weaves a narrative history that spans four generations, from August Schuckman, the Prussian immigrant who crossed the Plains in 1852 and settled on a northern California ranch, to his great-grandson Jerry Brown, who reclaimed the family homestead one hundred forty years later. Through the prism of their lives, we gain an essential understanding of California and an appreciation of its importance. The magisterial story is enhanced by dozens of striking photos, many published for the first time. This book gives new insights to those steeped in California history, offers a corrective for those who confuse stereotypes and legend for fact, and opens new vistas for readers familiar with only the sketchiest outlines of a place habitually viewed from afar with a mix of envy and awe, disdain, and fascination.

The Tales of Terrowin: Book One Multilingual Matters

The history of African American studies is often told as a heroic tale, with compelling images of black power and passionate African American students who refused to take no for an answer. Noliwe M. Rooks argues for the recognition of another story, which proves that many of the programs that survived actually began as a result of white philanthropy. With unflinching honesty, Rooks shows that the only way to create a stable future for African American studies is by confronting its complex past.

This book brings together a variety of voices – students and teachers, journal editors and authors, writers from the global north and south – to interrogate the notion of risk as it applies to the production of academic writing. Risk-taking is viewed as a productive force in teaching, learning and writing, and one that can be used to challenge the silences and erasures inherent in academic tradition and convention. Widening participation and the internationalisation of higher education make questions of language, register, agency and identity in postgraduate writing all the more pressing, and this book offers a powerful argument against the further reinforcement of a ‘northern’ Anglophone understanding of knowledge and its production and dissemination. This volume will provide food-for-thought for postgraduate students and their supervisors everywhere.

"Abbie Hoffman, Yippie non-leader, notorious dope addict and up-and-coming rock group (the WHAT), is currently on trial with seven others for conspiracy to incite riot during the Democratic Convention. When he returned from the Woodstock Festival he had five days before leaving for Chicago to prepare for the trial. Woodstock Nation, which the author wrote in longhand while lying upside down, stoned, on the floor of an unused office of the publisher, is the product of those five days. Other works by Mr. Hoffman include *Revolution for the Hell of It* and *Fuck the System*,

which he describes as a "tender love epic"."-- Back cover.

Why Evolution is True Simon and Schuster

Adventure was one thing, art another, but the main driver for the trip to Timbuktu was to help raise funds for research at the University of Edinburgh for FragileX. Further details can be found on the website, London to Timbuktu for Fragile X. 50 countries visited and now, along with a group of friendly individuals, I had just driven through the Sahara. With these muckers I had ventured deeply into the dark-continent. In this uncertain world there is no guarantee that you will return from any journey, large or small. Some intrepid adventurers like the Victorian, Alexander Gordon Laing, who made it all the way to Timbuktu, but sadly never made it back to his homeland of Scotland - he was slain en-route. I write this promotional e-book to introduce the e-book *From Blackpool Tower to Timbuktu*, (and back again). The main

thing I have learnt is a guess at the scope of things that are yet to be learned - a big scope. Travelling to Timbuktu was part of that scope. A significant theme of this book is autobiography in order to describe the motive; the attempt to make art. I see no fixed issues, rather developmental journeys. I hope you glean something here and that may inspire your own endeavours and that you enjoy this promotional e-book, an introduction to the larger e-book, *From Blackpool Tower to Timbuktu*, (and back again). This well-researched volume explores how the Black freedom struggle and the anti-Vietnam War movement dovetailed with

faculty and student activism in the South to undermine the traditional role of higher education and bring about social change. It uses the battles between students, faculty, presidents, trustees, elected officials, and funding agencies to explain how Black and White southern campuses transformed themselves into reputable academic centers. No matter the type of institution, these battles represented cracks in the edifice of the Old South and precipitated wide-ranging changes in southern higher education and society as well. This thought-provoking history offers scholars and others interested in institutional autonomy and the value of civil society a deep understanding of the central role that

institutions of higher education can play in social and political change and the vital importance of independent institutions during times of national crisis. "The riveting prose and well-researched narrative tell the stories of the past while also teaching lessons for today." —Marybeth Gasman, University of Pennsylvania "A must-read for every serious student of higher education, academic freedom, free speech, civil rights, student protest, and southern history." —Robert Cohen, New York University "Takes us back to a recent period in the American South in which the suppression of speech was commonplace in government and in the routines of everyday life." —James D. Anderson, University of Illinois
