Westerners tend to divide the political world into "good" democracies and "bad" authoritarian regimes. But the Chinese political model does not fit neatly in either category. Over the past three decades, China has evolved a political system that can best be described as "political meritocracy." The China Model seeks to understand the ideals and the reality of this unique political system. How do the ideals of political meritocracy set the standard for evaluating political progress (and regress) in China? How can China avoid the disadvantages of political meritocracy? And how can political meritocracy best be combined with democracy? Daniel Bell answers these questions and more. Opening with a critique of "one person, one vote" as a way of choosing top leaders, Bell argues that Chinese-style political meritocracy can help to remedy the key flaws of electoral democracy. He discusses the advantages and pitfalls of political meritocracy, distinguishes between different ways of combining meritocracy and democracy, and argues that China has evolved a model of democratic meritocracy that is morally desirable and politically stable. Bell summarizes and evaluates the "China model"—meritocracy at the top, experimentation in the middle, and democracy at the bottom—and its implications for the rest of the world. A timely and original book that will stir up interest and debate, *The China Model* looks at a political system that not only has had a long history in China, but could prove to be the most important political development of the twenty-first century.

In 1989, students marched on Tiananmen Square demanding democratic reform. The Communist Party responded with a massacre, but it was jolted into restructuring the economy and overhauling the education of its young citizens. A generation later, Chinese youth are a world apart from those who converged at Tiananmen. Brought up with lofty expectations, they've been

accustomed to unprecedented opportunities on the back of China's economic boom. But today, China's growth is slowing and its demographics rapidly shifting, with the boom years giving way to a painful hangover. Immersed in this transition, Eric Fish, a millennial himself, profiles youth from around the country and how they are navigating the education system, the workplace, divisive social issues, and a resurgence in activism. Based on interviews with scholars, journalists, and hundreds of young Chinese, his engrossing book challenges the idea that today's youth have been pacified by material comforts and nationalism. Following rural Henan students struggling to get into college, a computer prodigy who sparked a nationwide patriotic uproar, and young social activists grappling with authorities, Fish deftly captures youthful struggle, disillusionment, and rebellion in a system that is scrambling to keep them in line—and, increasingly, scrambling to adapt when its youth refuse to conform.

How does graduate admissions work? Who does the system work for, and who falls through its cracks? More people than ever seek graduate degrees, but little has been written about who gets in and why. Drawing on firsthand observations of admission committees and interviews with faculty in 10 top-ranked doctoral programs in the humanities, social sciences, and natural sciences, education professor Julie Posselt pulls back the curtain on a process usually conducted in secret. "Politicians, judges, journalists, parents and prospective students subject the admissions policies of undergraduate colleges and professional schools to considerable scrutiny, with much public debate over appropriate criteria. But the question of who gets into Ph.D. programs has by comparison escaped much discussion. That may change with the publication of *Inside Graduate*

Admissions... While the departments reviewed in the book remain secret, the general process used by elite departments would now appear to be more open as a result of Posselt's book." —Scott Jaschik, *Inside Higher Ed* "Revealing...Provide[s] clear, consistent insights into what admissions committees look for." —Beryl Lief Benderly, *Science*
