This book offers a cutting-edge contribution on the importance of secondary education and assesses the strengths and weaknesses of its growth in India. Secondary education, long neglected, faces countless challenges and will require tremendous financial resources, millions of additional trained teachers, and vast infrastructure in terms of buildings, laboratories, libraries, ICT facilities, etc. The book examines these critical issues, with particular reference to the situation in India. It analyses the status quo of secondary education and discusses the strategies and approaches needed in order to universalize it. Including 20 chapters authored by eminent scholars in the field and from across the country, this book gathers the outcomes of a seminar organized by the Council for Social Development on Universalization of Secondary Education. The target audience includes policymakers, practitioners, administrators, education planners, researchers, teachers, and teacher educators with an interest in the future of secondary education.

*Cambridge O Level English Student Book* Nelson Thornes  
Post-O-level Studies in Modern Languages is a 14-chapter book that begins with an explanation of the changing structure of the sixth-form curriculum and the outlining of a model curriculum based on five areas of experience: communication; sociological and cultural aspects; mathematics; scientific education; and aesthetic experience. The book also discusses the transition from O-level to advanced studies; the study of literature in the A-level curriculum; and the French and literary studies in the sixth-form curriculum. Other chapters tackle the A-level examination syllabus, as well as some problems and suggestions in integrated language studies. Modern languages in industry and commerce, role of the language laboratory in post-O-level studies, and modern language tests in the United States are also explained.

**English and Its Teachers** IAP

English and Its Teachers offers a historical overview of the development of secondary English teaching in schools over the past 50 years. Initially charting the rise of a new progressive approach in the 1960s, the book then considers the implications for the subject and its teachers of three decades of central policy intervention. Throughout, document and interview data are combined to construct a narrative that details the fascinating and, at times, turbulent history. The book is divided into two main

parts - 'The age of invention' and 'The age of intervention'. The first of these sections details how innovative English teachers and academics helped to develop a new model. The second section explores how successive governments have sought to shape English through policy. A final part draws comparisons with the teaching of the subject in other major English-speaking nations and considers what the future might hold. English and Its Teachers is a valuable resource for those interested in the teaching of English in secondary schools, from new entrants to the profession, to experienced teachers and academics working in the sector.

The German education and training system has been the subject of considerable attention from other nations, and has often been used as a model. David Phillips' book brings together articles from some of the best known names in the field including Mitter, Glowka, Hearnden, Fuhr, Robinsohn and Prais and wagner. The book is organised into four sections. Section one examines the historical inheritance of the present education system. Section two covers standards and assessments and section three discusses vocational education and training, and area of the German education system which has received much admiration. Finally, and crucially, section four addresses questions about the future of the current system in a unified Germany.

Originally published in 1972. 1900-1970 saw extensive changes in the teaching of English in schools. The volume studies English instruction as it developed at junior and secondary level over this period. Using textbooks, method books, Board and Ministry Reports and other contemporary opinion, the book examines the basic questions arising from this historical survey. Whilst the main emphasis is on changes in actual classroom methods, the volume also examines the wider social pressures which have modified the school system in the UK as well as English as a subject in that system.

This book is a reader that describes, discusses and analyzes homeschooling from an array of different and international perspectives. We portray the energy of this movement, looking at the history of "education writ large" in a larger social, political and religious context. Like most movements in education, this one is both a reaction to the problems and inadequacies of existing schools, and a new direction in schooling that stands on its own. This book grew out of the efforts of Associates for Research on Private Education (ARPE), an international organization of scholars and practitioners affiliated with the American Education Research Association (AERA), which has spurred interest and research on private schools for over 30 years. ARPE publishes quarterly, the Private School MONITOR, as a means for highlighting the newest developments in the field of private education.

*The 'Scrutiny' Movement* Routledge

This book explores some of the major processes involved in the definition of school subject knowledge. Using historical ethnographic methods, the contributors to the collection highlight and examine some of the factors involved at national, institutional and classroom levels in the making of school subjects. The first section of the book outlines the theoretical and methodological basis for the study of school subjects, and the reasons for and the possibilities of such a study are considered. In the second section some histories of school curricula are presented from a variety of settings - colonial schools in Africa, working-class schools of the nineteenth century, nursery schools - and the conflicting forces of determination and change in school subjects are identified and examined. The third section focuses on the contemporary school situation and the papers isolate and investigate some of the interest groups and social processes which enter into or affect the realization of school knowledge in the classroom.

The author attempts to answer the question of why ESL classroom talk is the way it is. Basing her answer on a case study of a school in an ESL community, she argues that classroom talk may be linked in important ways to an operative sociocultural structure of ESL pedagogy over and above the classroom at the institutional level.

**Celebrating 50 Years From the Dartmouth Conference** Yellowreef Limited

This book describes the English grammar weaknesses manifested in the written work of young Cameroonians in tertiary education. It identifies the areas where the problems are most acute, seeks the reasons for such low grammar competences, and suggests possible solutions to the problems. The Error Analysis Approach suggested by authors like S.P. Corder and J.C. Richards was used to carry out the study. The book will be of interest to all L2 learners and teachers of English, to language policy makers of L2 English, and to all those who wish to see that Standard British English is preserved to a greater extent in English-speaking places outside Britain, despite the on-going indigenisation of this global language.
