"Medicine still contains an oral tradition, passed down in stories: the stories patients tell us, the ones we tell them, and the ones we tell ourselves," writes contributor Madaline Harrison. Bodies of Truth continues this tradition through a variety of narrative approaches by writers representing all facets of health care. And, since all of us have been or will be touched by illness or disability—our own or that of a loved one—at some point in our lives, any reader of this anthology can relate to the challenges, frustrations, and pain—both physical and emotional—that the contributors have experienced. Bodies of Truth offers perspectives on a wide array of issues, from food allergies, cancer, and neurology to mental health, autoimmune disorders, and therapeutic music. These experiences are recounted by patients, nurses, doctors, parents, children, caregivers, and others who attempt to articulate the intangible human and emotional factors that surround life when it intersects with the medical field.

In 1735, five Maroon boys are ready to be initiated as warriors. They have prepared long and hard for this day, and must now pass a sequence of tests. How the boys approach this, the most important day of their lives, says much about how they will respond to the challenges ahead. When they encounter a Redcoat troop in the forest near their village, the defence of the village and surrounding Maroon communities will depend on these boys, their training, courage, and intelligence. On this occasion, their community depends on them for its survival, but their initiation as warriors also teaches them lifelong lessons about loyalty, responsibility, trustworthiness and friendship.
