The midtwenties through the midthirties can be a time of difficult transition: the security blankets of college and parents are gone, and it's suddenly time to make far-reaching decisions about career, investments, and adult identity. When author Christine Hassler experienced what she calls the "twenties triangle", she found that she was not alone. In fact, an entire generation of young women is questioning their choices, unsure if what they've been striving for is what they really want. They're eager to set a new course for their lives, even

if that means giving up what they have. Hassler herself left a fast-moving career that wasn't right for her and instead took the risk of starting her own business.

Now, based on her own experience and interviews with hundreds of women, she shares heartfelt stories on issues from career to parents to boyfriends to babies. Yet she also provides practical exercises to enable today's woman to chart a new direction for her life.

"ExxonMobil has met its match in Coll, an elegant writer and dogged reporter . . . extraordinary . . . monumental." —The Washington Post "Fascinating . . . Private Empire is a book meticulously prepared as if for trial . . . a compelling and elucidatory work." —Bloomberg From the award-winning and bestselling author of Ghost Wars and Directorate S,

an extraordinary exposé of Big Oil. Includes a profile of current Secretary of State and former chairman and chief executive of ExxonMobil, Rex Tillerson. In this, the first hard-hitting examination of ExxonMobil—the largest and most powerful private corporation in the United States—Steve Coll reveals the true extent of its power. *Private Empire* pulls back the curtain, tracking the corporation's recent history and its central role on the world stage, beginning with the Exxon Valdez accident in 1989 and leading to the Deepwater Horizon oil spill in the Gulf of Mexico in 2010. The action spans the globe—featuring kidnapping cases, civil wars, and high-stakes struggles at the Kremlin—and the narrative is driven by larger-than-life characters, including corporate legend Lee “Iron Ass” Raymond, ExxonMobil's chief executive until 2005, and current chairman and chief executive Rex Tillerson, President-elect Donald Trump's nomination for Secretary of State. A penetrating, news-breaking study, *Private Empire* is a defining portrait of Big Oil in American politics and foreign policy.

The Art of Social Imagination After 1945

This book brings together a collection of emergent research that moves the debate on desistance beyond a general consideration of individual and social structural influences. The authors examine empirical developments which have implications for policy surrounding

resettlement and re-offending, but also for punishment practices. Presenting thought-provoking theoretical advances and critiques, the editors challenge and enrich traditional understandings of desistance. A wide range of chapters explore how some criminal justice interventions hinder the desistance process, but also how alternative approaches may be more helpful in promoting and supporting desistance. Thorough and diverse, this book will be of great interest to scholars of criminology and criminal justice, social policy, sociology and psychology, and of special interest to researchers and practitioners working with (ex-)offenders.

A Genealogy of the Strangeways Prison Riot New World Library

In November 1963, the president of South Vietnam and his brother were brutally executed in a coup that was sanctioned and supported by the American government. President Kennedy later explained to his close friend Paul “Red” Fay that the reason the United States made the fateful decision to get rid of the Ngos was in no small part because of South Vietnam's first lady, Madame Nhu. “That goddamn bitch,” Fay remembers President Kennedy saying, “She's responsible ... that bitch stuck her nose in and boiled up the whole situation down there.” The coup marked the collapse of the Diem government and became the US entry point for a decade-long conflict in Vietnam. Kennedy's death and the atrocities of the ensuing war eclipsed the memory of Madame Nhu—with her daunting mixture of fierceness and beauty. But at the time, to David Halberstam, she was “the beautiful but diabolic sex dictatress,” and Malcolm Browne called her “the most dangerous

enemy a man can have." By 1987, the once-glamorous celebrity had retreated into exile and seclusion, and remained there until young American Monique Demery tracked her down in Paris thirty years later. Finding the Dragon Lady is Demery's story of her improbable relationship with Madame Nhu, and—having ultimately been entrusted with Madame Nhu's unpublished memoirs and her diary from the years leading up to the coup—the first full history of the Dragon Lady herself, a woman who was feared and fantasized over in her time, and who singlehandedly frustrated the government of one of the world's superpowers.

Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, *Generations* has been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading. William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of *Generations* allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millennium. *Generations* is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

Pre-Incident Indicators of Terrorist Incidents Univ of California Press

With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The *Social Media Reader* is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, *The Social Media Reader* promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

For years, Derrick Jensen has asked his audiences, "Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life?" No

one ever says yes. Deep Green Resistance starts where the environmental movement leaves off: industrial civilization is incompatible with life. Technology can't fix it, and shopping—no matter how green—won't stop it. To save this planet, we need a serious resistance movement that can bring down the industrial economy. Deep Green Resistance evaluates strategic options for resistance, from nonviolence to guerrilla warfare, and the conditions required for those options to be successful. It provides an exploration of organizational structures, recruitment, security, and target selection for both aboveground and underground action. Deep Green Resistance also discusses a culture of resistance and the crucial support role that it can play. Deep Green Resistance is a plan of action for anyone determined to fight for this planet—and win.

whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Business Networks In The New Political Economy Harper Collins

From Stupefied Youth to Dangerous Adults Back in 2008, Mark Bauerlein was a voice crying in the wilderness. As experts greeted the new generation of "Digital Natives" with extravagant hopes for their high-tech future, he pegged them as the "Dumbest Generation." Today, their future doesn't look so bright, and their present is pretty grim. The twenty-somethings who spent their childhoods staring into a screen are lonely and purposeless, unfulfilled at work and at home. Many of them are even suicidal. The Dumbest Generation Grows Up is an urgently needed update on the Millennials, explaining their not-so-quiet desperation and, more important, the threat that their ignorance poses to the rest of us.

Lacking skills, knowledge, religion, and a cultural frame of reference, Millennials are anxiously looking for something to fill the void. Their mentors have failed them. Unfortunately, they have turned to politics to plug the hole in their souls. Knowing nothing about history, they are convinced that it is merely a catalogue of oppression, inequality, and hatred. Why, they wonder, has the human race not ended all this injustice before now? And from the depths of their ignorance rises the answer: Because they are the first ones to care! All that is needed is to tear down our inherited civilization and replace it with their utopian aspirations. For a generation unacquainted with the constraints of human nature, anything seems possible. Having diagnosed the malady before most people realized the patient was sick, Mark Bauerlein surveys the psychological and social wreckage and warns that we cannot afford to do this to another generation.
